Limbic Seizures in Children G. Avanzini, Anne Beaumanoir, Laura Mira, 2001 The aim of the colloquium from which this multi-author book derives, was to outline the specific expression of epilepsies involving the limbic structures in children and to establish a consensus on the evidence relevant to the clinical management of these epilepsies. The book addresses basic questions such as age-related aetiologic, pathogenetic and prognostic factors relevant to the course of infantile epilepsies with limbic seizures, and enlightens the criteria for their clinical and laboratory assessment. The interaction between basic scientists, neuropaediatricians and neurosurgeons contributes to define suitable strategies aimed at preventing the unfavourable course of these often severe infantile epilepsies and their optimal timing.

Data Warehousing and Knowledge Discovery A Min Tjoa, 2005-09-09 For more than a decade, data warehousing and knowledge discovery technologies have been developing into key technologies for decision-making processes in companies. Since 1999, due to the relevant role of these technologies in academia and industry, the Data Warehousing and Knowledge Discovery (DaWaK) conference series have become an international forum where both practitioners and researchers

share their findings, publish their relevant results and dispute in depth research issues and experiences on data warehousing and knowledge discovery systems and applications. The 7th International Conference on Data Warehousing and Knowledge Discovery (DaWaK 2005) continued series of successful conferences dedicated to these topics. In this edition, the conference tried to provide the right, logical balance between data warehousing and knowledge discovery. Regarding data warehousing, papers cover different relevant and still unsolved research problems, such as the modelling of ETL processes and integration problems, designing OLAP technologies from XML documents, modelling data warehouses and data mining applications together, improvements in query processing, partitioning and implementations. With regard to data mining, a variety of papers were presented on subjects including data mining techniques, clustering, classification, text documents and classification, and patterns. These proceedings contain the technical papers that were selected for presentation at the conference. We received 196 abstracts, and finally received 162 papers from 38 countries, and the Program Committee eventually selected 51 papers, making an acceptance rate of 31.4 % of submitted papers.

Free and Open Source Enterprise Resource Planning: Systems and Strategies Atem de Carvalho, Rogerio, 2011-12-31 Free/Open Source Enterprise Resource Planning systems (FOS-ERP) are gaining popularity and acceptance due to two main factors: their lack of licensing fees and customizability. Given this, organizations are able to easily adopt and manipulate these systems to meet their individual needs. Free and Open Source Enterprise Resource Planning: Systems and Strategies unites research on FOS-ERP, comparing differences with proprietary Enterprise Resource Planning products, and demonstrating key research factors. It includes cases demonstrating how small enterprises have benefited from FOS-ERP in Spain and in Belgium, along with difficulties encountered and

solutions developed. This essential reference addresses key issues such as security and legal risks, as well as challenges, opportunities, and barriers to adoption.

Open Source software ve veřejné správě a soukromém sektoru Bohumír Štědroň, 2009-01-01 Cílem publikace je představit čtenářům charakteristiku open-source software a otevřených formátů. Hlavní důraz bude kladem především na posílení bezpečnosti informačních systémů díky využívání open source software, ekonomické úspory při využívání tohoto typu software a zodpovězení nejčastějších právních otázek týkajících se distribuce a využívání open source software. Open source software a otevřené formáty jsou dle názoru autora ideální pro využití ve veřejné správě i soukromém sektoru, a to zejména z důvodů posílení bezpečnosti IT/IS (neomezený přístup ke zdrojovým kódům) a ekonomickým úsporám.

With Bayonets Fixed John Sheen, 2013-06-19 In August and September 1914 the Regimental Depot of the Durham Light Infantry at Fenham Barracks in Newcastle was overwhelmed by the number of men enlisting. Accommodation was tight so the men were formed into batches and sent off to training grounds in the south of England. Over 2,000 men were sent to Bullswater near Woking in Surrey where they became the 12th and 13th Battalions of the DLI serving in 68 Brigade of the 23rd Division, commanded by Lieutenant General Sir James Babington KCB KCMG. The Division never failed to take an objective between 1915 and

1918. After initial training around Aldershot and Ashford, in May they embarked for France on 25 August 1915. In November Private Thomas Kenny, of the 13th DLI, a miner from Wingate, County Durham, won the Victoria Cross rescuing his wounded officer. In the summer of 1916 they joined the fighting on the Somme and took part in the capture of Contalmaison on 10 July. In October the two battalions took part in the capture of Le Sars before being sent north to the Ypres Salient. In Flanders they took part in the Battle of Messines and the 3rd Battle of Ypres. In November 1917 the 23rd Division was ordered to the Italian Front. The 12th and 13th Battalions were initially deployed on the Montello before moving into the mountainous region of the Asiago Plateau. They were attacked by the Austrians on 15 June 1918, however, the only enemy soldiers that entered the Durhams' trenches did so as prisoners, brought in by men of the two battalions. The 13th DLI was ordered back to France in September 1918 where it took part in the advance to victory; the battalion suffered many casualties in the last six weeks of the war. The 12th DLI remained in Italy and took part in the crossing of the River Piave in October 1918 and the Battle of Vittorio Veneto that led to the end of the war in Italy. The book uses unpublished memoirs and diaries along with letters from officers and men of both battalions. Using the soldiers' personal documents this book reveals many of the tragic stories that led to unnecessary loss of life. Lists of gallantry awards and nominal rolls of officers of both battalions are included.

The Open Source Alternative Heather J. Meeker,2008-02-08 This book is a user manual for understanding and deployment of open source software licensing in business. Written for lawyers and businesspeople alike, it explains and analyzes open source licensing issues, and gives practical suggestions on how to deal with open source licensing in a business context. Including useful forms, information, and both technical and licensing background, this book will help you avoid legal pitfalls and educate your organization about the risks of open source.

Open Source Licensing Lawrence E. Rosen,2005 I have studied Rosen's book in detail and am impressed with its scope and content. I strongly recommend it to anybody interested in the current controversies surrounding open source licensing. -
-John Terpstra, Samba.org; cofounder, Samba-Team Linux and open source software have forever altered the computing landscape. The important conversations no longer revolve around the technology but rather the business and legal issues. Rosen's book is must reading for anyone using or providing open source solutions. --Stuart
Open Source Development Labs A Complete Guide to the Law of Open Source for Developers, Managers,

and Lawyers Now that open source software is blossoming around the world, it is crucial to understand how open source licenses work--and their solid legal foundations. Open Source Initiative general counsel Lawrence Rosen presents a plain-English guide to open source law for developers, managers, users, and lawyers. Rosen clearly explains the intellectual property laws that support open source licensing, carefully reviews today's leading licenses, and helps you make the best choices for your project or organization. Coverage includes: Explanation of why the SCO litigation and other attacks won't derail open source Dispelling the myths of open source licensing Intellectual property law for nonlawyers: ownership and licensing of copyrights, patents, and trademarks Academic licenses BSD, MIT, Apache, and beyond The reciprocal bargain at the heart of the GPL Alternative licenses: Mozilla, CPL, OSL and AFL Benefits of open source, and the obligations and risks facing businesses that deploy open source software Choosing the right license: considering business models, product architecture, IP ownership, license compatibility issues, relicensing, and more Enforcing the terms and conditions of open source licenses Shared source, eventual source, and other alternative models to open source Protecting yourself against lawsuits

Innovation Happens Elsewhere Ron Goldman, Richard P. Gabriel, 2005-04-25 It's a plain fact: regardless of how smart, creative, and innovative your organization is, there are more smart, creative, and innovative people outside your

organization than inside. Open source offers the possibility of bringing more innovation into your business by building a creative community that reaches beyond the barriers of the business. The key is developing a web-driven community where new types of collaboration and creativity can flourish. Since 1998 Ron Goldman and Richard Gabriel have been helping groups at Sun Microsystems understand open source and advising them on how to build successful communities around open source projects. In this book the authors present lessons learned from their own experiences with open source, as well as those from other well-known projects such as Linux, Apache, and Mozilla. * Winner of 2006 Jolt Productivity Award for General Books * Describes how open source development works and offers persuasive reasons for using it to help achieve business goals. * Shows how to use open source in day-to-day work, discusses the various licenses in use, and describes what makes for a successful project. * Written in an engaging style for executives, managers, and engineers that addresses the human and business issues involved in open source development as well as its history, philosophy, and future
