Social Accountability in Communication Richard Buttny,1993-12-07 Much of our talk revolves around accounting for our own and other people's actions. We praise one person and blame another, justify our own actions, speculate on motives, tell and retell problematic events. This volume draws upon speech communication, sociology and social psychology to offer an original approach to such accounts. Richard Buttny examines social accountability within communication contexts that range from a therapy session to welfare and broadcast news interviews, from everyday conversation to discussions in a Zen monastery. Throughout his wide-ranging analysis of accounts talk, he integrates conversation analytic methods with social constructionism.

Strengthening Forensic Science in the United States National Research Council,Division on Engineering and Physical Sciences,Committee on Applied and Theoretical Statistics,Policy and Global Affairs,Committee on Science, Technology, and Law,Committee on Identifying the Needs of the Forensic Sciences Community,2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Adaptive Mentalization-Based Integrative Treatment Dickon Bevington,Peter Fuggle,Liz Cracknell,Peter Fonagy,2017-08-14 Socially excluded youth with mental health problems and co-occurring difficulties (e.g. conduct disorder, family breakdown, homelessness, substance use, exploitation, educational failure) attract the involvement of multiple agencies. Poorly coordinated interventions often multiply in the face of such problems, so that a young person or family is approached by multiple workers from different agencies working towards different goals and using different treatment models; these are often overwhelming and may actually be experienced as aversive by the young person or their family. Failure to provide effective help is costly throughout life This is the first book to describe Adaptive Mentalization-Based Integrative Treatment (AMBIT). This is an approach to working with people - particularly young people and young adults - whose lives are often chaotic and risky, and whose problems are not limited to one domain. In addition to mental health problems, they may have problems with care arrangements, education or employment, exploitation, substance misuse, offending behaviours, and gang affiliations; if these problems are all occurring simultaneously, any progress in one area is easily undermined by harms still occurring in another. AMBIT has been designed by and for community teams from Mental Health, Social Care, Youth work, or that may be purposefully multi-disciplinary/multi-agency. It emphasises the need to strengthen integration in the complex networks that tend to gather around such clients, minimising the likelihood of an experience of care that is aversive. AMBIT uses well evidenced 'Mentalization-based' approaches, that are at their core integrative - drawing on recent advances in neuroscience, psycho-analytic, social cognitive, and systemic treatment models.

The Craft of Justice Roy B. Flemming,Peter F. Nardulli,James Eisenstein,2016-11-11 The final volume of a trilogy (begun with *The Contours of Justice* and *The Tenor of Justice*) based on a large-scale, complex study of nine criminal courts. Explains how criminal court policies reflect tensions or harmony among judges on the bench, and identifies and illustrates patterns of dominance and conflict within courthouse communities.

Pricing Beauty Ashley Mears,2011-09-14 Sociologist Ashley Mears takes us behind the brightly lit runways and glossy advertisements of the fashion industry in this insider's study of the world of modeling. Mears, who worked as a model in New York and London, draws on observations as well as extensive interviews with male and female models, agents, clients, photographers, stylists, and others, to explore the economics and politics—and the arbitrariness— behind the business of glamour. Exploring a largely hidden arena of cultural production, she shows how the right look is discovered, developed, and packaged to become a prized commodity.

She examines how models sell themselves, how agents promote them, and how clients decide to hire them. An original contribution to the sociology of work in the new cultural economy, *Pricing Beauty* offers rich, accessible analysis of the invisible ways in which gender, race, and class shape worth in the marketplace.

Money and Power William D. Cohan, 2011-04-12 The bestselling author of the acclaimed *House of Cards* and *The Last Tycoons* turns his spotlight on to Goldman Sachs and the controversy behind its success. From the outside, Goldman Sachs is a perfect company. The Goldman PR machine loudly declares it to be smarter, more ethical, and more profitable than all of its competitors. Behind closed doors, however, the firm constantly straddles the line between conflict of interest and legitimate deal making, wields significant influence over all levels of government, and upholds a culture of power struggles and toxic paranoia. And its clever bet against the mortgage market in 2007—unknown to its clients—may have made the financial ruin of the Great Recession worse. *Money and Power* reveals the internal schemes that have guided the bank from its founding through its remarkable windfall during the 2008 financial crisis. Through extensive research and interviews with the inside players, including current CEO Lloyd Blankfein, William Cohan constructs a nuanced, timely portrait of Goldman Sachs, the company that was too big—and too ruthless—to fail.

PoC or GTFO, Volume 3 Manul Laphroaig, 2021-01-05 Volume 3 of the PoC || GTFO collection--read as Proof of Concept or Get the Fuck Out--continues the series of wildly popular collections of this hacker journal.

Contributions range from humorous poems to deeply technical essays bound in the form of a bible. The International Journal of Proof-of-Concept or Get The Fuck Out is a celebrated collection of short essays on computer security, reverse engineering and retrocomputing topics by many of the world's most famous hackers. This third volume contains all articles from releases 14 to 18 in the form of an actual, bound bible. Topics include how to dump the ROM from one of the most secure Sega Genesis games ever created; how to create a PDF that is also a Git repository; how to extract the Game Boy Advance BIOS ROM; how to sniff Bluetooth Low Energy communications with the BCC Micro:Bit; how to conceal ZIP Files in NES Cartridges; how to remotely exploit a TetriNET Server; and more. The journal exists to remind us of what a clever engineer can build from a box of parts and a bit of free time. Not to showcase what others have done, but to explain how they did it so that readers can do these and other clever things themselves.

Borders in Service Kiran Mirchandani,Winifred Poster,2016-01-01 Borders in Service traces the intersection of service labour and national identity across global call centres in seven countries: El Salvador, Guatemala, Guyana, Mauritius, Morocco, the Philippines, and the US-Mexico border. While most studies on offshore call centres have focused on India this collection explores the experiences of call center workers in many of the newly emerging hubs of transnational service work. In this collection, Kiran Mirchandani and Winifred Poster have gathered a wide range of contributors to explore the dynamics within global call centres. Such dynamics include: language, speech, accent issues, expressions of consumer sentiment, physical space, and organizational, human resource, and labour policies. By grounding the theoretical debates on nationhood and labour in the realities of daily life in global call centres, Mirchandani and Poster have created a timely, accessible and revealing collection that will change what we know about offshored customer service work.
