Building a Dedicated GSM GPS Module Tracking System for Fleet Management Franjeh El Khoury, Antoine Zgheib, 2018-01-31 This book shows how to build a INFelecPHY GPS Unit (IEP-GPS) tracking system for fleet management that is based on 3G and GPRS modules. This model should provide reliability since it deals with several protocols: 1) HTTP and HTTPS to navigate, download and upload in real time the information to a web server, 2) FFTP and FTTPS to handle in a non-real time the files to the web application, and 3) SMTP and POP3 to send and receive email directly from the unit in case of any alert. Similar to a mobile device, but without screen for display, it is multifunctional because it links to a GPRS module, a camera, a speaker, headphone, a keypad and screen.

Take Control of Your Digital Photos Jeff Carlson, 2018 Build a stress-free workflow to import, tag, rate, and organize your digital photos! Are you drowning in a sea of digital photos? Unable to find the shots you're looking for, or to stay on top of managing all the photos you're taking? Digital photography expert Jeff Carlson gives you a plan for tackling this problem, starting with preparing your camera ahead of time, then choosing the right app to manage your photos, judging and organizing your photos, and backing up your photos for safekeeping. In this book--an expanded and updated version of Take Control of Your Digital Photos on a Mac --Jeff extends his advice to cover both Mac and Windows users, and to address a broader range of photo management apps: Photos from Apple, Lightroom Classic CC, Lightroom CC, Photoshop Elements, and Mylio . With this book, you'll learn how to: Get started with the minimum amount of work: Take advantage of software intelligence to do some of the categorizing work for you, and find out how you can accomplish some tasks even if you have little time. Prep your camera: Learn four actions you can take before you head out the door

that will make things easier after you return with new pictures. Get your app together: Decide which app you'll use to organize your digital photos, compare popular choices and find out Jeff's recommended application. Import the right way: Learn how to assign valuable metadata to all images that come in during the import stage. Pick winners and losers: Assign ratings to your photos, and remove or hide unwanted photos. Apply keywords and metadata: Take a second pass on applying keywords to individual shots (after starting the process during import), learn how to apply geotags using GPS data from external devices (like an iPhone), and use facial recognition to collect shots of specific friends and family members. Search with smart albums: Build smart albums whose contents change depending on criteria you've specified, allowing you to find photos more easily. While searching, learn how to remove duplicate photos. Go mobile: Find the right online service for making your photos available on mobile devices, based on your needs and which desktop photo management app you use. Protect your photos: Learn how to implement a backup strategy that will preserve all your data, not just your photos, and how to archive photos for the future. After 20 years of struggling to stay on top of family photos I now have an effective workflow, tagging strategy, and s ...

Foundations of Large-Scale Multimedia Information Management and Retrieval Edward Y. Chang, 2011-08-27 Foundations of Large-Scale Multimedia Information Management and Retrieval: Mathematics of Perception covers knowledge representation and semantic analysis of multimedia data and scalability in signal extraction, data mining, and indexing. The book is divided into two parts: Part I - Knowledge Representation and Semantic Analysis focuses on the key components of mathematics of perception as it applies to data management and retrieval. These include feature selection/reduction, knowledge representation, semantic analysis, distance function formulation for measuring similarity, and multimodal fusion. Part II - Scalability Issues presents indexing and

distributed methods for scaling up these components for high-dimensional data and Web-scale datasets. The book presents some real-world applications and remarks on future research and development directions. The book is designed for researchers, graduate students, and practitioners in the fields of Computer Vision, Machine Learning, Large-scale Data Mining, Database, and Multimedia Information Retrieval. Dr. Edward Y. Chang was a professor at the Department of Electrical & Computer Engineering, University of California at Santa Barbara, before he joined Google as a research director in 2006. Dr. Chang received his M.S. degree in Computer Science and Ph.D degree in Electrical Engineering, both from Stanford University.

Power Management in Mobile Devices Findlay Shearer, 2011-04-01 Sealed Lead Acid...Nickel Cadmium...Lithium Ion... How do you balance battery life with performance and cost? This book shows you how! Now that mobile has become the standard, the consumer not only expects mobility but demands power longevity in wireless devices. As more and more features, computing power, and memory are packed into mobile devices such as iPods, cell phones, and cameras, there is a large and growing gap between what devices can do and the amount of energy engineers can deliver. In fact, the main limiting factor in many portable designs is not hardware or software, but instead how much power can be delivered to the device. This book describes various design approaches to reduce the amount of power a circuit consumes and techniques to effectively manage the available power. Power Management Advice On: •Low Power Packaging Techniques •Power and Clock Gating •Energy Efficient Compilers •Various Display Technologies •Linear vs. Switched Regulators •Software Techniques and Intelligent Algorithms * Addresses power versus performance that each newly developed mobile device faces * Robust case studies drawn from the author's 30 plus years of extensive real world experience are included * Both hardware and software are discussed concerning

their roles in power

On the Road with Your Digital Camera Michael A. Freeman, Professor of English Law Michael Freeman, 2004-12 *On the Road with Your Digital Camera* outlines the facts that a beginning digital photographer needs to know in order to be successful while traveling. Rather than merely focusing on digital photography technique, this book offers in-depth coverage of topics such as planning and preparing for photography trips (researching locations, camera choice, and maneuvering through security and customs) and issues the traveling digital photographer may encounter on the trip (weather, obstructions, photo etiquette, legal restrictions and releases). Current travel photography books cover film photography and digital photography only briefly, if at all. In keeping with technological changes, this book focuses strictly on digital travel photography and addresses topics unique to this technology. It also focuses less on the art of digital travel photography and more on the practicalities of traveling with and setting up equipment.

Geological Monitoring Rob Young, Lisa Norby, 2009 *Geologic Monitoring* is a practical, nontechnical guide for land managers, educators, and the public that synthesizes representative methods for monitoring short-term and long-term change in geologic features and landscapes. A prestigious group of subject-matter experts has carefully selected methods for monitoring sand dunes, caves and karst, rivers, geothermal features, glaciers, nearshore marine features, beaches and marshes, paleontological resources, permafrost, seismic activity, slope movements, and volcanic features and processes. Each chapter has an overview of the resource; summarizes features that could be monitored; describes methods for monitoring each feature ranging from low-cost, low-technology

methods (that could be used for school groups) to higher cost, detailed monitoring methods requiring a high level of expertise; and presents one or more targeted case studies.--Publisher's description.
