Essential Biostatistics Harvey Motulsky, 2016 With its engaging and conversational tone, *Essential Biostatistics: A Nonmathematical Approach* provides a clear introduction to statistics for students in a wide range of fields, and a concise statistics refresher for scientists and professionals who need to interpret statistical results. It explains the ideas behind statistics in nonmathematical terms, offers perspectives on how to interpret published statistical results, and points out common conceptual traps to avoid. It can be used as a stand-alone text or as a supplement to a traditional statistics textbook.

Intuitive Biostatistics Harvey Motulsky, 2017-11-15 *Intuitive Biostatistics* takes a non-technical, non-quantitative approach to statistics and emphasizes interpretation of statistical results rather than the computational strategies for generating statistical data. This makes the text especially useful for those in health-science fields who have not taken a biostatistics course before. The text is also an excellent resource for professionals in labs, acting as a conceptually oriented and accessible biostatistics guide. With an engaging and conversational tone, *Intuitive Biostatistics* provides a clear introduction to statistics for undergraduate and graduate students and also serves as a statistics refresher for working scientists. --

Introduction to Research and Medical Literature for Health Professionals J. Glenn Forister, J. Dennis Blessing, 2015 *Introduction to Research and Medical Literature for Health Professionals*, Fourth Edition is included in the 2015 edition of the essential collection of Doody's Core Titles. *Introduction to Research and Medical Literature for Health Professionals*, Fourth Edition is an essential resource to help students, faculty, and practitioners understand the research process, interpret data, comprehend results, and incorporate findings into practice. From choosing a research project and developing the research process design, to systematically gathering information, analyzing, interpreting data, differentiating among conflicting results, and finally understanding the overall evaluation, *Introduction to Research and Medical Literature for Health Professionals*, Fourth Edition will help students and practitioners develop research skills to acquire and contribute knowledge that benefits their patients. NEW TO THE FOURTH EDITION NEW Chapter: Statistics in Health Care NEW Chapter: Systematic Reviews Heavily revised chapter on the regulatory protection of human subjects, providing readers with a comprehensive look at the workings of the institutional review board Completely rewritten chapter on qualitative research Learning Objectives at the beginning of each chapter, presenting the chapter's desired outcomes to the reader Instructor Resources: Instructor's Manual, Slides in PowerPoint format, Test Bank Each new print copy includes Navigate 2 Advantage Access that unlocks a comprehensive and interactive eBook, student practice activities and assessments, a full suite of instructor resources, and learning analytics reporting tools.

Fitting Models to Biological Data Using Linear and Nonlinear Regression Harvey Motulsky, Arthur Christopoulos, 2004-05-27 Most biologists use nonlinear regression more than any other statistical technique, but there are very few places to learn about curve-fitting. This book, by the author of the very successful *Intuitive Biostatistics*, addresses this relatively focused need of an extraordinarily broad range of scientists.

Health Information Technology Evaluation Handbook Vitaly Herasevich, MD, PhD, MSc, Brian W. Pickering, MD, MSc, 2017-10-24 Governments and clinical providers are investing billions of dollars in health information technologies. This is being done with the expectation that HIT adoption will translate into healthier patients experiencing better care at lower cost. As the first wave of adoption comes to an end, stakeholders are ready to evaluate the results of their investment and make decisions about future directions. As a result, structured evaluations of a project's impact are an essential element of the justification for investment in HIT. This book provides an easy-to-read reference outlining the basic concepts, theory, and methods required to perform a systematic evaluation of HIT.

Micropropagation of Orchids Tim Wing Yam, Joseph Arditti, 2017-07-05 Divided into three volumes, *Micropropagation of Orchids* Third Edition retains the exhaustive list of micropropagation protocols for many genera and updates each section to include new and/or revised information about:

Culture media and vessels Techniques and procedures for both orchids which were previously cultured and for those which were not Plant hormones and growth regulators Media components Methods for tissue decontamination Historical information Procedures for the cultivation for plantlets which have been removed from flasks Sources of light and illumination methods Written by two globally acknowledged experts in the field, the third edition of this definitive text on the micropropagation of orchids is a detailed and comprehensive collection of procedures and methods for multiplying orchids, including organ, tissue, and cell culture techniques in vitro and is intended for researchers in plant science and propagation, professional and amateur orchid growers, and plant breeding professionals. Much of the general information about techniques and procedures can be applied to plants other than orchids.

Understanding Organisational Culture in the Construction Industry Vaughan Coffey, 2010-01-28 Since the early 1980s, researchers and practitioners in the organisational and management fields have presumed a link between organisational, or corporate, culture and organisational performance. Whilst many believe this exists, other authors have been critical of the validity of such studies. Part of this doubt stems from a reliance on measures of organisational performance that are based purely on financial measures of business growth. Using the construction industry as the subject of his research, Vaughan Coffey traces the development of the literature on organisational culture and business effectiveness and investigates the culture-performance link using a new and highly objective measure of company performance and an evaluation of organisational culture, which is largely behaviourally-based. Providing a theoretical contribution to the field, this work shows that various cultural traits appear to be closely linked to objectively measured organisational effectiveness. This book will be valuable to professionals and researchers in the fields of management and public policy. It indicates directions for construction companies to develop and change, and in doing so strengthen their chances of remaining strong when opportunities for work might deplete and only the most successful companies will be able to survive.

Intuitive Biostatistics Harvey Motulsky, 2014 With an engaging and conversational tone, this unique book provides a clear introduction to statistics for undergraduate and graduate students in a wide range of fields and also serves as a statistics refresher for working scientists. Designed for consumers of statistical data, *Intuitive Biostatistics* is a non-mathematical guide to statistical thinking using minimal equations and including a detailed review of assumptions and common mistakes.

Evaluating Human Service Outcomes Reginald O. York, 2022-10-03 This all-in-one text assists human service practitioners, and the students of human service educational programs, in the evaluation of their practice with their clients. It takes readers through the entire research process, step by step, starting with the literature review on the nature of the behavior being served, to the development of their study methods, to the statistical analysis of data using the internet and, finally, to the drawing of conclusions based on the outcome study that was conducted. When readers complete this book, they will be prepared to conduct an outcome evaluation study and to present a report to their agencies or instructors. Key distinctions of this text include: guides for analysis of data using Excel, the internet or SPSS for statistical analysis of data; the separation of content into basic concepts and intermediate concepts for use in beginning and intermediate courses in human service research methods; an instructor's manual that offers outlines, lists, and test questions additional to those in the text; a student workbook with practice assignments for use in courses as well as a set of checklists that serve as a guide for various tasks in the research process; and objectives, summaries, and tests in all chapters. *Evaluating Human Service Outcomes* could be used as the basic text for a beginning course in human service research in educational programs in social work, counseling, and psychology where a major goal is to complete a research study. It could also be used as a supplemental text for advanced research courses that include the analysis of data. The text also should be of interest to human service practitioners who are working in programs funded by grants that require outcome evaluation.

Neutralizing Antibodies in the Prevention and Treatment of COVID-19 Peter Chen,Raymund Razonable,2022-06-27

Advance in Gluten-Free Diet Paolo Usai-Satta,2021-01-20 The only effective and safe treatment of celiac disease (CD) is a lifelong, strict exclusion of gluten, the so-called gluten-free diet (GFD). As a consequence, strict adherence to the GFD is highly successful and useful to achieve optimal control of symptoms in celiac patients, although, sometimes, nutritional problems can persist despite a strict exclusion of gluten. However, following a strict GFD is not easy and an updated quality assessment of available products is needed for further improvement in gluten-free product development. Similar to CD, GFD is the common dietary approach in non-celiac gluten/wheat sensitivity (NCGWS). NCGWS is another common gluten-related disorder without the diagnostic features of CD. Increasing interest in the association and interaction between irritable bowel syndrome (IBS), functional dyspepsia, and gluten-related disorders can expand our knowledge and understanding of the management of these disorders. In this respect, GFD is considered a therapeutic option in IBS and functional digestive disorders. New insights into the GFD are an exciting scientific challenge for researchers.

Cell-Free Nucleic Acids Bálint Nagy,2020-01-21 The deficits of mammography and the potential of noninvasive diagnostic testing using circulating miRNA profiles are presented in our first review article. Exosomes are important in the transfer of genetic information. The current knowledge on exosome-associated DNAs and on vesicle-associated DNAs and their role in pregnancy-related complications is presented in the next article. The major obstacle is the lack of a standardized technique for the isolation and measurement of exosomes. One review has summarized the latest results on cell-free nucleic acids in inflammatory bowel disease (IBD). Despite the extensive research, the etiology and exact pathogenesis are still unclear, although similarity to the cell-free ribonucleic acids (cfRNAs) observed in other autoimmune diseases seems to be relevant in IBD. Liquid biopsy is a useful tool for the differentiation of leiomyomas and sarcomas in the corpus uteri. One manuscript has collected the most important knowledge of mesenchymal uterine tumors and shows the benefits of noninvasive sampling. Microchimerism has also recently become a hot topic. It is discussed in the context of various forms of transplantation and transplantation-related advanced therapies, the available cell-free nucleic acid (cfNA) markers, and the detection platforms that have been introduced. Ovarian cancer is one of the leading serious malignancies among women, with a high incidence of mortality; the introduction of new noninvasive diagnostic markers could help in its early detection and treatment monitoring. Epigenetic regulation is very important during the development of diseases and drug resistance. Methylation changes are important signs during ovarian cancer development, and it seems that the CDH1 gene is a potential candidate for being a noninvasive biomarker in the diagnosis of ovarian cancer. Preeclampsia is a mysterious disease—despite intensive research, the exact details of its development are unknown. It seems that cell-free nucleic acids could serve as biomarkers for the early detection of this disease. Three research papers deal with the prenatal application of cfDNA. Copy number variants (CNVs) are important subjects for the study of human genome variations, as CNVs can contribute to population diversity and human genetic diseases. These are useful in NIPT as a source of population specific data. The reliability of NIPT depends on the accurate estimation of fetal fraction. Improvement in the success rate of in vitro fertilization (IVF) and embryo transfer (ET) is an important goal. The measurement of embryo-specific small noncoding RNAs in culture media could improve the efficiency of ET.

GPCR Molecular Pharmacology and Drug Targeting Annette Gilchrist,2010-12-10 G protein-coupled receptors (GPCRs) are a large protein

family of transmembrane receptors vital in dictating cellular responses. GPCRs are involved in many diseases, but are also the target of around half of all modern medicinal drugs. *Shifting Paradigms in G Protein Coupled Receptors* takes a look at the way GPCRs are examined today, how they react, how their mutations lead to disease, and the many ways in which they can be screened for compounds that modulate them. Chemists, pharmacologists, and biologists will find essential information in this comprehensive reference.

Handbook of Research on Educational Communications and Technology J. Michael Spector, M. David Merrill, Jan Elen, M. J. Bishop, 2013-07-03
The 4th edition of the *Handbook of Research on Educational Communications and Technology* expands upon the previous 3 versions, providing a comprehensive update on research pertaining to new and emerging educational technologies. Chapters that are no longer pertinent have been eliminated in this edition, with most chapters being completely rewritten, expanded, and updated. Additionally, new chapters pertaining to research methodologies in educational technology have been added due to expressed reader interest. Each chapter now contains an extensive literature review, documenting and explaining the most recent, outstanding research, including major findings and methodologies employed. The Handbook authors continue to be international leaders in their respective fields; the list is cross disciplinary by design and great effort was taken to invite authors outside of the traditional instructional design and technology community.

Nucleic Acid Aptamers Günter Mayer, Marcus M. Menger, 2022-09-26
This updated book reflects improvements in a variety of techniques used to study the aptamer field. Beginning with a section on selection procedures, the volume continues with methods to characterize aptamers' interaction and structural properties by biophysical approaches, as well as a variety of applications that have been adapted to the aptamer compound class. Written for the highly successful *Methods in Molecular Biology* series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step and readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and up-to-date, *Nucleic Acid Aptamers: Selection, Characterization, and Application, Second Edition* serves as an ideal guide for researchers aiming to further our understanding of aptamer biology and more.
