Destination Hope: A Travel Companion When Life Falls

Apart Marilyn Nutter, April White, 2021-09-28 Destination Hope: A Travel Companion When Life Falls Apart offers camaraderie and a beacon of hope for women who feel alone in loss, struggle, or change of circumstance. This book is not a self-help book filled with platitudes from people who think they have life figured out. Instead, Marilyn Nutter and April White link arms with the audience and encourage their readers through stories of their personal challenges in widowhood and chronic illness. Women are encouraged to see loss and hardship as part of life's journey and are reminded to turn their gaze upwards, to the Provider of Hope. Within the pages of Destination Hope comes a sisterhood, a bond, that is formed only through the mutual understanding of loss and the need to find hope in hard times. Destination Hope is arranged into six chapters called Milepost Markers, which address various losses, disappointments, or obstacles. Each entry concludes with a Rest Area for reflection and journaling. A Postcard with a quotation related to the topic sends readers off with an encouraging word, as they travel on towards their destination hope.

Horror Culture in the New Millennium Daniel W.

Powell, 2018-11-23 Horror Culture in the New Millennium surveys horror culture in the first two decades of the new millennium through a series of critical essays on the changing character of dark storytelling. It is a journey both into the complexity of the evolution of communication and the stories we tell about what it means to be human.

Emerging Pervasive Information and Communication

Technologies (PICT) Kenneth D. Pimple, 2013-08-26 This book provides a wide and deep perspective on the ethical issues raised by pervasive information and communication technology (PICT) -

small, powerful, and often inexpensive Internet-connected computing devices and systems. It describes complex and unfamiliar technologies and their implications, including the transformative potential of augmented reality, the power of location-linked information, and the uses of “big data,” and explains potential threats, including privacy invaded, security violated, and independence compromised, often through widespread and lucrative manipulation. PICT is changing how we live, providing entertainment, useful tools, and life-saving systems. But the very smartphones that connect us to each other and to unlimited knowledge also provide a stream of data to systems that can be used for targeted advertising or police surveillance. Paradoxically, PICT expands our personal horizons while weaving a web that may ensnare whole communities. Chapters describe particular cases of PICT gone wrong, but also highlight its general utility. Every chapter includes ethical analysis and guidance, both specific and general. Topics are as focused as the Stuxnet worm and as broad as the innumerable ways new technologies are transforming medical care. Written for a broad audience and suitable for classes in emerging technologies, the book is an example of anticipatory ethics – “ethical analysis aimed at influencing the development of new technologies” (Deborah Johnson 2010). The growth of PICT is outpacing the development of regulations and laws to protect individuals, organizations, and nations from unintended harm and malicious havoc. This book alerts users to some of the hazards of PICT; encourages designers, developers, and merchants of PICT to take seriously their ethical responsibilities – if only to “do no harm” – before their products go public; and introduces citizens and policy makers to challenges and opportunities that must not be ignored.

Geospatial Technologies and Geography Education in a Changing World Osvaldo Muñiz Solari,Ali Demirci,Joop van der Schee,2015-08-31 This book is an initiative presented by the Commission on Geographical Education of the International

Geographical Union. It focuses particularly on what has been learned from geospatial projects and research from the past decades of implementing geospatial technologies (GST) in formal and informal education. The objective of this publication is to inform an international audience of teachers, professionals, scholars, and policymakers about the state of the art and prospects of geospatial practices (GPs) as organized activities that use GST and lessons learned in relation to geographical education. GST make up an advanced body of knowledge developed by practitioners of geographic information systems (GIS), remote sensing (RS), global positioning systems, (GPS), and digital cartography (DC). GST have long been applied in many different sectors; however, their first use in higher education began in the early 1980s and then diffused to secondary schools during the 1990s. Starting with GIS and RS, it evolved into a much broader context, as GST expanded to include GPS and DC with new communication technologies and Internet applications. GST have been used around the world as a combination of tools and special techniques to make research, teaching, and learning more effective.
