Your Inner GPS Zen Cryar DeBrücke ,2016-04-01 Many of us rely on our car's or phone's GPS but ignore the life-directional system we were each born with. This innate compass – what Zen Cryar DeBrücke calls our internal guidance system (IGS) – wants us to be happy, successful, and stress-free. How do we tune in to this tool? DeBrücke learned from trial and error and through the dramatic crucible of being the CEO of an internet firm during the dot-com bust. Her IGS helped her ride these daunting waves – and in the process she learned to leave painful memories behind, abandon destructive relationship patterns, and set boundaries. Learning to recognize and speak her truth led to the “beautiful sensation of being comfortable in [her] own skin.” Here DeBrücke shares her innovative program with readers so they too can have the life-changing experiences that result when we follow the guidance within.

GPS for Success Barry A. Franklin, 2022-05-04 Next to food and clothing, achieving personal and professional success is rated at the very top of the hierarchical order of human needs. Everybody wants to be somebody! In this ultimate success book that includes timeless information for generations to come, the author has meticulously chronicled proven skills, strategies and secrets that, if regularly followed, will empower the reader to live the life that they imagine. Just like your car's or phone's GPS, these life navigation skills can get you from where you are to where you want to go in your career. In addition, critically important knowledge and abilities, including job interviewing, must-know people skills, writing, and public speaking, are covered. In this book, the author has scoured the world's literature on these topics and interviewed highly successful people to provide one-stop shopping regarding the most proven and practical recommendations for future career success. He has also peppered the text with personal experiences and motivational/inspirational success stories, as well as testimonials/sage advice/quotes from the world's most successful people --past and present. The key objectives of this book are to: Highlight the foundational factors underlying future career success: love what you do; realize that your behaviors largely determine your luck in life; emphasize that highly successful people take 100% responsibility for their actions and destiny; and that the secret to success involves the selfless serving of others. The rewards return—through a boomerang effect. Provide specific examples and inspirational stories highlighting 10 critical behavioral skills for success. These include: look for the good in people and situations; how to activate the law of attraction; establish goals in writing (if it's not on paper, it's vapor); take action (#1 success characteristic); know that persistence pays; ask for things you want; enhance your speaking, writing, and interviewing skills; why it's important to work with and learn from people you want to emulate; the essence of superb people skills (e.g., integrity, making others feel important); and to regularly apply the law of sow and reap. Detail complementary approaches,

tactics, and perspectives that can help you achieve your breakthrough (major) life goals. These include: time management skills and the 80/20 rule; looking for greener pastures; showcasing your talents (visibility □ opportunities); committing to never-ending improvements in performance, service (or products); embracing discipline/focus/sacrifice; routinely exceeding people's expectations; striving for greater rewards; and seeing an ocean of opportunities before you. In aggregate, these yield BIG rewards in life. Provide a potpourri of related topics, including unlooked-for opportunities; leadership and bringing out the best in those around you; avoiding overcautiousness; volunteering (raising your hand); reframing future commitments; the power (and magic) of an unexpected thank you note; and the disproportionate dividends and good karma that result from giving back and mentoring others.

Global Positioning System Bernhard Hofmann-Wellenhof, Herbert Lichtenegger, James Collins, 2012-12-06 This book is dedicated to Dr. Benjamin William Remondi for many reasons. The project of writing a Global Positioning System (GPS) book was conceived in April 1988 at a GPS meeting in Darmstadt, Germany. Dr. Remondi discussed with me the need for an additional GPS textbook and suggested a possible joint effort. In 1989, I was willing to commit myself to such a project. Unfortunately, the timing was less than ideal for Dr. Remondi. Therefore, I decided to start the project with other coauthors. Dr. Remondi agreed and indicated his willingness to be a reviewer. I selected Dr. Herbert Lichtenegger, my colleague from the Technical University Graz, Austria, and Dr. James Collins from Rockville, Maryland, U.S.A. In my opinion, the knowledge of the three authors should

cover the wide spectrum of GPS. Dr. Lichtenegger is a geodesist with broad experience in both theory and practice. He has specialized his research to geodetic astronomy including orbital theory and geodynamical phenomena. Since 1986, Dr. Lichtenegger's main interest is dedicated to GPS. Dr. Collins retired from the U.S. National Geodetic Survey in 1980, where he was the Deputy Director. For the past ten years, he has been deeply involved in using GPS technology with an emphasis on surveying. Dr. Collins was the founder and president of Geo/Hydro Inc. My own background is theoretically oriented. My first chief, Prof. Dr. Peter Meissl, was an excellent theoretician; and my former chief, Prof. Dr. mult. Helmut Moritz, fortunately, still is.

GPS for America Abel Gashe, 2014-09-11 The American Union is imperfect. But it is certainly motioning towards a more perfect union. It is this foundational thesis in the fulfillment of the American vision that this book focuses on. By affording an integrated and holistic approach, the book shows that the American dynamics is transformational living phenomenon framed on four major paradigms: that America is a land of freedom; that America is a land of opportunity; that America is impregnated with inertia within it that propels it to repair its faults; and that the nation has been moving to a higher ground in its motion with a concerted effort of its people as one (E pluribus Unum) to build a more perfect Union. A pragmatic but positive outlook on the American reality in the bountiful land by a first generation immigrant from Gojjam, Ethiopia, the author tries to help the reader develop a generic framework in understanding the evolving American reality since the founders took the bold step in 1776 to write an audacious proposal that all men are created equal, endowed by the creator with inalienable rights. The analysis in the book begins by framing the constitutional bases of the nation as a four dimensional compass. Using what he terms as the American GPS, he leads the reader to have a snapshot on the structure of American government, citizenship, church and state, legal, economic, political and foreign policy issues to show that in fact what is manifesting in the American socio-political topology is not a random act but an in-built, systemic transfiguration in creating the opportunity for all children of Adam to realize their God given inalienable rights, being Geezans (freely roaming citizens of the universe) in fulfilling the vision of the nation. After reading this book, the reader will never waste time in random thoughts about the American ever unfolding reality. By all accounts America is an emergent and noble idea whose better days are yet to come. That is the projection whose totality can be meaningfully captured through a living compass: The American GPS!
