Felicity O'Dell,Michael McCarthy

**How Did I Get Here?** Tony Hawk,2010-10-05 The most famous skateboarder ever shares the business secrets to his success! He's the man who put skateboarding on the map. He's the first to land a 900 (two and a half full rotations). He's also among the richest pitchmen in any sport. And, in a sport that's especially youth-oriented, Tony Hawk, a 40-something father of four, still connects with his audience by staying true to who he is. Moving easily between the ramp and the boardroom, Tony currently runs one of the most acclaimed action sports companies, a clothing line, and video game series bearing his name that has sold over \$1 billion worldwide, making it the biggest selling action sports game franchise in game history. He has secured endorsement deals with major brands such as McDonalds, Intel, T-Mobile and Kohl's; started the Boom Boom HuckJam action sports tour; and achieved worldwide acclaim from the ESPN X Games. Filled with Tony's typical modesty and humor, *How Did I Get Here?* tells the amazing story behind Tony Hawk's unprecedented success from skateboarder to CEO, and the secrets behind his lasting appeal. You'll find out how authenticity has served him well in all his achievements. You'll also understand how his story has shaped many of his fundamental values, including his huge desire to win and his strong sense of realism. Get the inside story of Tony Hawk beyond the skateboard as he answers the question: How Did I Get Here?

**Math Exchanges** Kassia Omohundro Wedekind,2011 Traditionally, small-group math instruction has been used as a format for reaching children who struggle to understand. Math coach Kassia Omohundro Wedekind uses small-group instruction as the centerpiece of her math workshop approach, engaging all students in rigorous math exchanges. The key characteristics of these mathematical conversations are that they are: 1) short, focused sessions that bring all mathematical minds together, 2) responsive to the needs of the specific group of mathematicians, and 3) designed for meaningful, guided reflection. As in reading and writing workshop, students in math workshop become self-directed and independent while participating in a classroom community of learners. Through the math exchanges, students focus on number sense and the big ideas of mathematics. Teachers guide the conversations with small groups of students, mediating talk and thinking as students share problem-solving strategies, discuss how math works, and move toward more effective and efficient approaches and greater mathematical understanding. Although grounded in theory and research, *Math Exchanges: Guiding Young Mathematicians in Small Group Meetings* is written for practicing teachers and answers such questions as the following: How can I use a math workshop approach and follow a certain textbook or set of standards? How should I form small groups? How often should I meet with small groups? What should I focus on in small groups? How can I tell if my groups are making progress? What do small-group math exchanges look like, sound like, and feel like?

**Surfing the Edge of Chaos** Richard Pascale,Mark Milleman,Linda Gioja,2001-03-01 Every few years a book changes the way people think about a field. In psychology there is Daniel Goleman's *Emotional Intelligence*. In science, James Gleick's *Chaos*. In economics and finance, Burton Malkiel's *A Random Walk Down Wall Street*. And in business there is now *Surfing the Edge of Chaos* by Richard T. Pascale, Mark Millemann, and Linda Gioja. *Surfing the Edge of Chaos* is a brilliant, powerful, and practical book about the parallels between business and nature -- two fields that feature nonstop battles between the forces of tradition and the forces of transformation. It offers a bold new way of thinking about and responding to the personal and strategic challenges everyone in business faces these days. Pascale, Millemann, and Gioja argue that because every business is a living system (not just as metaphor but in reality), the four cornerstone principles of the life sciences are just as true for organizations as they are for species. These principles are: Equilibrium is death. Innovation usually takes place on the edge of chaos. Self-organization and emergence occur naturally. Organizations can only be disturbed, not directed. Using intriguing, in-depth case studies (Sears Roebuck, Monsanto, Royal Dutch Shell, the U.S. Army, British Petroleum, Hewlett Packard, Sun Microsystems), *Surfing the Edge of Chaos* shows that in business, as in nature, there are no permanent winners. There are just companies and species that either react to change and evolve, or get left behind and become extinct. Some examples: Parallels between Yellowstone National Park and Sears show why equilibrium is a dangerous place in both nature and business. How Monsanto used a strange attractor to move to the edge of chaos to alter its identity and transform its culture. The unlikely story of how the U.S. Army embraced the ideas of self-organization and emergence. Why the misapplication of linear logic (reengineering a business or attempting to eradicate predators in nature) will inevitably fail. The stories in *Surfing the Edge of Chaos* are of pioneering efforts that show how the principles of living systems produce bottom-line impact and profound transformational change. What's really striking about them, though, is their reality. They are about success and failure, breakthroughs and dead-ends. In short, they are like the business you are in and the challenges you face.

**Wolf Totem and the Post-Mao Utopian** Xiaojiang Li,2018-03-12 Applied to topics in the novel *Wolf Totem* by the political economist Jiang Rong, Western scholarship in the humanities and social sciences has insights and shortcomings to address an allegory of utopia in the novel and its significance for contemporary China.

***Wave Rider*** Harrison H. Owen,2008-10-20 What began twenty years ago as a journey of exploration into the interplay between chaos, order, and the creative process culminates in this capstone work of Harrison Owen's pioneering career. From the creator of Open Space Technology (OST), *Wave*

Rider shows how to apply the fundamental principles of self-organization – the driving power behind OST’s immense success – not just to a single event but to the day-to-day management and leadership of organizations. Owen proposes that all systems – not only our organizations but indeed the entire cosmos – are fundamentally self-organizing. Control is ultimately an illusion, and attempts to assert it are a waste of time and can even be destructive. If we want to have truly high-performing organizations, at some point we need to set aside our preconceived goals and strategies, important as they are, and align ourselves and our work with the primal force of self-organization – learn how to ride that wave. To that end, Owen lays out eight concrete steps for becoming a successful Wave Rider, derived from the global experience of hundreds of thousands of Open Space events, with a clear focus on producing exceptional performance. The book includes a real-life tale from a genuine Wave Rider, Dee Hock of VISA International, as well as an imagined account of a day in the life of a wave-riding manager, to show how self-organizing principles can deal with specific functions like running a staff meeting, managing projects, motivating staff, and much more. Wave Rider is another exceptional contribution from one of organizational development’s true innovators.

*Deep Learning for Coders with fastai and PyTorch* Jeremy Howard, Sylvain Gugger, 2020-06-29 Deep learning is often viewed as the exclusive domain of math PhDs and big tech companies. But as this hands-on guide demonstrates, programmers comfortable with Python can achieve impressive results in deep learning with little math background, small amounts of data, and minimal code. How? With fastai, the first library to provide a consistent interface to the most frequently used deep learning applications. Authors Jeremy Howard and Sylvain Gugger, the creators of fastai, show you how to train a model on a wide range of tasks using fastai and PyTorch. You’ll also dive progressively further into deep learning theory to gain a complete understanding of the algorithms behind the scenes. Train models in computer vision, natural language processing, tabular data, and collaborative filtering. Learn the latest deep learning techniques that matter most in practice. Improve accuracy, speed, and reliability by understanding how deep learning models work. Discover how to turn your models into web applications. Implement deep learning algorithms from scratch. Consider the ethical implications of your work. Gain insight from the foreword by PyTorch cofounder, Soumith Chintala.

*The Writer’s Way* Jack Rawlins, 1996 Leading students step by step through the writing process, from pre-writing to the final draft, this text is based upon the theory that people learn best by doing the whole thing to be learned and doing it often, surrounded by examples and in a context that offers immediate personal rewards. It focuses on personal motivation, interaction with other writers, and revision, and includes 47 student papers which serve as models for skills such as abstracting, revising and peer editing.

*Living Curiously* Becki Saltzman, 2016-05-20 Living Curiously reveals the 5-step, science-based framework for using curiosity strategically to generate new ideas, bust assumptions, cure stagnation, and design and create a remarkable life. Living curiously is not about endless inquiry; it’s about discovering blind spots, hidden connections, and opportunities in order to make better decisions, and ultimately live a more fulfilling and adventurous life.

\*\*\* Becki Saltzman is a curiosity seeker, assumption buster, and idea generator. She holds a master’s degree in behavioral science from Washington University in Saint Louis and has spent the last two decades studying curiosity and the role it plays in adventure and insights, problem solving, sales, and ideal lifestyle design. She loves great travel adventures, crowded dance floors, and brown drinks.

*How to Be Interesting* Jessica Hagy, 2013-03-19 You want to leave a mark, not a blemish. Be a hero, not a spectator. You want to be interesting. (Who doesn’t?) But sometimes it takes a nudge, a wake-up call, an intervention!—and a little help. This is where Jessica Hagy comes in. A writer and illustrator of great economy, charm, and insight, she’s created *How to Be Interesting*, a uniquely inspirational how-to that combines fresh and pithy lessons with deceptively simple diagrams and charts. Ms. Hagy started on Forbes.com, where she’s a weekly blogger, by creating a “How to Be Interesting” post that went viral, attracting 1.4 million viewers so far, with tens of thousands of them liking, linking, and tweeting the article. Now she’s deeply explored the ideas that resonated with so many readers to create this small and quirky book with a large and universal message. It’s a book about exploring: Talk to strangers. About taking chances: Expose yourself to ridicule, to risk, to wild ideas. About being childlike, not childish: Remember how amazing the world was before you learned to be cynical. About being open: Never take in the welcome mat. About breaking routine: Take daily vacations . . . if only for a few minutes. About taking ownership: Whatever you’re doing, enjoy it, embrace it, master it as well as you can. And about growing a pair: If you’re not courageous, you’re going to be hanging around the water cooler, talking about the guy that actually is.

*Directing* Michael Rabiger, 2013-04-02 Directing: Film Techniques and Aesthetics is a comprehensive manual that teaches the essentials of filmmaking from the perspective of the director. Ideal for film production and directing classes, as well as for aspiring and current directors, Directing

covers all phases of preproduction and production, from idea development to final cut. Thoroughly covering the basics, Directing guides the reader to professional standards of expression and control, and goes to the heart of what makes a director. The book outlines a great deal of practical work to meet this goal, with projects, exercises. The third edition emphasizes the connection between knowing and doing, with every principle realizable through projects and exercises. Much has been enhanced and expanded, notably: aspects of dramaturgy; beats and dramatic units; pitching stories and selling one's work; the role of the entrepreneurial producer; and the dangers of embedded moral values. Checklists are loaded with practical recommendations for action, and outcomes assessment tables help the reader honestly gauge his or her progress. Entirely new chapters present: preproduction procedures; production design; script breakdown; procedures and etiquette on the set; shooting location sound; continuity; and working with a composer. The entire book is revised to capitalize on the advantages offered by the revolutionary shift to digital filmmaking.

Portraits in Rhythm: Complete Study Guide Anthony J. Cirone,1999-10-25 The Portraits in Rhythm Study Guide contains a detailed analysis of the fifty snare drum etudes from Portraits in Rhythm. The observations and interpretations represent many years of performing and teaching. This comprehensive study guide gives you the author's insight on how to maximize the exercises, and it inspires skills which will carry over to other compositions and performances.

*Secret Fighting Arts of the World* John F. Gilbey,2011-12-06 Here is a book crammed full of secret fighting techniques never before divulged in print: the Oriental delayed death touch, the destruction wrought on by the fingertips of an obscure Mexican; the shout of doom; the method so terrible it is practiced only in Russian torture chambers, the niceties of Thuggee strangulation; and many more vicious fighting tricks. Suppressed for generations! Twenty of the world's most secretly guarded fighting techniques vividly described in one volume. The average reader will find this book amazing--almost unbelievable. But many thousands of rugged young men currently practicing and writing about Oriental martial arts in the United States will find it invaluable. They know that such techniques exist, but have never before had the opportunity to learn them. Even those who scoff at such amazing arts should read this book with care.

**ArcGIS 9** ESRI Press,2004 This book is an introduction to ESRI ArcIMS, a scalable, extendable, standards-based software application for distributing maps and geographic information system (GIS) data on the Internet. The design of ArcIMS makes it easy to create and deploy GIS Web sites for any Web browser. Using this same design, Getting Started with ArcIMS offers tips for beginners and advanced users alike. It provides an overview of ArcIMS and its installation and configuration, as well as instructions for building highly customized, functionally rich GIS Internet applications.
