Network Flows and Matching David S. Johnson, Catherine C. McGeoch, Interest has grown recently in the application of computational and statistical tools to problems in the analysis of algorithms. In many algorithmic domains, worst-case bounds are too pessimistic and tractable probabilistic models too unrealistic to provide meaningful predictions of practical algorithmic performance. Experimental approaches can provide knowledge where purely analytical methods fail and can provide insights to motivate and guide deeper analytical results. The DIMACS Implementation Challenge was organized to encourage experimental work in the area of network flows and matchings. Participants at sites in the U.S., Europe, and Japan undertook projects between November 1990 and August 1991 to test and evaluate algorithms for these problems. The Challenge culminated in a three-day workshop, held in October 1991 at DIMACS. This volume contains the revised and refereed versions of twenty-two of the papers presented at the workshop, along with supplemental material about the Challenge and the Workshop.

Pulsed High-Power Microwave (HPM) Tubes and Related Technology DIANE Publishing Company, Provides a survey of the progress in the field, an evaluation of the state of the art, and trends of future developments. Covers: klystrons; magnetrons; vircators, reflex-diodes; Cherenkov devices. Extensive bibliography.

Generation and Application of High Power Microwaves R.A Cairns, A.D.R. Phelps, 2020-08-18

Written at the graduate level, Generation and Application of High Power Microwaves discusses the basic physics of the generation of microwave and radiofrequency waves in the megawatt power range and the application of these ideas to a range of devices such as klystrons, gyrotrons, and free

electron lasers. The book also contains chapters covering the transmission of the power through waveguides and the problems associated with mode conversion in transmission lines. The main application area covered is the heating and current drive in tokamaks and other devices for research into controlled nuclear fusion. Other applications of high power microwave technology are not neglected, and among those discussed are multiple charged ion and soft x-ray sources, electron spin resonance spectroscopy, advanced materials processing, millimeter wave radar, and supercolliders.

Studies on Agreement João Costa, Maria Cristina Figueiredo Silva, 2006 The status of agreement is a core issue in current morphological and syntactic theory. The collection of papers in this volume focuses on important issues, such as the nature of the relation between syntax and morphology in determining agreement relations; whether and which syntactic configurations are relevant for determining agreement; the relevance of verbal agreement for the purposes of EPP; the inquiry into the existence of connections between verbal and DP-internal agreement; on the morphological and syntactic distinction of person, number and gender agreement; how and why AGREE and Spec, head relations trigger different agreement effects; and the type of relation that exists between head-movement and morphological agreement. The data collected come from a wide variety of languages and the studies presented discuss innovative and thought-provoking ideas for dealing with agreement phenomena

Algorithm Engineering Jeffrey S. Vitter, Christos D. Zaroliagis, 2003-05-15 This book constitutes the refereed proceedings of the Third International Workshop on Algorithm Engineering, WAE'99, held in London, UK in July 1999. The 24 revised full papers presented were carefully reviewed and selected from a total of 46 submissions. The papers present original research results in all aspects of algorithm engineering including implementation, experimental testing, fine-tuning of discrete algorithms,

development of repositories of software, methodological issues such as standards for empirical research on algorithms and data structures, and issues in the process of converting user requirements into efficient algorithmic solutions and implementations.

The Long Boom Peter Schwartz, Peter Leyden, Joel Hyatt, 2000 This optimistic text examines and predicts the 40-year period from 1980-2020 as the key years of a remarkable economic transformation.

Cloud Native Infrastructure Justin Garrison, Kris Nova, 2017-10-25 Cloud native infrastructure is more than servers, network, and storage in the cloud—it is as much about operational hygiene as it is about elasticity and scalability. In this book, you'll learn practices, patterns, and requirements for creating infrastructure that meets your needs, capable of managing the full life cycle of cloud native applications. Justin Garrison and Kris Nova reveal hard-earned lessons on architecting infrastructure from companies such as Google, Amazon, and Netflix. They draw inspiration from projects adopted by the Cloud Native Computing Foundation (CNCF), and provide examples of patterns seen in existing tools such as Kubernetes. With this book, you will: Understand why cloud native infrastructure is necessary to effectively run cloud native applications Use guidelines to decide when—and if—your business should adopt cloud native practices Learn patterns for deploying and managing infrastructure and applications Design tests to prove that your infrastructure works as intended, even in a variety of edge cases Learn how to secure infrastructure with policy as code

Coherent Analytic Sheaves H. Grauert, R. Remmert, 2012-12-06 ... Je mehr ich über die Prinzipien der Funktionentheorie nachdenke - und ich tue dies unablässig -, um so fester wird meine Überzeugung, dass diese auf dem Fundamente algebraischer Wahrheiten aufgebaut werden muss (WEIERSTRASS, Glaubensbekenntnis 1875, Math. Werke II, p. 235). 1. Sheaf Theory is a general tool

for handling questions which involve local solutions and global patching. La notion de faisceau s'introduit parce qu'il s'agit de passer de données 'locales' à l'étude de propriétés 'globales' [CAR], p. 622. The methods of sheaf theory are algebraic. The notion of a sheaf was first introduced in 1946 by J. LERAY in a short note *Eanneau d'homologie d'une représentation*, C.R. Acad. Sci. 222, 1366-68. Of course sheaves had occurred implicitly much earlier in mathematics. The *Monogene analytische Functionen*, which K. WEIERSTRASS glued together from *Func tionselemente durch analytische Fortsetzung*, are simply the connected components of the sheaf of germs of holomorphic functions on a RIEMANN surface*; and the *ideaux de domaines indetermines*, basic in the work of K. OKA since 1948 (cf. [OKA], p. 84, 107), are just sheaves of ideals of germs of holomorphic functions. Highly original contributions to mathematics are usually not appreciated at first. Fortunately H. CARTAN immediately realized the great importance of LERAY'S new abstract concept of a sheaf. In the polycopied notes of his *Seminaire* at the E.N.S

Commonism Nico Dockx, Pascal Gielen, 2018 Following half a century of neoliberalism, there appears to be a new ideology in the making, called 'commonism.' This book attempts to map these new ideological notions through examples and artistic practices, as well as critical reflection. How are the commons constituted in society? How do they shape the reality of our living together? What strategies and aesthetics do artistic commoners adopt? Is there an alternative and more just future imaginable through the political ideology of the commons? Commonism claims to be better aligned with the ecological and social reality of today than capitalism. Perhaps it is also closer to how social relationships actually function.

McGeoch,1999-06-29 This book constitutes the thoroughly refereed post-workshop proceedings of the International Workshop on Algorithmic Engineering and Experimentation, ALENEX'99, held in Baltimore, Maryland, USA, in January 1999. The 20 revised full papers presented were carefully selected from a total of 42 submissions during two rounds of reviewing and improvement. The papers are organized in sections on combinatorial algorithms, computational geometry, software and applications, algorithms for NP-hard problems, and data structures.

Handbags: A Love Story Monica Botkier,2017-11-14 In this sumptuous full-color compendium,

award-winning designer Monica Botkier celebrates seventy of the most coveted bags of the past seventy-five years, from Chanel, Dior, Gucci, Hermès, Yves Saint Laurent, Louis Vuitton, and other international couture houses, as well as top bag designers such as Anya Hindmarch and Nancy Gonzalez. Exquisitely crafted luxury handbags are an obsession. The look, the feel of soft leather, that new bag smell that induces a swoon—a gorgeous handbag does more than complete a look, it telegraphs taste and chic, and it inspires envy, whether it's an Hermès Birkin, a quilted Chanel Boy bag with its signature gold chain, or a Céline Mini Luggage Tote. Award-winning handbag designer Monica Botkier pays homage to these gorgeous objects of desire and the top couture houses and artists that have designed and produced them from the end of World War II to today. *Handbags: A Love Story* showcases the creations of designers such as Azzedine Alaïa, Balenciaga, Bottega Veneta, Céline, Chanel, Chloé, Christian Dior, Mark Cross, Fendi, Salvatore Ferragamo, Givenchy, Goyard, Gucci, Hermès, Anya Hindmarch, Judith Leiber, Olympia Le-Tan, Loewe, Mansur Gavriel, Stella McCartney, Alexander McQueen, Miu Miu, Moschino, Mulberry, Prada, Yves Saint Laurent, Valentino, Roger Vivier, Louis Vuitton, and more. This magnificent, eye-catching anthology tells the story of seventy bags in 200 stunning photographs and vintage and contemporary advertisements and illustrations, as well as quotes, anecdotes, and interviews with designers, stylists, and editors. Each entry offers a concise yet in-depth look at a specific bag and its history—from a celebrity muse, such as Jane Birkin, to collaborations such as the graffiti-splattered bags Marc Jacobs and Stephen Sprouse created for Louis Vuitton. An informative, entertaining exploration of how It Bags have influenced fashion, culture, and feminine identity, *Handbags: A Love Story* touches on a wide-range of subjects, such as how a bag is constructed and handbags on the silver screen. With an elegant full-color silkscreened cloth case and a thick acetate four-color jacket; two long, wide satin markers, and two-

color endpapers, this gorgeous tribute is an essential accessory for handbag fanatics, fashion lovers, and pop culture enthusiasts.

Man in Adaptation William Petersen, Yehudi A. Cohen, 2022-04-13 Underlying the anthropological study of man is the principle that there is a reality to which man must adapt if he is to survive. Reproduce, and to perpetuate himself. Populations must adapt to the realities of the physical world and maintain a proper fit between their biological makeup and the pressures of the various niches of the world in which they seek to live. Social groups where culture is found must develop adaptive mechanisms in the organization of their social relations if there is to be order, regularity, and predictability in patterns of cooperation and competition and if they are to survive as viable units. This three-volume set of readings presents an introduction to anthropology that is unified and made systematic by focus on adaptations that have accompanied the evolution of man, from non-human primate to inhabitant of vast urban areas in modern industrial societies. *Man in Adaptation: The Cultural Present* introduces Cultural Anthropology also from the point of view of adaptation and provides coherence for the study of human societies from man's social beginnings to the present. The book deals sequentially with the more and more complex technologies and political and social structures that have enabled different societies to make effective use of the energy potentials in their habitats. This and the two companion volumes are the first attempt to unify the disparate subject matter of anthropology within a single and powerful explanatory framework. They incorporate the work of the most renowned anthropological experts on man, and they illuminate clearly one of the most important concepts around which one can build an investigation of the nature and scope of anthropology itself. For these reasons, they are recognized as indispensable reading for every professional anthropologist and as perhaps the best available means of introducing new students to

the field.

UNCITRAL Model Law on Electronic Commerce, with Guide to Enactment, 1996 United Nations Commission on International Trade Law, 1999 Adopted by UNCITRAL on 12 June 1996, the Model Law is intended to facilitate the use of modern means of communications and storage of information. It is based on the establishment of a functional equivalent in electronic media for paper-based concepts such as writing, signature and original. By providing standards by which the legal value of electronic messages can be assessed, the Model Law should play a significant role in enhancing the use of paperless communication. The Model Law also contains rules for electronic commerce in specific areas, such as carriage of goods.

Art of Death Nigel Llewellyn, 2013-06-01 How did our ancestors die? Whereas in our own day the subject of death is usually avoided, in pre-Industrial England the rituals and processes of death were present and immediate. People not only surrounded themselves with memento mori, they also sought to keep alive memories of those who had gone before. This continual confrontation with death was enhanced by a rich culture of visual artifacts. In *The Art of Death*, Nigel Llewellyn explores the meanings behind an astonishing range of these artifacts, and describes the attitudes and practices which lay behind their production and use. Illustrated and explained in this book are an array of little-known objects and images such as death's head spoons, jewels and swords, mourning-rings and fans, wax effigies, church monuments, Dance of Death prints, funeral invitations and ephemera, as well as works by well-known artists, including Holbein, Hogarth and Blake.
