Building a Dedicated GSM GPS Module Tracking System for Fleet Management Franjieh El Khoury,Antoine Zgheib,2018-01-31 This book shows how to build a INFelecPHY GPS Unit (IEP-GPS) tracking system for fleet management that is based on 3G and GPRS modules. This model should provide reliability since it deals with several protocols: 1) HTTP and HTTPS to navigate, download and upload in real time the information to a web server, 2) FTTP and FTTPS to handle in a non-real time the files to the web application, and 3) SMTP and POP3 to send and receive email directly from the unit in case of any alert. Similar to a mobile device, but without screen for display, it is multifunctional because it links to a GPRS module, a camera, a speaker, headphone, a keypad and screen.

Global Positioning System: Who's Tracking You? Leon Gray,2013-01-01 We usually think of GPS (Global Positioning System) as a good thing, especially if we're using it to find our way from place to place. GPS satellites, radio signals, and receivers work together to pinpoint our location and get us to our destination. Hikers, bicyclists, and even golfers are finding ways to use GPS to improve their athletic experiences. The military installs GPS in many kinds of equipment, vehicles, and weaponry. GPS has surprising applications as well, such as tracking animals for conservation efforts. But many people are suspicious of this technology, especially when it's used to locate them without their consent. Many aspects of the GPS debate are explained, giving readers the ability decide for themselves where, when, and how satellite positioning should be used.

How to Make Money Installing GPS Trackers for Cars A. B. Lawal,2019-09-13 About the Book The market for GPS tracking services Is a rapidly growing and relatively untapped opportunity for small businesses and entrepreneurs. Currently there are more than 12 million registered commercial vehicles in the USA alone. In Latin America, there are over 20 million. However, a very small percentage of these vehicles are protected by fleet management software. Fortunately, this has started to change. There are many facets in a GPS car tracking business that are profitable for entrepreneurs (and that's why you should read this guide), including the benefit of recurring revenue from service subscriptions. Before you start your GPS vehicle tracking business, you should consider several steps that will help your company to succeed. Use this guide to walk yourself through some important steps that you must take to launch a successful GPS vehicle tracking business. Finally, In the last chapter of my guide, I introduce a world-class GPS tracking platform provider (vendor) that will help you get started, and put your new GPS tracking business on the map. They will ensure you're in business for yourself, but never by yourself. A link to a demo of their GPS tracking software is provided for you so you can learn how their team of GPS experts can start you up in business.

GPS Tracking with Java EE Components Kristof Beiglböck,2018-08-06 GPS Tracking with Java EE Components: Challenges of Connected Cars highlights how the self-driving car is actually changing the automotive industry, from programing embedded software to hosting services and data crunching, in real time, with really big data. The book analyzes how the challenges of the Self Driving Car (SDC) exceed the limits of a classical GPS Tracking System (GTS.) It provides a guidebook on setting up a tracking system by customizing its components. It also provides an overview of the prototyping and modeling process, and how the reader can modify this process for his or her own software. Every component is introduced in detail and includes a number of design decisions for development. The book introduces Java EE (JEE) Modules, and shows how they can be combined to a customizable GTS, and used as seed components to enrich existing systems with live tracking. The book also explores how to merge tracking and mapping to guide SDCs, and focuses on client server programming to provide useful information. It also discusses the challenges involved with the live coordination of moving cars. This book is designed to aid GTS developers and engineers in the automotive industry. It can also help Java Developers, not only interested in GPS Tracking, but in modern software design from many individual modules. Source code and sample applications will be available on the book's website.

Spatial Database for GPS Wildlife Tracking Data Ferdinando Urbano,Francesca Cagnacci,2014-03-12 This book guides animal ecologists, biologists and wildlife and data managers through a step-by-step procedure to build their own advanced software platforms to manage and process wildlife tracking data. This unique, problem-solving-oriented guide focuses on how to extract the most from GPS animal tracking data, while preventing error propagation and optimizing analysis performance. Based on the open source PostgreSQL/PostGIS spatial database, the software platform will allow researchers and managers to integrate and harmonize GPS tracking data together with animal characteristics, environmental data sets, including remote sensing image time series, and other bio-logged data, such as acceleration data. Moreover, the book shows how the powerful R statistical environment can be integrated into the software platform, either connecting the database with R, or embedding the same tools in the database through the PostgreSQL extension Pl/R. The client/server architecture allows users to remotely connect a number of software applications that can be used as a database front end, including GIS software and WebGIS. Each chapter offers a real-world data management and processing problem that is discussed in its biological context; solutions are proposed and exemplified through ad hoc SQL code, progressively exploring the potential of spatial database functions applied to the respective wildlife tracking case. Finally, wildlife tracking management issues are discussed in the increasingly widespread framework of collaborative science and data sharing. GPS animal telemetry data from a real study, freely available online, are used to demonstrate the proposed examples. This book is also suitable for undergraduate and graduate students, if accompanied by the basics of databases.

Urbanism on Track Jeroen Schaick,Stefan C. Spek,2008 Tracking technologies such as GPS, mobile phone tracking, video and RFID monitoring are rapidly becoming part of daily life. Technological progress offers huge possibilities for studying human activity patterns in time and space in new ways. Delft University of Technology (TU Delft) held an international expert meeting in early 2007 to investigate the current and future possibilities and limitations of the application of tracking technologies in urban design and spatial planning. This book is the result of that expert meeting. --Book Jacket.

Parents' Survival Guide to Online Safety - Cell Phone Monitoring and GPS Tracking Kidguard Publishing,2017-03-21 Our children's world is a fast moving theater of information, entertainment, virtual relationships, and out-of-the box concepts that were unheard of just forty years ago. The internet and the prevalence of convenient, portable gadgets are a boon to modern civilization; but, their dark side hosts online predators, thieving hackers, and morbidly dangerous information. Parents much make sure children fully understand why rules regarding internet use must be followed and how specifically online predators can compromise their safety. It's a parent's obligation today to learn about how the digital world operates, how kids use it, their lingo, and everything else pertaining to digital socialization. Pinpoint: How GPS is Changing Technology, Culture, and Our Minds Greg Milner,2016-05-03 One of the most mesmerizing and exhilarating, yet alarming modern technology books…an extraordinary tale. —Gillian Tett, Financial Times Pinpoint tells the fascinating story of a hidden system that touches nearly every aspect of modern life. Tracking the development of GPS from its origins as a bomb guidance system to its present ubiquity, Greg Milner examines the technology's double-edged effect on the way we live, work, and travel. Savvy and original, this sweeping scientific history offers startling insight into how humans understand their place in the world.

How Does GPS Work? Leon Gray,1900-01-01 When taking a road trip today, some sort of GPS device is essential. It may be built into the car's dashboard, or perhaps it's just an app on a smartphone. But GPS is used for more than just finding your way! Readers will be fascinated by its beginnings as a military system and its many modern uses, such as catching criminals, predicting earthquakes, and creating maps. Colorful photographs illustrate real-life examples of GPS technology, military and civilian, and informative text clearly explains the science and math concepts behind the satellites and receivers used all over the world.

GPS Declassified Richard D. Easton,Project Muse,2013 GPS Declassified examines the development of GPS from its secret, Cold War military roots

to its emergence as a worldwide consumer industry. Drawing on previously unexplored documents, the authors examine how military rivalries influenced the creation of GPS and shaped public perceptions about its origin. Since the United States' first program to launch a satellite in the late 1950s, the nation has pursued dual paths into space-one military and secret, the other scientific and public. Among the many commercial spinoffs this approach has produced, GPS arguably boasts the greatest impact on our.

Global Positioning Systems Laurie Collier Hillstrom,2010-12-06 Many inventions come to us through military and government creation, such as Global Positioning Systems or G.P.S. This volume focuses on G.P.S. technology in detail, tracing the history and scientific breakthroughs leading to its creation. Readers will also consider its impact, and its future uses.

Mobile Entity Localization and Tracking in GPS-less Environnments Richard Fuller,Xenofon D. Koutsoukos,2009-09-11 This book constitutes the refereed proceedings of the second International Workshop on Mobile Entity Localization and Tracking in GPS-less Environnments, MELT, held in Orlando, Florida, USA, in September 2009 in conjunction with the 11th International Conference on Ubiquitous Computing (Ubicomp 2009). MELT is a forum for the state-of-the-art technologies in mobile localization and tracking and novel applications of location-based services. The research contributions in these proceedings cover significant aspects of localization and tracking of mobile devices that include techniques suitable for smart phones and mobile sensor networks in both outdoor and indoor environments using diverse sensors and radio signals. Novel theoretical methods, algorithmic design and analysis, application development, and experimental studies are presented in 14 papers that were reviewed carefully by the program committee. In addition, three invited papers, with topics on location determination using RF systems, Cramer-Rao-Bound analysis for indoor localization and approaches targeting mobile sensor networks, are also included in the proceedings.

The Essential Guide to Geocaching Mike Dyer,2004 Presents a guide to geocaching, a type of hide-and-seek game supported by Global Positioning System technology, reviews the history of the sport, and includes checklists, a glossary of terms, and list of resources.

Location-Based Information Systems Miguel A. Labrador,Alfredo J. Perez,Pedro M. Pioneering Technologies for Mountaineers. Developing an IoT-based Health and GPS Tracking System Bandar Hezam,2023-09-14 Bachelor Thesis from the year 2023 in the subject Sport - Sports Equipment and Supplies, grade: B+, , course: Mechatronics, language: English, abstract: In the contemporary realm of adventure sports, the safety of mountaineers takes center stage. This study aims to forge an IoT-based solution capable of real-time monitoring of not only the location but the health of mountaineers, thereby minimizing potential risks and facilitating rapid response in emergencies. The summary offers a detailed overview of the various chapters and sections integral to this pivotal research. The introduction highlights the prominence of mountaineering as a global sport and delineates the challenges and risks associated with it. It emphasizes the imperative for a reliable health monitoring system that withstands physical constraints while being lightweight and wearable. Chapter one delves deeply into the problem statement and the study's objective, focusing particularly on creating a wearable device that monitors the health and location of mountaineers in real time. Chapter two furnishes a comprehensive review of the existing literature, particularly focusing on the diverse technologies and systems presently utilized for health monitoring and navigation. In chapter three, the concept development and research methodology are detailed extensively. Here, the various phases of the project, including material and software selection, as well as the proposed methodology, are discussed. The document concludes with an extensive repository of references and an appendix that includes a literature review matrix.

Programming GPS and OpenStreetMap Applications with Java Kristof Beiglböck,2012-01-27 Written by an expert in the development of GPS systems with digital maps and navigation, Programming GPS and OpenStreetMap Applications with Java: The RealObject Application Framework provides a concrete paradigm for object-oriented modeling and programming. It presents a thorough introduction to the use of available global positioning data for the development of applications involving digital maps. The author first describes the different formats of GPS data and digital maps and shows how to use recorded GPS traces to replay and display this data on a digital map. Then, he works through in detail the processing steps of obtaining dedicated data from OpenStreetMaps and how to extract a network for a simple navigation application. For each topic covered—GPS data, OpenStreetMaps, and navigation—Java code is developed that can easily be adapted to the readers' needs and locality. Finally, all components are put together in a sample computer-game application modeled on the well-known board game, Scotland Yard. The computer game is intended to be a basis from which readers can develop and customize their own application for their desired geographical area. The developed application can be published on the Internet and made available for interactive multiplayer competition. This book provides a fun and interesting way to learn distributed programming with Java and real-world data. Open-source software is available on a companion website at www.roaf.de

High-Dynamic GPS Tracking National Aeronautics and Space Administration (NASA),2018-07-08 The results of comparing four different frequency estimation schemes in the presence of high dynamics and low carrier-to-noise ratios are given. The comparison is based on measured data from a hardware demonstration. The tested algorithms include a digital phase-locked loop, a cross-product automatic frequency tracking loop, and extended Kalman filter, and finally, a fast Fourier transformation-aided cross-product frequency tracking loop. The tracking algorithms are compared on their frequency error performance and their ability to maintain lock during severe maneuvers at various carrier-to-noise ratios. The measured results are shown to agree with simulation results carried out and reported previously. Hinedi, S. and Statman, J. I. Jet Propulsion Laboratory...
