*Memo ISO-GPS Specification GD & T* Rénaud Vincent,2017-10-13 The GPS provides a means of communication whereby designers, production engineers, quality experts, inspectors and metrologists can exchange information on the allowable geometries of workpieces manufactured on the basis of specifications... indicated on a drawing... The associated graphic and symbolic language uses the syntax and semantics defined in GPS standards. This document, which is in the diffusion of GPS system contribute , is intended as a practical resource, a summary of GPS standards on tolerancing, aiming to provide new contributions to the main features contained in the basic tolerancing and dimensioning standards released since the publication of the first Memo.

**Business With a Conscience** Joan Marques, 2021-12-07 Practicing business with a conscience leaves no sector untouched. It trickles into how we treat our employees; approach our work in general; address stakeholders; engage in accounting, financial, and production management practices; implement and manage information technology; communicate on a direct and indirect basis; and market what we stand for. Business has encountered an interesting evolution in the first two decades of the twenty-first century, with social media as a catalyst aiding greater understanding and improvement regarding the critical value of soft skills, workplace diversity, change readiness, moral responsibility, sustainable awareness, and a general socially responsible mindset. This amalgamate spirit of business as we envision it in both the near and far future has found its way in all segments of business education, research, and practice. Adhering to the global trend of increased responsibility and evoking a constructive change in the narrative of business, this Research Companion serves as a critical reference work for business scholars and practitioners in various settings. It brings together contributing scholars from multiple business areas, from a variety of cultures and locations of the

world, in order to achieve the compilation of a reference work that will find an expansive appeal. Including insights from the broad business spectrum ranging from internal managerial practices to strategic applications, including international sensitivity, this volume highlights the urgency for increased awareness in business decision-making on all fronts. It will be of great value to researchers, academics, practitioners, and students in the fields of corporate social responsibility, business ethics, leadership, organizational studies, and entrepreneurship.

of the most mesmerizing and exhilarating, yet alarming modern technology books...an extraordinary tale. —Gillian Tett, Financial Times Pinpoint tells the fascinating story of a hidden system that touches nearly every aspect of modern life. Tracking the development of GPS from its origins as a bomb guidance system to its present ubiquity, Greg Milner examines the technology's double-edged effect on the way we live, work, and travel. Savvy and original, this sweeping scientific history offers startling insight into how humans understand their place in the world.

**Google and the Law** Aurelio Lopez-Tarruella,2012-02-22 Google's has proved to be one of the most successful business models in today's knowledge economy. Its services and applications have become part of our day-to-day life. However, Google has repeatedly been accused of acting outside the law in the development of services such as Adwords, Googlebooks or YouTube. One of the main purposes of this book is to assess whether those accusations are well-founded. But more important than that, this book provides a deeper reflection: are current legal systems adapted to business models such as that of Google or are they conceived for an industrial economy? Do the various lawsuits involving Google show an evolution of the existing legal framework that might favour the flourishing of other knowledge-economy businesses? Or do they simply reflect that Google has gone too far? What lessons can other knowledge-based businesses learn from all the disputes in which

Google has been or is involved? This book is valuable reading for legal practitioners and academics in the field of information technologies and intellectual property law, economists interested in knowledge-economy business models and sociologists interested in internet and social networks. Dr. Aurelio Lopez-Tarruella is Senior Lecturer in Private International Law at the University of Alicante, Spain.
