It is a study of ancient Greek views on the nature of the world's first society and first language, the source of language, the development of civilization and speech, and the relation between people's level of civilization and the kind of language they use. Discussions of later Western reflections on the origin and development of language and society, particularly during the Enlightenment, feature in the book, along with brief surveys of recent research on glottogenesis, the acquisition of language, and the beginnings of civilization.--BOOK JACKET.
