The Non-designer's Design Book Robin

Williams, 2015 A lot has happened in the world of digital design since the first edition of this title was published, but one thing remains true: There is an ever-growing number of people attempting to design everything from newsletters to advertisements with no formal training. This book is the one place they can turn to find quick, non-intimidating, excellent design help from trusted design instructor Robin Williams. This revised and expanded classic includes a new chapter on designing with type, more quizzes and exercises, updated projects, and new visual and typographic examples that give the book a fresh, modern look. In *The Non-Designer's Design Book*, 4th Edition, Robin turns her attention to the basic principles that govern good design. Perfect for beginners, Robin boils great design into four easy-to-master principles: contrast, repetition, alignment, and proximity (C.R.A.P.!). Readers who follow her clearly explained concepts will produce more sophisticated and professional work immediately. Humor-infused, jargon-free prose interspersed with design exercises, quizzes, and illustrations make learning a snap—which is just what audiences have come to expect from this bestselling author.

AlphaBrain Stephen Duneier, 2019-02-11 Smarter decision-making based on cognitive science

AlphaBrain is the investor's guide to achieving

more, doing better, and reaching higher. At its core, the magnitude of your success is based on the quality of your decisions. The problem is that human beings are poor decision-makers; we tend to approach problems after they arise instead of planning for them in advance. We put too much weight on instinct, belief, and gut feeling. We make the same mistakes over and over again—so reliably, in fact, that cognitive science can accurately predict exactly which mistakes we'll make and when. This book offers a way to understand and plan for the human mind's usual tendencies to help you make smarter investment decisions. Using a framework based on cognitive research, you'll learn how to approach decisions objectively, systematically, and constantly review your process; you'll take action based on evidence instead of intuition, and get ahead of potential problems before they get the best of you. With so much riding on the correctness of your choices, natural tendency can be a dangerous thing. This book shows you how to remove the bias and emotion to start making choices backed by hard evidence and objective data and lower your stress. Shift your processes from reactive to proactive Base decisions on reality over belief Eliminate cognitive bias and reduce common mistakes Make better decisions with a systematic, objective approach Why do we begin managing risk only once it becomes apparent? Why do we react to the market instead of making the big decisions before emotion takes over? Investing has always been a largely reactive field, but those who dominate it approach decision-making less like a human and more like a

machine. AlphaBrain shows you how to get real about investing, with cognitive techniques that lead to smarter, evidence-based decisions.

Bayesian Data Analysis, Third Edition Andrew Gelman, John B. Carlin, Hal S. Stern, David B. Dunson, Aki Vehtari, Donald B. Rubin, 2013-11-01 Now in its third edition, this classic book is widely considered the leading text on Bayesian methods, lauded for its accessible, practical approach to analyzing data and solving research problems. *Bayesian Data Analysis, Third Edition* continues to take an applied approach to analysis using up-to-date Bayesian methods. The authors—all leaders in the statistics community—introduce basic concepts from a data-analytic perspective before presenting advanced methods. Throughout the text, numerous worked examples drawn from real applications and research emphasize the use of Bayesian inference in practice. New to the Third Edition Four new chapters on nonparametric modeling Coverage of weakly informative priors and boundary-avoiding priors Updated discussion of cross-validation and predictive information criteria Improved convergence monitoring and effective sample size calculations for iterative simulation Presentations of Hamiltonian Monte Carlo, variational Bayes, and expectation propagation New and revised software code The book can be used in three different ways. For undergraduate students, it introduces Bayesian inference starting from first principles. For graduate students, the text presents effective current approaches to Bayesian modeling and computation in statistics and related fields. For researchers, it provides an assortment

of Bayesian methods in applied statistics. Additional materials, including data sets used in the examples, solutions to selected exercises, and software instructions, are available on the book's web page.

Legacy of Ash Matthew Ward, 2019-11-05 Legacy of Ash is an unmissable fantasy debut--an epic tale of intrigue and revolution, soldiers and assassins, ancient magic and the eternal clash of empires. A shadow has fallen over the Tressian Republic. Ruling families -- once protectors of justice and democracy -- now plot against one another with sharp words and sharper knives. Blinded by ambition, they remain heedless of the threat posed by the invading armies of the Hadari Empire. Yet as Tressia falls, heroes rise. Viktor Akadra is the Republic's champion. A warrior without equal, he hides a secret that would see him burned as a heretic. Josiri Trelanis Viktor's sworn enemy. A political prisoner, he dreams of reigniting his mother's failed rebellion. And yet Calenne Trelan, Josiri's sister, seeks only to break free of their tarnished legacy; to escape the expectation and prejudice that haunts the family name. As war spreads across the Republic, these three must set aside their differences in order to save their home. Yet decades of bad blood are not easily set aside. And victory -- if it comes at all -- will demand a darker price than any of them could have imagined.

Global Trends 2030 National Intelligence Council, 2018-02-07 This important report, Global Trends 2030-Alternative Worlds, released in 2012 by the U.S. National Intelligence Council,

describes megatrends and potential game changers for the next decades. Among the megatrends, it analyzes: - increased individual empowerment - the diffusion of power among states and the ascent of a networked multi-polar world - a world's population growing to 8.3 billion people, of which sixty percent will live in urbanized areas, and surging cross-border migration - expanding demand for food, water, and energy It furthermore describes potential game changers, including: - a global economy that could thrive or collapse - increased global insecurity due to regional instability in the Middle East and South Asia - new technologies that could solve the problems caused by the megatrends - the possibility, but by no means the certainty, that the U.S. with new partners will reinvent the international system Students of trends, forward-looking entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades will find this essential reading.

March: Book One John Lewis, Andrew Aydin, 2013-08-12 Congressman John Lewis (GA-5) is an American icon, one of the key figures of the civil rights movement. His commitment to justice and nonviolence has taken him from an Alabama sharecropper's farm to the halls of Congress, from a segregated schoolroom to the 1963 March on Washington, and from receiving beatings from state

troopers to receiving the Medal of Freedom from the first African-American president. Now, to share his remarkable story with new generations, Lewis presents *March*, a graphic novel trilogy, in collaboration with co-writer Andrew Aydin and New York Times best-selling artist Nate Powell (winner of the Eisner Award and LA Times Book Prize finalist for *Swallow Me Whole*). *March* is a vivid first-hand account of John Lewis' lifelong struggle for civil and human rights, meditating in the modern age on the distance traveled since the days of Jim Crow and segregation. Rooted in Lewis' personal story, it also reflects on the highs and lows of the broader civil rights movement. Book One spans John Lewis' youth in rural Alabama, his life-changing meeting with Martin Luther King, Jr., the birth of the Nashville Student Movement, and their battle to tear down segregation through nonviolent lunch counter sit-ins, building to a stunning climax on the steps of City Hall. Many years ago, John Lewis and other student activists drew inspiration from the 1958 comic book *Martin Luther King and the Montgomery Story*. Now, his own comics bring those days to life for a new audience, testifying to a movement whose echoes will be heard for generations.

Piecing Me Together Renée Watson, 2018-02-08 2018 Newbery Honor Book and Coretta Scott King Author Award Winner 'Important and deeply moving' JOHN GREEN 'Timely and timeless' JACQUELINE WOODSON Jade is a girl striving for success in a world that seems like it's trying to break her. She knows she needs to take every opportunity that comes her way. And she has: every day Jade rides

the bus away from her friends to a private school where she feels like an outsider, but where she has plenty of opportunities. But some opportunities Jade could do without, like the mentor programme for 'at-risk' girls. Just because her mentor is black doesn't mean she understands where Jade is coming from. Why is Jade always seen as someone to fix? But with a college scholarship promised at the end of it, how can Jade say no? Jade feels like her life is made up of hundreds of conflicting pieces. Will it ever fit together? Will she ever find her place in the world? More than anything, Jade just wants the opportunity to be real, to make a difference. The Mouse and the Motorcycle Beverly

Cleary, 2009-10-06 In this imaginative adventure from Newbery Medal-winning author Beverly Cleary, a young mouse named Ralph is thrown into a world of excitement when a boy and his shiny toy motorcycle check in to the Mountain View Inn. When the ever-curious Ralph spots Keith's red toy

motorcycle, he vows to ride it. So when Keith leaves the bike unattended in his room one day, Ralph makes his move. But with all this freedom (and speed!) come a lot of obstacles. Whether dodging a rowdy terrier or keeping his nosy cousins away from his new wheels, Ralph has a lot going on! And with a pal like Keith always looking out for him, there's nothing this little mouse can't handle. This timeless classic now features a foreword written by New York Times bestselling author Kate DiCamillo, as well as an exclusive interview with Beverly Cleary herself. *The Mouse and the Motorcycle* is perfect for independent reading or for shared reading at home or in a classroom. This fun story is the first of a trilogy, along with *Runaway Ralph* and *Ralph S. Mouse*, all inspired by the author's hope to create appealing books for boys and girls—and by the sight of her son playing with toy cars.

Mapping the Bones Jane Yolen, 2019-01-15 Jane Yolen, the bestselling and award-winning author of *The Devil's Arithmetic*, returns to World War II and the Holocaust with this timely and necessary novel. It's 1942 in Poland, and the world is coming to pieces. At least that's how it seems to Chaim and Gittel, twins whose lives feel like a fairy tale torn apart, with evil witches, forbidden forests, and dangerous ovens looming on the horizon. But in all darkness there is light, and the twins find it through Chaim's poetry and the love they have for each other. Like the bright flame of a Yahrzeit candle, his words become a beacon of memory so that the children and grandchildren of survivors will never forget the

atrocities that happened during the Holocaust. Filled with brutality and despair, this is also a story of poetry and strength, in which a brother and sister lose everything but each other. Nearly thirty years after the publication of her award-winning and bestselling *The Devil's Arithmetic* and *Briar Rose*, Yolen once again returns to World War II and captivates her readers with the authenticity and power of her words. Perfect for fans of Markus Zusak's *The Book Thief* and Ruta Sepetys's *Salt to the Sea*.

The Seduction of the Crimson Rose Lauren Willig, 2008 A continuation of the series that began with *The Masque of the Black Tulip* and *The Deception of the Emerald Ring* finds Mary accepting a secret assignment from spy Lord Vaughn to infiltrate the Black Tulip's operation in order to prevent an invasion of England. 40,000 first printing.

Farewell to Manzanar Jeanne Wakatsuki Houston, James D. Houston, 2002 A true story of Japanese American experience during and after the World War internment.

A Human Error Approach to Aviation Accident Analysis Professor Scott A Shappell, Professor Douglas A Wiegmann, 2012-10-01 This comprehensive book provides the knowledge and tools required to conduct a human error analysis of accidents. Serving as an excellent reference guide for many safety professionals and investigators already in the field.

The Last Real Season Mike Shropshire, 2008-05-14 A rollicking and ribald first-person account of the 1975 Major League Baseball season—the last

year before free agency took over and changed the national pastime forever—for better or for worse! There are baseball books and there are baseball books. But for the baseball cognoscenti, there are just a few must-have classics: Ball Four by Jim Bouton. The Long Season by Jim Brosnan. Willie's Time by Charles Einstein. And Seasons In Hell by Mike Shropshire, which was a hilarious first-person account of Mike's travails serving as a daily beat writer covering the hapless 1972 Texas Rangers. Now, in The Last Real Season, Shropshire captures the essence of a different time and different place in baseball, when the average salary for major leaguers was only \$27,600...when the ballplayers' drug of choice was alcohol, not steroids...when major leaguers sported tight doubleknit uniforms over their long-hair and Afros...and on July 28th, 1975, the day that famed Detroit resident Jimmy Hoffa went missing, the Detroit Tigers started a losing streak of 19 games in a row. On the day that the Tigers blew a 4-run lead in the bottom of the ninth, Shropshire recalls: I drank three bottles of Stroh's beer in less than a minute and wrote that 'Jimmy Hoffa will show up in the left field stands with Amelia Earhart as his date before the Tigers will win another game.' And so it goes. Filled with just the kind of wonderful baseball stories that real fans crave, this is the funniest baseball book of the year.

Global Trends 2030 National Intelligence Council (U.S.), 2012 This report is intended to stimulate thinking about the rapid and vast geopolitical changes characterizing the world today and

possible global trajectories over the next 15 years. As with the NIC's previous Global Trends reports, we do not seek to predict the future, which would be an impossible feat, but instead provide a framework for thinking about possible futures and their implications. In-depth research, detailed modeling and a variety of analytical tools drawn from public, private and academic sources were employed in the production of Global Trends 2030. NIC leadership engaged with experts in nearly 20 countries, from think tanks, banks, government offices and business groups, to solicit reviews of the report.

The Stone Knife (The Songs of the Drowned, Book 1) Anna Stephens, 2020-11-26 A fantasy epic of freedom and empire, gods and monsters, love, loyalty, honour, and betrayal, from the acclaimed author of GODBLIND.

Murder Under Her Skin Stephen Spotswood, 2021-12-07 A New York Times Book Review Editor's Choice • Rex Stout meets Agatha Christie with a fresh twist in the new Pentecost and Parker Mystery, a delightfully hardboiled high-wire act starring two daring women sleuths dead set on justice as they set out to solve a murder at a traveling circus "A delight.... It's a pleasure to watch [Pentecost and Parker] sifting through red herrings and peeling secrets back like layers of an onion." The New York Times Book Review Someone's put a blade in the back of the Amazing Tattooed Woman, and Willowjean "Will" Parker's former knife-throwing mentor has been stitched up for the crime. To uncover the truth, Will and her boss, world-famous detective Lillian Pentecost,

travel to the circus, where they find a snake pit of old grudges, small-town crime, and secrets worth killing for. Will called Hart & Halloway's Traveling Circus and Sideshow home for five years, and Ruby Donner, the circus's tattooed ingenue, was her friend. To make matters worse, the prime suspect is Valentin Kalishenko, the man who taught Will everything she knows about putting a knife where it needs to go. To uncover the real killer and keep Kalishenko from a date with the electric chair, Will and Ms. Pentecost join the circus in sleepy Stoppard, Virginia, where the locals like their cocktails mild, the past buried, and big-city detectives not at all. The two swiftly find themselves lost in a funhouse of lies as Will begins to realize that her former circus compatriots aren't playing it straight, and that her murdered friend might have been hiding a lot of secrets beneath all that ink.
