Sydney & Simon: Go Green! Paul A. Reynolds, 2015-10-13 Creative problem-solvers never give up! Last we saw them, Sydney & Simon used science, technology, engineering, arts, and math skills to save wilting flowers in their window box. Now the twin mice are back to apply STEAM thinking to recycling! During a class field trip to the Aquarium, Sydney is upset when she realizes that a green sea turtle has been harmed by garbage that made its way to the ocean. She must convince Simon that even if others don't intend to litter, the garbage everyone puts in a trashcan may accidentally get swept into sewers, streams, rivers, and possibly end up in the ocean. The twins collect data on the trash habits of their household and school and find they are all part of the problem! They need to figure out a way that their family, their neighborhood, and their school can cut down on garbage production and make better use of their discarded items. Short chapters paired with Peter H. Reynolds's lively illustrations will inspire readers to take a closer look at their recycling habits and implement small changes to make a big difference.

Go Green! Liz Gogerly, 2020-11-26 This colourful and positive book explains why it's good to 'go green'! It's Anjali's birthday party and the children have had a great time. But looking around the room at the end, they see mountains of rubbish, from food waste to wrapping paper, burst balloons and small plastic toys. What will happen to all of this waste? The children find out what happens at a recycling centre and about the huge amount of objects that can be recycled or reused. They learn how to take action outside by helping nature, reducing waste at school dinners, and saving energy and water at home. Through chatting to teachers and local people, the children learn all about green topics such as landfills, litter, plastic mountains in oceans and global warming. But it's not all doom and gloom. They discover that there are ways that they can take action to help save their environment and the planet. By walking to school or switching off lights when they don't need them, this book is full of ideas for reducing and reusing. At the end they hold a fun Eco Festival to raise awareness of how easy it is to 'go green'! 'Stop and Think' panels encourage readers to think about the problem in their local area and 'Take Action' panels give advice for how readers can get involved. Look out for the other titles in this series: Wild Weather!, Save the Seas! and Nature Needs You! Great for teaching children age 7+ about science topics including pollution, global warming, natural resources and energy use.

Go Green Get Lean Kate Geagan,2009-03-17 Over the past 20 years America has been steadily marching toward a diet that is more drenched in fossil fuel than any key nutrient. Experts estimate that it now takes roughly 7 to 10 calories of fossil fuel energy to bring one calorie of food energy to the American plate. Not only have our eating habits turned us into an increasingly overweight society, but the alarming truth is that our food choices are having as much of an impact on the planet as the cars we drive. *Go Green Get Lean* is the perfect eating plan for our time. Revealing easy-to-follow steps anyone can take to eat for a healthy body and planet—and drop up to 9 pounds in the first 2 weeks—Kate Geagan helps readers see the questionable value of convenience foods, and explains why going green doesn't require a drastic vegan overhaul. Because there are many nutritional benefits to be drawn from some non-plant-based food choices, she points readers to the best selections, including occasional splurges they can enjoy in good conscience. In learning to make truly LEAN choices, Kate offers the following straightforward formula: Before eating food, ask yourself: Local or global? What was the Energy used to bring it to my plate? (Include processing, packaging, transportation, and temperature of food.) Animal or plant? (Plant foods are greener.) Is this Necessary? (Is this food critical to my health and weight goals?) This trailblazing work—the first to offer a specific weight-loss plan along with the promise of a lowered carbon footprint—makes it possible for readers to help the environment and their waistlines at the same time.
