Singapore. Ministry of the Environment

Clean, Green and Blue Yong Soon Tan,Tung Jean Lee,Karen Tan,2009 When Singapore became a sovereign state in 1965, the fledgling nation faced very similar problems as most other developing countries: high unemployment, low standard of living, and poor environmental conditions. In a scant four decades, it has become the 6th wealthiest country in the world in terms of per capita GDP and has managed its environment so well that it is now considered to be one of the best in the world. In this remarkable book, Tan Yong Soon authoritatively and objectively analyses how the environmental conditions were radically transformed within this period, and the enabling conditions which made this extraordinary transformation possible. This book will unquestionably make all Singaporeans proud of their environmental achievements, and at the same time enable other countries, both developed and developing, to learn many lessons from a most remarkable success story. This book is a must read for any individual interested in environment-development issues. -Prof Asit K. Biswas, President, Third World Centre for Water Management, Mexico and Distinguished Visiting Professor, Lee Kuan Yew School of Public Policy, Singapore.

A City in Blue and Green Peter G. Rowe,Limin Hee,2019-08-30 This open access book highlights Singapore's development into a city in which water and greenery, along with associated environmental, technical, social and political aspects have been harnessed and cultivated into a liveable sustainable way of life. It is also a story about a unique and thoroughgoing approach to large-scale and potentially transferable water sustainability, within largely urbanized circumstances, which can be achieved, along with complementary roles of environmental conservation, ecology, public open-space management and the greening of buildings, together with infrastructural improvements.
