Oath of Honor (Blue Justice Book #1) Lynette Eason,2018-01-02 Police officer Isabelle St. John loves her crazy, loud, law-enforcement family. With three brothers and two sisters, she's never without someone to hang out with--or fight with. And she knows they'll be there for her when things get tough. Like when her partner is murdered and she barely escapes with her own life. Determined to discover exactly what happened, Izzy's investigation sends her headfirst into a criminal organization, possibly with cops on the payroll--including someone from her own family. With her dead partner's handsome homicide detective brother Ryan shadowing her every move, Izzy's head is spinning. How can she secure justice for her partner when doing so could mean sending someone she loves to prison? And how will she guard her heart when the man she's had a secret crush on for years won't leave her side? With her signature fast-paced, edge-of-your-seat action, Lynette Eason invites readers into a captivating new series where justice is a family affair.

Advances in Aerospace Guidance, Navigation and Control Bogusław Dołęga,Robert Głębocki,Damian Kordos,Marcin Żugaj,2017-12-15 The first three CEAS (Council of European Aerospace Societies) Specialist Conferences on Guidance, Navigation and Control (CEAS EuroGNC) were held in Munich, Germany in 2011, in Delft, Netherlands in 2013 and in Toulouse, France in 2017. The Warsaw University of Technology (WUT) and the Rzeszów University of Technology (RZUT) accepted the challenge of jointly organizing the 4th edition. The conference aims to promote scientific and technical excellence in the fields of Guidance, Navigation and Control (GNC) in aerospace and other fields of technology. The Conference joins together the industry with the academia research. This book covers four main topics: Guidance and Control, Control Theory Application, Navigation, UAV Control and Dynamic. The papers included focus on the most advanced and actual topics in guidance, navigation and control research areas: · Control theory, analysis, and design · ; Novel navigation, estimation, and tracking methods · Aircraft, spacecraft, missile and UAV guidance, navigation, and control · Flight testing and experimental results · Intelligent control in aerospace applications · Aerospace robotics and unmanned/autonomous systems · Sensor systems for guidance, navigation and control · Guidance, navigation, and control concepts in air traffic control systems For the 4th CEAS Specialist Conference on Guidance, Navigation and Control the International Technical Committee established a formal review process. Each paper was reviewed in compliance with good journal practices by independent and anonymous reviewers. At the end of the review process papers were selected for publication in this book.

Weapon Systems Book, 2014/2015 ,2014 Book Purpose: The Weapons Systems Book is an authoritative source of descriptions, characteristics and essential programmatic information for the programs managed by the Program Executive Office Missiles and Space (PEO MS). The PEO's project offices have direct responsibility and oversight for the development, production, fielding and sustainment of these systems. This book is organized by project office. To facilitate the user's ability to gather system data, each system is treated as stand-alone. This results in some information being repeated in a number of system write-ups.--page i.

An Introduction to American Policing Dennis J. Stevens,2017-05-08 An Introduction to American Policing, Second Edition connects the US criminal

justice system, criminology, and law enforcement knowledge to the progress of the police community. It is the perfect resource for a Police Science course.

Popular Science, 2006-07 Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

A Government of Wolves John W. Whitehead, 2013-06 “A NATION OF SHEEP WILL BEGET A GOVERNMENT OF WOLVES”-EDWARD R. MURROW America is fast moving into a state of lockdown. Surveillance cameras, drug-sniffing dogs, SWAT team raids, roadside strip searches, blood draws at DUI checkpoints, mosquito drones, tasers, privatized prisons, GPS tracking devices, zero tolerance policies, overcriminalization, free speech zones—these are all symptoms of the emerging police state in America. A GOVERNMENT OF WOLVES paints a chilling portrait of a nation in the final stages of transformation into outright authoritarianism, whose citizens have become little more than a nation of suspects to be cowed, corralled, and controlled. Pulling from his extensive knowledge of constitutional law, history, and futuristic films, John W. Whitehead helps readers navigate this treacherous terrain and provides them with a blueprint for hopefully finding their way back to freedom.

The Social History of Crime and Punishment in America: A-De Wilbur R. Miller, 2012-08-10 This comprehensive and authoritative four-volume work surveys the history and philosophy of crime, punishment, and criminal justice institutions in America from colonial times to the present.

U.S. Conflicts in the 21st Century [3 volumes] Spencer C. Tucker, 2015-12-14 This three-volume reference work provides an up-to-date presentation and analysis of the U.S. wars of the 21st century, addressing their backgrounds, causes, courses, and consequences. It serves as an indispensable resource for students seeking to understand the role of the United States in the world today. Addressing the U.S. conflicts in Iraq, Afghanistan, and the Global War on Terror from the year 2001 to the present, this comprehensive, three-volume encyclopedia covers the significant individuals, key events, and important places involved in these recent military events. Beginning with the rise of Al Qaeda in the 1990s and the attacks on September 11, 2001, and covering events through ISIS's dramatic surge in Iraq and Syria, the hundreds of detailed entries also examine historical trends; nations and ethnicities involved in the conflicts; influential figures and organizations; economic, political, diplomatic, and cultural influences; wars, campaigns, and battles; and important weapons systems. The set's A-Z organization makes it an easy-to-use ready reference for high school and college students. Perspective essays on several controversial topics—such as the use of torture and the effects of the Patriot Act—serve to inspire readers to apply critical thinking. A detailed chronology is provided to help students place all the important events that have occurred in the Afghanistan War, Iraq War, and War on Terror. Each of the chronologically arranged primary documents is introduced with a brief overview to provide important background information and context.

Beyond the Wild Blue Walter J. Boyne, 1998-06-15 From the most important leaders and the most courageous victories to the earliest machines of flight and the most advanced Stealth technology, this book presents a fascinating look at 50 turbulent years of Air Force history. Three 8-page photo inserts, one in color.

Beyond the Wild Blue (2nd edition) Walter J. Boyne, 2007-06-26 The second edition of Beyond the Wild Blue, an update of the popular history originally released in 1997, is a fascinating look at sixty turbulent years of Air Force history. From the prop-driven armada of World War II to the most advanced Stealth weaponry, from pioneers like General Henry Hap Arnold to glorious conquests in the Gulf War, Beyond the Wild Blue is a high-flying

study of the triumphs (and failures) of leadership and technology. In three new chapters, Walter Boyne covers an eventful ten years, including 9/11, the invasion of Afghanistan, and the second Gulf War, describing in detail the technological advancements that led to highly efficient airstrikes in Iraq. He also takes stock of the Air Force's doctrine and mission statements as this unique sector of the military grapples with an ever-changing world.

Space Technology Thomas F. Mütsch, Matthias B. Kowalski, 2016-05-24 This textbook is a compendium for further education of students and professionals in aerospace industry. It covers the fundamentals of aerospace and explains the details of technical implementations. These are organised in the border area of technical feasibility. The authors discuss constraints of space flight and key elements of rocket motors and power supply in more detail. The accessibility of the celestial bodies is tabulated and documented in the outlook chapter, in which the largest vision of space flight, humans to Mars, is explained. From the content: Historical Background Basic Principles Propulsion Systems Missions Energy Sources Materials and Lubricants Processes Products Projects and Payloads Launch Sites Environmental and Boundary Conditions Conclusions and Outlook Appendix with an extensive collection of formulas

China Satellite Navigation Conference (CSNC 2021) Proceedings Changfeng Yang, Jun Xie, 2021-06-10 China Satellite Navigation Conference (CSNC 2021) Proceedings presents selected research papers from CSNC 2021 held during 22nd-25th May, 2021 in Nanchang, China. These papers discuss the technologies and applications of the Global Navigation Satellite System (GNSS), and the latest progress made in the China BeiDou System (BDS) especially. They are divided into 10 topics to match the corresponding sessions in CSNC2021 which broadly covered key topics in GNSS. Readers can learn about the BDS and keep abreast of the latest advances in GNSS techniques and applications.

GNSS Environmental Sensing Joseph Awange, 2017-09-04 This book is the second edition of Environmental Monitoring using GNSS and highlights the latest developments in global navigation satellite systems (GNSS). It features a completely new title and additional chapters that present emerging challenges to environmental monitoring—"climate variability/change and food insecurity." Since the publication of the first edition, much has changed in both the development and applications of GNSS, a satellite microwave remote sensing technique. It is the first tool to span all four dimensions of relevance to humans (position, navigation, timing and the environment), and it has widely been used for positioning (both by military and civilians), navigation and timing. Its increasing use is leading to a new era of remote sensing that is now revolutionizing the art of monitoring our environment in ways never imagined before. On the one hand, nearly all GNSS satellites (Global Positioning System (GPS), Global Navigation Satellite System (GLONASS), Galileo and Beidou) have become operational, thereby providing high-precision, continuous, all-weather and near real-time remote sensing multi-signals beneficial to environmental monitoring. On the other hand, the emerging challenges of precisely monitoring climate change and the demand for the production of sufficient food for ever-increasing populations are pushing traditional monitoring methods to their limits. In this regard, refracted GNSS signals (i.e., occulted GNSS signals or GNSS meteorology) are now emerging as sensors of climate variability, while the reflected signals (GNSS reflectometry or GNSS-R) are increasingly finding applications in determining, e.g., soil moisture content, ice and snow thickness, ocean heights, and wind speed and direction, among others. Furthermore, the increasing recognition and application of GNSS-supported unmanned aircraft vehicles (UAV)/drones in agriculture (e.g., through the determination of water holding capacity of soil) highlights the new challenges facing GNSS. As such, this new edition three new chapters address GNSS reflectometry and applications; GNSS sensing of climate variability; and the applications in UAV/drones. Moreover, it explores the application of GNSS to support integrated coastal zone management.
