

Golf Stats

Fajali Books

The Golf Stats Log Book Chris McMullen, 2008-08
The Golf Stats Log Book is an end-of-round journal designed for recording detailed statistics for 40 rounds of golf. These comprehensive, detailed statistics are organized by categories to help you assess what areas of your game you need to work on. In addition to standard stats like fairways hit, greens in regulation, and putts per GIR, many other stats give you a breakdown to help you evaluate your ball striking consistency and accuracy for different types of clubs, which types of putts you are sinking and missing, whether 3-putts are a result of poor lags or poor short putting, how you handle birdie putts compared to par putts, which areas of your short game are strongest and weakest, where you are losing strokes to penalties, and how you can improve your mental toughness to shave strokes off your score. Average your statistics after every 10 rounds and compare your 10-round stats to see how your game changes over time.

Golf Stats Log Book The Waymaker
Journal, 2019-08-15 Perfect log book for every golfer to record all details of every round of play and keep track of performance. Product Details: Information page. Index Page to reference log. Thick white acid free paper to reduce the bleed through of ink. 6x9 with enough writing space. Glossy paperback. Perfect gift for golfers. Available in other cover options. For more everyday journal, kindly check out our amazon author page The Waymaker Journal.

Golf by the Numbers Roland Minton, 2012-09 How do the world's greatest golfers improve their game? Practice, sure, but Roland Minton says mathematics

and statistics are also key to their success. Golf by the Numbers analyzes the mathematical strategies behind the sport, giving fans a behind-the-scenes look at how numbers drive the game. Computers, GPS trackers, swing simulators, and high-speed cameras have introduced new and exciting ways of seeing and understanding the complicated and endlessly fascinating game of golf. Players like Phil Mickelson are so good because they review the results of every swing they take. Minton's comprehensive analysis of statistics taken from the PGA Tour's ShotLink system walks readers through the mountains of data that pros use to inform and refine their play. The result is an insider's perspective of how the world's greatest golfers apply mathematics to the sport. Minton discusses randomness in golf (especially how much luck is involved in putting) as well as aggressive and cautious strategies both on and off the greens, and he explains, by the numbers, just how Tiger Woods was so dominant from 2004 to 2009. Here is a book that tells some truly engaging stories of modern golf, featuring famous players and memorable tournaments, all through the lens of elementary probability theory. Minton's informal style and clear and direct explanations make even the most detailed discussions accessible to all curious-minded golfers. His mathematical morsels are not only enjoyable to read—they may even help you improve your game.

The Golf Stats Scorecard Book Chris

McMullen, 2008-09-04 These scorecards are designed for recording detailed statistics for each round of golf to help you assess your game and identify areas needing improvement. Bring the scorebook with you or just cut out individual scorecards. This makes a great companion to The Golf Stats Log Book.

UGPM Golf Stats Javier Martin-montalvo, 2016-01-28 Statistics are a very important job of any professional or amateur player who has decided to get serious about improving its golf. The aim of statistics is to provide information to the player on his level in the different aspects that make up the game, help him to develop a better understanding of his abilities that he can use in his rounds (in the definition of the strategy of each hole, for preferred shoots searching, situations to avoid, ...) to structure training workouts efficiently, etc. In summary, improve his level. UGPM Statistics Books are designed to ease the registration and calculation of your golf rounds stats by providing a series of input sheets designed specifically for this purpose. The main goal of our statistical system is to provide us with sufficient information on the rounds of our players and at the same time keeping it simple and quickly to fill in. Our stats system include: Score, Fairways in Regulation, Greens in Regulation, Up&Downs, Sand Savings, Putts, Penalties and Distance to Hole in the Shoot to Green and First Putt. A detailed explanation of this metrics and how to calculate them are

included within this book. UGPM Statistics Books have been designed by UGPM, the first college golf programme of Continental Europe and one of the very few of its kind outside the United States. Our stats books design benefits from our broad experience in working with college golfers. In addition, developing a discipline of collecting and storing information on your rounds can be helpful not only for yourself but also for others interested in your golf, such as coaches, scouters, etc. To get the most of the information from your rounds we recommend that you process it in a statistical analysis tool to see how your metrics evolve, compare them against other players, circuit averages, etc. and obtain conclusions. There are many analysis tools available on the internet, even for free. In UGPM use a tool that we designed using Microsoft Excel (c) fairly complete and easy to use. If you want to use our platform to analyse and improve your game you can download it from our website: www.ugpmalaga.com
