Facebook Nation Newton Lee, 2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness – a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.

My Tech-Wise Life Amy Crouch, Andy Crouch, 2020-11-17 It's time to take our power back We can barely imagine our lives without technology. Tech gives us tools to connect with our friends, listen to our music, document our lives, share our opinions, and keep up with what's going on in the world. Yet it also tempts us to procrastinate, avoid honest conversations, compare ourselves with others, and filter our reality. Sometimes, it feels like our devices have a lot more control over us than we have over them. But it doesn't have to be that way. In fact, we deserve so much more than what technology offers us. And when we're wise about how we use our devices, we can get more--more joy, more connection, more out of life. Tech shouldn't get in the way of a life worth living. Let's get tech-wise.

Classroom Wars Natalia Mehlman Petrzela,2015-03-03 The schoolhouse has long been a crucible in the construction and contestation of the political concept of family values. Through Spanish-bilingual and sex education, moderates and conservatives in California came to define the family as a politicized and racialized site in the late 1960s and 1970s. Sex education became a vital arena in the culture wars as cultural conservatives imagined the family as imperiled by morally lax progressives and liberals who advocated for these programs attempted to manage the onslaught of sexual explicitness in broader culture. Many moderates, however, doubted the propriety of addressing such sensitive issues outside the home. Bilingual education, meanwhile, was condemned as a symbol of wasteful federal spending on ethically questionable curricula and an intrusion on local prerogative. Spanish-language bilingual-bicultural programs may seem less relevant to the politics of family, but many Latino parents and students attempted to assert their authority, against great resistance, in impassioned demands to incorporate their cultural and linguistic heritage into the classroom. Both types of educational programs, in their successful implementation and in the reaction they inspired, highlight the rightward turn and enduring progressivism in postwar American political culture. In *Classroom Wars*, Natalia Mehlman Petrzela charts how a state and a citizenry deeply committed to public education as an engine of civic and moral education navigated the massive changes brought about by the 1960s, including the sexual revolution, school desegregation, and a dramatic increase in Latino immigration. She traces the mounting tensions over educational progressivism, cultural and moral decay, and fiscal improvidence, using sources ranging from policy documents to student newspapers, from course evaluations to oral histories. Petrzela reveals how a growing number of Americans fused values about family, personal, and civic morality, which galvanized a powerful politics that engaged many Californians and, ultimately, many Americans. In doing so, they blurred the distinction between public and private and inspired some of the fiercest classroom wars in American history. Taking readers from the cultures of Orange County mega-churches to Berkeley coffeehouses, Natalia Mehlman Petrzela's history of these classroom controversies sheds light on the bitterness of the battles over diversity we continue to wage today and their influence on schools and society nationwide.
