**Gravity** Joseph Midthun,2012-01-01 This graphic nonfiction book introduces the force of gravity and its effects on Earth and the universe. Each of the ten Building Blocks of Physical Science volumes features a whimsical character to guide the reader through a physical science topic. The science is as sound as the presentation is fun! The volumes include a glossary, an additional resource list, and an index. Several spreads in each volume are illustrated with photographs to help clarify concepts and facts.

*Quantum Gravity and Its Preponed Birth* Dr. Ashok Saxena, Er. Ashwarya Saxena, Er. Amit Saxena,2023-06-01 The Geometrical string theory TREO MODEL is a compelling theory that challenges our understanding of the universe. By introducing energy as the fifth dimension, the model transforms the traditional space-time continuum into an omnipresent space matrix with three interdependent components: Space, Time, and Energy. According to the model, the contraction of space causes kinetic energy to erupt, and time to slow down. As the matrix contracts layer by layer in increasing number of dimensions of Space-time, it forms the fields of all four basic forces, including gravity. While the figure on the front cover page, suggests that all bodies are pushed equally from all sides to be supported, the model proposes that when another body comes into the gravitational field of any body, both bodies get inadequate support from the common shared space matrix in between. This leads to the falling of bodies towards each other, which is perceived as the gravitational attraction of the other body.
