**The Gold Mines of the World** James Herbert Curle,1905

Hardrock Gold Tom A. Morrison,1992-01-01 Describes modern gold mining methods, and recounts stories about mines and the people who work in them.

**Going for Gold** Jack H. Morris,2010-05-10 Details how Newmont Mining revolutionized the gold mining industry and remains the second largest gold miner in the world Jack H. Morris asserts that Newmont is the link between early gold mining and today's technology-driven industry. We learn how the company's founder and several early leaders grew up in gold camps and how, in 1917, the company helped finance South Africa's largest gold company and later owned famous gold mines in California and Colorado. In the 1960s the company developed the process to capture "invisible gold" from small distributions of the metal in large quantities of rock, thereby opening up the rich gold field at Carlin, Nevada. Modern gold mining has all the excitement and historic significance of the metal's colorful past. Instead of panning for ready nuggets, today's corporate miners must face heavy odds by extracting value from ores containing as little as one-hundredth of an ounce per ton. In often-remote locations, where the capital cost of a new mine can top \$2 billion, 250-ton trucks crawl from half mile deep pits and ascend, beetle-like, loaded with ore for extraction of the minute quantities of gold locked inside. Morris had unique access to company records and the cooperation of more than 80 executives and employees of the firm, but the company exercised no control over content. The author tells a story of discovery and scientific breakthrough; strong-willed, flamboyant leaders like founder Boyce Thompson; corporate raiders such as T. Boone Pickens and Jimmy Goldsmith; shakedowns by the Indonesian government and monumental battles with the French over the richest mine in Peru; and learning to operate in the present environmental regulatory climate. This is a fascinating story of the metal that has ignited passions for centuries and now sells for over \$1,000 an ounce.

Dicker's Mining Record, and Guide to the Gold Mines of Australia ,1862

The appearance of gold in nature Lin Chi Chou, 林奇周, The content of gold in the earth's crust is only 0.011 ppm, and it is unevenly distributed, that is, only under special geological conditions can there be gold mines, plus people think that gold is beautiful, so it is cherished by people. In this topic, we introduce gold samples from major gold producing areas, as well as the principles of detecting gold deposits and the formation of gold deposits. The features of this book are: 1. A more comprehensive introduction to the famous and unique gold mines on the earth. This book is undoubtedly a good reference for friends who want to get to know the gold mines. 2. It contains an introduction to the unique gold mines in Taiwan's Jinguashi and Jiufen. This is the first time that gold mines in this place have been fully presented through a book. I would like to thank the Jinjiu mineral collector Zhang Yingjie, Xia Guoxiong old miner, Chen Huosheng old miner and others for providing specimens and assistance. Let the only remaining orphans in the gold mines here once again give the world a chance to appreciate them. 3. Although some foreign gold mines are not as exaggerated as orphans, they are also extremely rare. Some of them are not in the gallery. They are collected from more than 50 countries, more than 300 mines or places, and thousands of gold mines. The exquisite products selected from the specimens can be said to be beautiful. Taiwan's early textbooks stated that Taiwan lacked metal minerals, and only a small amount of gold and copper was produced in Ruifang. It was not until the autumn of 1991 that my wife and I first visited Jinjiu (Jinkuashi and Jiufen are collectively called. Jinjiu is also the area where Ruifang produces gold and copper) that this introduction is very incorrect. At that time, it was not long before the Jinguashi Gold Mine ceased production (1987), and it was in a state of depression. With a feeling of learning and care, I asked the old miners about the relevant knowledge and information about the gold mine. As a result, I found that the old miners only knew how to mine gold, but don't know much about the relevant academic principles. I originally thought that the reports or writings of government agencies and academic institutions could be fully accountable, but the situation was not satisfactory. Since I have been interested in chemistry for a long time, it can be considered a little basic, so I met with the old miners to help solve the mystery of the Jinguashi gold mine. In the next 20 years, as long as there is no work, I rode a motorcycle from Taoyuan to Jinguashi exploration, and discuss with old miners, nearly 800 round trips. Thirty years have passed, this book is considered complete, and finally the promise of the year has been fulfilled. Lin Chi Chou was born on January 22, 1958, in New Taipei City, Taiwan. Graduated from the Department of Nuclear Engineering, National Tsinghua University in 1980 After leaving the army in 1982, I devoted myself to science education. Currently the curator of Taoyuan Mineral Museum. If readers have comments, please contact me at jinbee1103@gmail.com
