Mobile Entity Localization and Tracking in GPS-less Environments Richard Fuller, Xenofon D. Koutsoukos, 2009-09-29 This volume contains the proceedings of the Second International Workshop on Mobile Entity Localization and Tracking in GPS-less Environments (MELT 2009), held in Orlando, Florida on September 30, 2009 in conjunction with the 11th International Conference on Ubiquitous Computing (UbiComp 2009). MELT provides a forum for the presentation of state-of-the-art technologies in mobile localization and tracking and novel applications of location-based services. MELT 2009 continued the success of the first workshop in the series (MELT 2008), which was held in San Francisco, California on September 19, 2008 in conjunction with Mobicom. Location-awareness is a key component for achieving context-awareness. Recent years have witnessed an increasing trend towards location-based services and applications. In most cases, however, location information is limited by the accessibility to GPS, which is unavailable for indoor or underground facilities and unreliable in urban environments. Much research has been done, in both the sensor network community and the ubiquitous computing community, to provide techniques for localization and tracking in GPS-less environments. Novel applications based on ad-hoc localization and real-time tracking of mobile entities are growing as a result of these technologies. MELT brings together leaders from both the academic and industrial research communities to discuss challenging and open problems, to evaluate pros and cons of various approaches, to bridge the gap between theory and applications, and to envision new research opportunities.

Camp for Free John Soares, 2022-01-11 Updated for 2023! Did you know that you can camp for free on much of America's public lands? Boondocking/dispersed camping is growing rapidly in popularity as more and more people take to their vans, RVs, SUVs, trucks, and cars to explore the backroads of America's forests and deserts in search of solitude and natural beauty. I Have a Lot of Experience Doing Dispersed Camping! I'm John Soares, a writer for businesses and nonprofits for over three decades, and also the author of four hiking guidebooks on Northern California. I've been doing dispersed camping for 30-plus years in California, Oregon, Washington, Idaho, Wyoming, Utah, New Mexico, Arizona, Nevada, and other states. In this book I bring all my knowledge, experience, and research together to clearly explain everything you need to know to get out into nature on national forest and Bureau of Land Management (BLM) lands and find primo camping spots, while saving a ton of money in the process. This Book is Your Bible for Dispersed Camping and Boondocking Here's what *Camp for Free: Dispersed Camping & Boondocking on America's Public Lands* covers: -- In-depth discussion of the different types of federal and state lands where you can camp for free, including dispersed camping and boondocking on national forests, Bureau of Land Management (BLM) lands, national monuments, and more -- Clear explanation of how to research the best areas to go dispersed camping and boondocking, and where to find the best advice on finding campsites -- Detailed guidelines that help you find excellent campsites once you're out on dirt roads in the hills, forest, or desert - and what you need to do to not get lost! -- A list of

the key characteristics of a good dispersed campsite, and how to make sure it's a good fit for your specific needs -- How you can minimize your impact on the land, including applying Leave No Trace principles -- What you need to do to be as safe as possible when camping and exploring -- How to keep your dogs safe -- Advice on where to legally sleep along highways and in and near towns and cities -- A comprehensive list of everything you need to take with you to have a thoroughly enjoyable dispersed camping experience -- A clear definition of dispersed camping, and why I use it more than "boondocking," which is more common among RV folks. I also define similar terms, such as free camping, primitive camping, dry camping, and wild camping. -- A comparison of dispersed camping with regular pay campgrounds, and why, despite the cost and potential noise and other hassles, it can occasionally be a good idea to stay in a campground. -- Discussion and ranking of the variety of vehicles you can use for dispersed camping: full-size vans, trucks with camper shells, minivans, RVs, travel trailers, cars, and motorcycles. Only have a regular car? No problem—you can still do this! The book includes 25 photos, plus maps showing the distribution of U.S. Forest Service and Bureau of Land Management lands across the United States. What This Book Is – and What It Is Not There are hundreds of thousands of places where you can legally boondock and do dispersed camping in the United States, so this is not a guidebook to specific places. Rather, it's how-to manual that makes sure you know how to find the best dispersed camping and boondocking sites in the United States, and that you maximize your enjoyment and safety. My Website Has a Wealth of Boondocking/Dispersed Camping Resources In the introduction and throughout the book you'll see my website address. The website helps you find the best dispersed camping spots and get the most out of your dispersed camping experiences. It includes websites and apps that help you find specific campsites.

GPS Mapping Rich Owings, 2005 A comprehensive guide to mapping software explains how to interface one's GPS receiver with a computer to create maps, annotate aerial photos, and create 3-D maps. Also includes where to find free software and maps, how to use aerial photos and satellite imagery, and how to view favorite backcountry locations in 3-D.

Quality and Accuracy of Positional Data in Transportation Edward Fekpe, National Cooperative Highway Research Program, 2003 The global response to COVID-19 has demonstrated the importance of vigilance and preparedness for infectious diseases, particularly influenza. There is a need for more effective influenza vaccines and modern manufacturing technologies that are adaptable and scalable to meet demand during a pandemic. The rapid development of COVID-19 vaccines has demonstrated what is possible with extensive data sharing, researchers who have the necessary resources and novel technologies to conduct and apply their research, rolling review by regulators, and public-private partnerships. As demonstrated throughout the response to COVID-19, the process of research and development of novel vaccines can be significantly optimized when stakeholders are provided with the resources and technologies needed to support their response. Vaccine Research and Development to Advance Pandemic and Seasonal Influenza Preparedness and Response focuses on how to leverage the knowledge gained from the COVID-19 pandemic to optimize vaccine research and development (R&D) to support the prevention and control of seasonal and pandemic influenza. The committee's findings address four dimensions of vaccine R&D: (1) basic and translational science, (2) clinical science, (3) manufacturing science, and (4) regulatory science.

Designing for Zero Waste Steffen Lehmann, Robert Crocker, 2013-07-03 Designing for Zero Waste is a timely, topical and necessary publication. Materials and resources are being depleted at an accelerating speed and rising consumption trends across the globe have placed material efficiency, waste reduction and recycling at the centre of many government policy agendas, giving them an unprecedented urgency. While there has been a considerable literature addressing consumption and waste reduction from different disciplinary perspectives, the complex nature of the problem requires an increasing degree of interdisciplinarity. Resource recovery and the optimisation of material flow can only be achieved alongside and through behaviour change to reduce the creation of material waste and wasteful consumption. This book aims to develop a more robust understanding of the links between lifestyle, consumption, technologies and urban development.
