Stories from the Rolodex Beverly Stoddart, 2020-12-20 Everyone knows Bob Woodward and Carl Bernstein of Watergate fame and the bringing down of President Nixon. Who you don't know are the equally talented journalists who worked the stories of a generation, and you read in your morning newspaper. *Stories from the Rolodex* puts a name and a face on the journalists who brought you headline stories. Every newspaper reader has read the news coming to us through wire services with credits like 'by United Press International' or 'by Associated Press.' Nameless, faceless writers. *Stories from the Rolodex* explores how good journalism is investigated and written through anecdotes of important stories reported by United Press International journalists in the 1960s, 1970s, and 1980s. The interviews in the book are men and women telling true tales of what it's like to be on a battlefield with a pencil and paper, not a gun. Tom Foty takes you to the near-total destruction by an earthquake in Mexico City, where 10,000 people died and explain how they got the story out of a devastated country. When you read Richard Gross' thoughts of the warmth of love at 77," you will hear his voice in the words. Karen Gray Houston will tell you what it was like being a young, black woman reporting on the story of Boston school desegregation. Andra Varin talks of the agony of working the third shift at the wire service. She tells the story of how the Boston Globe stole her lead. This was the fate of anonymous wire service reporters. *Stories from the Rolodex* take the reader into the world of the United Press International working journalist at a time when reporters used rotary dial telephones. They looked up phone numbers in telephone books. Contacts were kept in a metal Rolodex sitting in an office where everyone could access names, home phone numbers and addresses, and clues about habits to land a story. The Boston Bureau's Rolodex is the junction for the stories. The UPI journalists and their words reveal the history and provide anecdotes to events that took place in the world.

Los Alamos Rolodex Center for Center for Land Use Interpretation, 2015-12-29 In 2012 the Center for Land Use Interpretation acquired a set of seven rolodexes from the dispersed collection of former Los Alamos National Laboratory employee Ed Grothus, who operated a salvage company of lab cast-offs, known as The Black Hole. Now part of the Center's Radioactive Archive, the rolodexes contain thousands of business cards kept by some unknown office in the lab over the 1960s and 1970s--the peak of the arms race and its technological development. They are a physical record of everything from major military contractors to obscure high- and low-tech software widget suppliers-many of which are no longer extant, or have evolved. The selection of 150 cards may be viewed as a snapshot of synergies between the business community and America's atomic might. On the one hand, they are a direct indexical connection from the recent past to the sources of creating the most sophisticated and powerful national defense technologies in the world. On the other hand, they are obsolete information, relics of a former usefulness. As a specific printed historical record--superbly reproduced in full color--they are relevant to a potential understanding of the present; they are evocative evidence of the links that formed the secret technology of our nation.

The Man with the Gold Rolodex (Hardback) David Mirisch, 2017-04-24 The David Mirisch story is a story of a man who built bridges in Hollywood, bringing more stars together (even creating some of them) than anyone else before him. From America to China, David's honesty and attention to detail became a magnet for the hottest stars in Hollywood. What stars loved the most, however, was the trust they could place in his hands. David's legacy lies in the personal relationships he held with his clients, showing they always meant more to him than where they originated from - his gold rolodex.

The Rolodex Model: Understanding Relationship Complexity as a Precursor to the Design of Organizational Forms for Chaotic Environments ,2002 The emerging business environment is increasingly complex, characterized by hypercompetition, compound interdependence, and electronic webs This heightened complexity is triggering a slew of new organizational forms and shifts in the underlying logics of organizational forms These new organizational forms are not only more complex, but they have new kinds of complexity - increasingly hybrid and heterarchical, more flexible, and dynamically reconfigurable. The report argues that in such new conditions we need to rethink how we conceive the structural dimensions of organizational form and base them on a process model of inter-organizational relationships. This report examines relationship complexity as a structural topology that underlies organizational form It identifies three structural dimensions of relationship complexity reach, range, and reciprocity and combines them in a model that allows dynamic reconfigurability. The model is based on the primacy of perspective of practicing managers and we have termed it the Rolodex Model as it has overtones of an organizational version of a manager's card file of contacts. Using the concepts of energy and phase space from physics to enrich the Rolodex Model, the report shows how it can be used to explain existing archetypes of organizational forms, to identity new organizational forms, and to provide insights for organizational design The report then argues that further elaboration of energy concepts and relationship complexity may be necessary before we can fully respond to, and anticipate, the complex, dynamic, hypercompetitive organizational environment of today, much less that likely to exist tomorrow.
