Nina G. Jablonski

Wildlife Review ,1986

Reruns on File Donald G. Godfrey,2013-09-13 For more than half a century, broadcast recordings have reflected an important aspect of our culture and history. An increasing number of archivists and private collectors have restored and exchanged radio and television materials. However, despite the awareness of these primary resource materials, there is still some reluctance to utilize this aural and visual history resource. A part of this reluctance is due to the fact that little is known about the existence of many collections throughout the nation. This volume provides a comprehensive directory of electronic media archives in the United States and Canada. It describes each collection, focusing on its speciality, providing the serious researcher with ready access information to these electronic media program resources. Focusing on both private and institutional collections, it is organized by state and city with indexes to provide the scholar with subject and location of specific topics of interest.

*Second Nature* David J. Shepherdson,Jill D. Mellen,Michael Hutchins,1999-05-14 Growing recognition of the complexity of animals' physical, social, and psychological lives in the wild has led both zookeepers and the zoo-going public to call for higher environmental standards for animals in captivity. Bringing together the work of animal behaviorists, zoo biologists, and psychologists, Second Nature explores a range of innovative strategies for environmental enrichment in laboratories and marine parks, as well as in zoos. From artificial fleeing-prey devices for leopards to irregular feeding schedules for whales, the practices discussed have resulted in healthier, more relaxed animals that can breed more easily and can exert some control over their environments. Moving beyond the usual studies of primates to consider the requirements of animals as diverse as reptiles, amphibians, marine mammals, small cats, hooved grazers, and bears, contributors argue that whether an animal forages in the wild or plays computer games in captivity, the satisfaction its activity provides—rather than the activity itself—determines the animal's level of physical and psychological well-being. Second Nature also discusses the ways in which environmental enrichment can help zoo-bred animals develop the stamina and adaptability for survival in the wild, and how it can produce healthier lab animals that yield more valid test results. Providing a theoretical framework for the science of environmental enrichment in a variety of settings, the book renews and extends a humane approach to the keeping and conservation of animals.

**Thirteen Gold Monkeys** Benjamin Beck,2013-04-03 This is a story of the early days of the reintroduction of zoo-born golden lion tamarin monkeys to the coastal rainforest of Brazil. ... The characters, and their personalities and experiences, are fictional but loosely based on those who actually took part in the work. ... the experiences of dozens of monkeys may have been combined into those of 13 individuals that were born in North American zoos and reintroduced to the wild in Brazil in the course of this story.--Preface.

*Cyborgs, Santa Claus and Satan* Fraser A. Sherman,2009-08-24 In the three decades since the first SF film produced for television--1968's Shadow on the Land--nearly 600 films initially released to television have had science fiction, fantasy, or horror themes. Featuring superheroes, monsters, time travel, and magic, these films range from the phenomenal to the forgettable, from low-budget to blockbuster. Information on all such American releases from 1968 through 1998 is collected here. Each entry includes cast and credits, a plot synopsis, qualitative commentary, and notes of interest on aspects of the film. Appendices provide a list of other films that include some science fiction, horror, or fantasy elements; a film chronology; and a guide to alternate titles.

**Golden Kingdoms** Joanne Pillsbury,Timothy Potts,Kim N. Richter,2017-09-26 This volume accompanies a major international loan exhibition featuring more than three hundred works of art, many rarely or never before seen in the United States. It traces the development of gold working and other luxury arts in the Americas from antiquity until the arrival of Europeans in the early sixteenth

century. Presenting spectacular works from recent excavations in Peru, Colombia, Panama, Costa Rica, Guatemala, and Mexico, this exhibition focuses on specific places and times—crucibles of innovation—where artistic exchange, rivalry, and creativity led to the production of some of the greatest works of art known from the ancient Americas. The book and exhibition explore not only artistic practices but also the historical, cultural, social, and political conditions in which luxury arts were produced and circulated, alongside their religious meanings and ritual functions. Golden Kingdoms creates new understandings of ancient American art through a thematic exploration of indigenous ideas of value and luxury. Central to the book is the idea of the exchange of materials and ideas across regions and across time: works of great value would often be transported over long distances, or passed down over generations, in both cases attracting new audiences and inspiring new artists. The idea of exchange is at the intellectual heart of this volume, researched and written by twenty scholars based in the United States and Latin America.

Tales of the Golden Monkeys ,2017-11-20 The golden monkeys are unquestionably the most beautiful monkeys in the world. The book provides a brief yet thorough introduction to the golden monkeys, a rare wild animal with a population of only 28,000. Hopefully it will bring attention to this endangered species and serve as an appeal for better protection of them.
