The Ten Golden Rules M. A. Soupios, Panos Mourdoukoutas, 2009-03-31 A Stoic Guide to the Art of Living a Richer, More Meaningful Life. Plato, Aristotle, Socrates, Epictetus, Epicurus, Pythagoras, Aesop—such wisdom, now at your fingertips. Timeless wisdom from these ancient Greek philosophers plus others has been condensed by the authors into ten memorable and easy-to-understand rules that, if lived by, can enable modern readers to have rich, meaningful lives. The ten rules . . . represent enduring features of the Greek wisdom. In a very real sense, they defy time and place and represent insights that remain profoundly relevant for contemporary culture. They can serve as antidotes for an age in which much that is true and valuable has been obscured by falsity and misconception. Accordingly, these ancient aphorisms are offered to all those interested in rubbing the dust from their eyes. With each chapter examining a rule, all chapters begin with a quote from one of the great Greek philosophers who inspired the rule, followed by a story or explanation of the rule and its importance in life, and end with teaching points on which to meditate and reflect. From this simple starting point, each rule allows the reader to unfurl and explore the richness and depth that can be found in life by embracing the lesson offered. Any reader searching for meaning will return to this simple, slim volume again and again to find tried-and-true wisdom that spans the ages to speak to us today.

The Craft of Scientific Presentations Michael Alley, 2006-05-17 This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.

Resonate Nancy Duarte, 2013-07-02 Reveals the underlying story form of all great presentations that will not only create impact, but will move people to action. Presentations are meant to inform, inspire, and persuade audiences. So why then do so many audiences leave feeling like they've wasted their time? All too often, presentations don't resonate with the audience and move them to transformative action. Just as the author's first book helped presenters become visual communicators, *Resonate* helps you make a strong connection with your audience and lead them to purposeful action. The author's approach is simple: building a presentation today is a bit like writing a documentary. Using this approach, you'll convey your content with passion, persuasion, and impact. Author has a proven track record, including having created the slides in Al Gore's Oscar-winning *An Inconvenient Truth*. Focuses on content development methodologies that are not only fundamental but will move people to action. Upends the usual paradigm by making the audience the hero and the presenter the mentor. Shows how to use story techniques of conflict and resolution. Presentations don't have to be boring ordeals. You can make them fun, exciting, and full of meaning. Leave your audiences energized and ready to take action with *Resonate*.
