**The Feature Film Distribution Deal** John W. Cones, 1997 John W. Cones, whose real goal is to stimulate a long-term film industry reform movement, shows how the financial control of the film industry in the hands of the major studios and distributors actually translates into creative control of the industry. Cones discusses the pros and cons of the debate relating to the industry's so-called net profit problem and the way in which the distribution deal plays an integral part in that problem. He then breaks down five major film finance/distribution scenarios, explaining various distribution deals and suggesting ways of negotiating distribution. Critically examining the specific terms of the distribution deal itself, Cones covers gross receipts exclusions, distributor fees, and distribution expenses. He also investigates the various forms of interest, issues of production costs, matters of creative control, and general contractual provisions. For handy reference, Cones includes an extensive checklist for negotiating any feature film distribution deal. The list deals with distribution fees, distribution expenses, interest, production costs, creative control issues, general contractual provisions, distributor commitments, and the limits of negotiating. His nine appendixes present a Motion Picture Industry Overview, Profit Participation Audit Firms, ADI (Top 50) Market Rankings, an AFMA Member List, 1992-1993, a Production-Financing/Distribution Agreement, a Negative Pickup Distribution Agreement, a Distribution Rights Acquisition Agreement, a Distribution Agreement (Rent-a-Distributor Deal), and a Foreign Distribution Agreement. Cones wrote this book for independent producers, executive and associate producers and their representatives, directors, actors, screenwriters, members of talent guilds, distributors, and entertainment, antitrust, and securities attorneys. Securities issuers and dealers, investment bankers, and money finders, investors, and financiers of every sort also will be interested. In addition, Cones suggests and hopes that the book will interest Congress, their research staff, government regulators at the Internal Revenue Service, the Securities and Exchange Commission, the Federal Trade Commission, and law enforcement officials such as the Los Angeles District Attorney and the U.S. Justice Department.

*Crapped Out* Jennifer Vogel,1997 As the economy sours for people at the bottom, the long odds have become their only odds for making a better life. In this stunning collection of articles from US News and World Report, Newsday, the Nation and elsewhere, Jennifer Vogel has assembled an indictment of gambling that leaves nothing to chance. In *Crapped Out: How Gambling Ruins the Economy and Destroys Lives* you will meet: -- The state politician, desperate to balance the budget, who turns to the gaming industry to generate revenue in the age of the shrinking tax base; -- The lottery commissions, who will tell you they never target the poor, but who sell more tickets proportionately to lower income players, creating the most regressive tax system imaginable; -- The voter who is promised money from gambling for schools and the environment but winds up empty-handed; -- The advertising industry that is not legally bound to tell players what a rip-off the games are. -- The mob who is thriving at the numbers game once again -- because players realize organized crime offers better odds than state lotteries ; -- The casino owners -- who are in it to win it; -- And the gambler, whose need for hope is manipulated by an industry feeding on the science of addiction. -- But Vogel also chronicles the sober response of neighbors fighting casino developments -- and

winning.

**Blitzscaling** Reid Hoffman, Chris Yeh, 2018-10-09 Foreword by Bill Gates LinkedIn cofounder, legendary investor, and host of the award-winning Masters of Scale podcast reveals the secret to starting and scaling massively valuable companies. What entrepreneur or founder doesn't aspire to

build the next Amazon, Facebook, or Airbnb? Yet those who actually manage to do so are exceedingly rare. So what separates the startups that get disrupted and disappear from the ones who grow to become global giants? The secret is blitzscaling: a set of techniques for scaling up at a dizzying pace that blows competitors out of the water. The objective of Blitzscaling is not to go from zero to one, but from one to one billion –as quickly as possible. When growing at a breakneck pace, getting to next level requires very different strategies from those that got you to where you are today. In a book inspired by their popular class at Stanford Business School, Hoffman and Yeh reveal how to navigate the necessary shifts and weather the unique challenges that arise at each stage of a company's life cycle, such as: how to design business models for igniting and sustaining relentless growth; strategies for hiring and managing; how the role of the founder and company culture must evolve as the business matures, and more. Whether your business has ten employees or ten thousand, Blitzscaling is the essential playbook for winning in a world where speed is the only competitive advantage that matters.
