Lucifer Book One Mike Carey,2013-06-04 Cast out of Heaven, thrown down to rule in Hell, Lucifer Morningstar has resigned his post and abandoned his kingdom for the mortal city of Los Angles. Emerging from the pages of writer Neil Gaiman's award-winning series The Sandman, the former Lord of Hell is now enjoying a quiet retirement as the propretor of Lux, L.A.'s most elite piano bar. But now an assignment from the Creator Himself is going to change all that. If Lucifer agrees to do Heaven's dirty work, he can name his own price--but both the task and reward are more than they seem. Thrown into a position of great threat and ultimate opportunity, Lucifer knows that threading a path through this maze will require the harshest of sacrifices.

IUTAM Symposium on Surface Effects in the Mechanics of Nanomaterials and Heterostructures Alan Cocks, Jianxiang Wang, 2012-09-26 This volume constitutes the proceedings of the IUTAM Symposium on Surface Effects in the Mechanics of Nanomaterials and Heterostructures, held in Beijing, 8-12 August, 2010. The symposium brought together the most active scientists working in this area from the fields of solid mechanics, composites, physics, and materials science and summarized the state-of-the-art research results with a view to advancing the frontiers of mechanics and materials physics. Nanomaterials and heterostructures have a large fraction of their atoms at surfaces and interfaces. These atoms see a different environment to those in the interior and can have a substantial effect on the overall mechanical and physical behaviour of a material. The last decade has witnessed a growing interest in the study of surfaces and how the surface behaviour couples with that of the bulk to determine the overall system response. The papers in this proceedings cover: extension of continuum mechanics and thermodynamics to the nano-scale; multiscale simulations; surface effects in monolithic nano-scale elements and nanostructures; mechanical and physical properties of nanomaterials and heterostructures; self-assembly, etc. The surface stress effect is inherently a multidisciplinary and fertile field; the Symposium truly reflects these features. This IUTAM Symposium was also dedicated to Professor Bhushan L Karihaloo of Cardiff University on his impending retirement, in recognition of his contributions to the fields of solid mechanics and nanomechanics, and to IUTAM activities in general.

Electrochemical Engineering Across Scales Richard C. Alkire, Philip N. Bartlett, Jacek Lipkowski, 2015-03-20 In Volume XV in the series Advances in Electrochemical Science and Engineering various leading experts from the field of electrochemical engineering share their insights into how different experimental and computational methods are used in transferring molecular-scale discoveries into processes and products. Throughout, the focus is on the engineering problem and method of solution, rather than on the specific application, such that scientists from different backgrounds will benefit from the flow of ideas between the various subdisciplines. A must-read for anyone developing engineering tools for the next-generation design and control of electrochemical process technologies, including chemical, mechanical and electrical engineers, as well as chemists, physicists, biochemists and materials scientists.
