The Sustainable(ish) Guide to Green Parenting

Jen Gale, 2021-03-18 'The most family friendly way to start doing your bit.' - The Sunday Times The must-have friendly green bible of accessible eco-tips for families. As a parent, getting out of the house with everyone wearing shoes (on a good day) can feel like you're winning, so adding 'being green' to the never-ending to-do list might feel like the thing to bring all your spinning plates crashing to the ground. If that's the case, then this is the book for you. Instead you'll find easy, do-able ideas and suggestions for you to pick and choose from, try out and adapt. Plus bucketfuls of encouragement as you explore what works for you and your family. No preaching. No judgement. No guilt.

*Ideas and Actions in the Green Movement* Brian Doherty, 2005-07-05 The 'Western' green movement has grown rapidly in the last three decades: green ministers are in government in several European countries, Greenpeace has millions of paying supporters, and green direct action against roads, GM crops, the WTO and neo-liberalism, have become ubiquitous. The author argues that 'greens' share a common ideological framework but are divided over strategy. Using social movement theory and drawing on research from many countries, he shows how the green movement became more differentiated over time, as groups had to face the task of deciding what kind of action was appropriate. In the breadth of its coverage and its novel focus on the relationship between green ideas and action, this book makes an important contribution to the

understanding of green politics.

A Dictionary of Green Ideas John Button, 2019-06-21 First published in 1988. A Dictionary of Green Ideas collects together the concepts which go to make up a green view of the world. Ecology and the environment, conservation and appropriate technology, politics and philosophy, peace and health, spirituality and world development - all these areas and more are reflected in nearly 1500 entries. The entries range from the very short to full-length essays, reflecting the diversity of the subject matter. All give a clear definition of the meaning of the term and an indication of its etymology and earliest use. But the Dictionary of Green Ideas is much more than simply a list of definitions. The concepts discussed are elaborated upon, interpreted, set in context, exemplified by quotations from a wide range of sources, and related to other entries by means of an extensive network of cross-references. The result is a fascinating and immensely readable book which successfully fulfils a double role as an accessible introduction to green thought, and as a source of reference offering new insights to green thinkers of long standing.

Save the planet Natalia Marshall, 2011-04-06 The plight of the environment is never far from the headlines these days - sea levels are rising, mild winters are now commonplace, more and more species are becoming endangered, and we're throwing away so much rubbish we're running out of places to hide it. But where do we start when it comes to doing our bit? How do you reduce your carbon footprint, and what is one anyway? Natalia Marshall has spent the last few years working out exactly how she can have a lesser impact on the environment, and Save the planet is the culmination of her quest to do her bit for planet Earth. Save the planet is practical, inspiring and

contains 52 brilliant ideas to help everyone do their bit for the environment. From practical recycling tips to ideas on reducing your energy consumption, and from greener transport methods to clever tricks to save energy, time and money Save the planet has it all covered. Being cleaner and greener has never been easier!

### **All You Need Is Less** Madeleine

Somerville, 2014-04-15 All You Need is Less is about realistically adopting an eco-friendly lifestyle without either losing your mind from the soul-destroying guilt of using a plastic bag

because you forgot your reusable ones in the trunk of your car (again), or becoming a preachy know-it-all whom everyone loathes from the tips of her organically-shampooed hair to the toes of her naturally sourced recycled sandals. It's all gotten kind of complicated, hasn't it? These days you're not 'green' enough unless you quit your day job and devote your entire life to attaining an entirely carbon neutral lifestyle or throw out all of your possessions and replace them with their new 'green' alternatives. This whole eco-friendly thing seems to have devolved into a horrific cycle of guilt, shaming and one-upping, and as a result people are becoming exhausted and getting annoyed and, oh my god, we are living in a world where one of my grocery bags says 'This reusable bag makes me better than you.' It doesn't have to be this way. It is possible to take easy baby-steps towards a more earth-friendly lifestyle without stress, guilt, or judgy eco-shaming. Top eco blogger Madeleine Somerville is here with really original ideas on how to save money and the planet. Her ideas are even fun! Somerville has emerged as the voice of reason on urban homesteading that is stress-free, sanity-based and above all do-able--
