The Appointment Graham Easton,2016-09-01 Despite the modern trend towards empowering patients and giving them more choice, the nuts and bolts of medical practice largely remain a mystery - a closed box. In fact, the more health information is available on the internet, the more patients can feel swamped and confused. The Appointment offers an intimate and honest account of how a typical GP tries to make sense of a patient's health problems and manage them within the constraints of their health system and the short ten minute appointment. We have always been fascinated by our own health but in recent years, especially for older people, seeing the GP has become a regular activity. In the past decade the average number of times a patient visits his or her GP has almost doubled. Despite this increasing demand, getting to see a GP is not always easy so those intimate ten minutes with the doctor are extremely precious, and there's more than ever to cram in. Taking the reader through a typical morning surgery, The Appointment shines a light onto what is really going on in those central ten minutes and lets the reader, for the first time, get inside the mind of the person sitting in front of them - the professional they rely on to look after their health. Experienced GP Dr Graham Easton shows how GPs really think, lays bare their professional strengths and weaknesses, and exposes what really influences their decisions about their patients' health.

Bluesman Andre Dubus III,2001-02-13 With House of Sand and Fog, his National Book Award-nominated novel, Andre Dubus III demonstrated his mastery of the complexities of character and desire. In this earlier novel he captures a roiling time in American history and the coming-of-age of a boy who must decide between desire, ambition, and duty. In the summer of 1967, Leo Suther has one more year of high school to finish and a lot more to learn. He's in love with the beautiful Allie Donovan who introduces him to her father, Chick — a construction foreman and avowed Communist. Soon Leo finds himself in the midst of a consuming love affair and an intense testing of his political values. Chick's passionate views challenge Leo's perspective on the escalating Vietnam conflict and on just where he stands in relation to the new people in his life. Throughout his — and the nation's — unforgettable summer of love, Leo is learning the language of the blues, which seem to speak to the mourning he feels for his dead mother, his occasionally distant father, and the youth which is fast giving way to manhood.

Prevention and Management of Venous Thromboembolism Vish Bhattacharya,Gerard Stansby,Patrick Kesteven,2015-05-11 Venous thrombosis occurs in all healthcare settings and all specialties in nursing and medicine. It causes more deaths every year than MRSA or road accidents and is not just a topic for experts and specialists. In spite of this, there is a lack of easily accessible information for non-experts on venous thromboembolism (VTE), and consequently the condition is often treated poorly and preventive measures are often used inconsistently. Prevention and Management of Venous Thromboembolism takes the first step towards rectifying this dearth of information. It bring together a unique group of vascular surgeons, haematologists and other experts who help shape the management of VTE and is aimed at both the multi-disciplinary teams involved in the day-to-day care of patients with VTE, and allied health professionals and healthcare commissioners. The book's approach is broad and comprehensive and there are separate sections dealing with prevention, diagnosis and treatment. This is an expert-level book accessible to non-experts. A Textbook of Family Medicine Ian R. McWhinney, 1997 Since the previous edition of Ian McWhinney's text was published in 1989, family medicine has assumed an increasingly important role in the modern health care system. The growth of managed care in the United States and of similar movements in other countries has made it more important than ever to define and conceptualize the discipline and to synthesize its body of knowledge and skills. The author brings to this task a lifetime's experience in family practice and academic family medicine. The first edition was widely acclaimed for its originality, depth of analysis, and elegant style. The book has now been extensively revised, while retaining its original structure. The first ten chapters are devoted, as before, to a conceptualization and description of the field, Much new material has been added on the patient-centered clinical method, illness narratives, the biological basis of family medicine, health promotion, the concept of risk, and the contribution of evidence-based medicine. Chapter 9 now includes an authoritative review of evidence-based preventive strategies. The five clinical chapters exemplify the application of basic principles in practice. These have all been updated with the results of new research. The chapters on the practice of family medicine cover such topics as home care, records and practiced management. The revisions of these reflect many changes that have occurred since the first edition. A new chapter on alternative (complementary) medicine fills the need for reliable information on this topic. The book has been designed to be read as a whole, with fundamental ideas forming a continuous thread which runs through all its sections.

Narrative-Based Practice in Health and Social Care John Launer, 2018-02-06 *Narrative-Based Practice in Health and Social Care* outlines a vision of how witnessing narratives, paying attention to them, and developing an ability to question them creatively, can make the person's emerging story the central focus of health and social care, and of healing. This text gives an account of the practical application of ideas and skills from contemporary narrative studies to health and social care. Promoting narrative-based practice in everyday encounters with patients and clients, and in supervision, teaching, teamwork and management, it presents *Conversations Inviting Change*, an established narrative-based model of interactional skills. Underpinned by an account of theory from narrative studies and related fields, including communication theory and systems thinking, it is written for students and practitioners across a broad range of professions in primary and secondary health care and social care. More information about *Conversations Inviting Change* is available at www.conversationsinvitingchange.com. This website includes podcasts, presentations and further teaching material as well as details of forthcoming courses, and is continually updated with information about the approach described in this book.

Transitioning to Peace Wilson López López, Laura K. Taylor, 2021-09-03 This edited volume highlights how individuals, communities and nations are addressing a history of protracted violence in the transition to peace. This path is not linear or straightforward. The volume integrates research from peace processes and practices spanning over 20 countries. Four thematic areas unite these contributions: formal transitional justice mechanisms, social movements and collective action, community-driven processes, and future-oriented initiatives focused on children and youth. Across these chapters, the volume offers critical insight, new methods, conceptual models, and valuable cross-cultural research. The chapters in this volume balance locally-situated realities of peace, as well as cross-cutting similarities across contexts. This book will be of particular interest to those working for peace on the frontlines, as well as global policymakers aiming to learn from other cases. Academics in the fields of psychology, sociology, education, peace studies, communication, community development, youth studies, and behavioral economics may be particularly interested in this volume.

We Lost Our Baby Siobhan O'Neill-White, David White, 2007-04-01 *We Lost Our Baby* is the true story of a young couple who, after the initial excitement of discovering a new pregnancy, faced the heartache of losing their baby. On top of the trauma of a miscarriage, they also had to deal with insensitive and sometimes rude doctors and nurses, outdated hospital policies and a shocking lack of empathy and understanding during the worst times of this tragedy. Angry and confused, they went looking for answers. They found none. There were no books to help them with the emotional upheaval they were going through. There were no explanations from the hospital as to why they had lost their baby and the counselling on offer was largely ineffective. What followed was an awkward few months where they could not grieve together and their relationship was severely strained. It was not just their relationship with each other that was affected. Family and friends who did not know how to deal with the situation also became isolated from them. Realising that communication was the key to getting through this sorrowful time, they finally started talking and found a way to get their relationship back on track. They also found that if they spoke honestly and openly to family and friends, they could get those relationships back as well. Knowing that other couples who have lost a baby would be going through similar difficulties, they decided to write down their experience in an effort to help them. Their beautifully written and poignant story, dealing with an issue that is too rarely acknowledged and discussed openly, is one of complete and heart-rending honesty.
