Radiologic Science for Technologists E-Book Stewart C. Bushong, 2020-12-02 Develop the skills you need to produce diagnostic-quality medical images! Radiologic Science for Technologists: Physics, Biology, and Protection, 12th Edition provides a solid foundation in the concepts of medical imaging and digital radiography. Featuring hundreds of radiographs and illustrations, this comprehensive text helps you make informed decisions regarding technical factors, image quality, and radiation safety for both patients and providers. New to this edition are all-digital images and the latest radiation protection standards and units of measurement. Written by noted educator Stewart Carlyle Bushong, this text will prepare you for success on the ARRT® certification exam and in imaging practice. Broad coverage of radiologic science topics includes radiologic physics, imaging, radiobiology, and radiation protection, with special topics including mammography, fluoroscopy, spiral computed tomography, and cardiovascular interventional procedures. Objectives, outlines, chapter introductions, and summaries organize information and emphasize the most important concepts in every chapter. Formulas, conversion tables, and abbreviations provide a quick reference for frequently used information, and math equations are always followed by sample problems with direct clinical application. Key terms are bolded and defined at first mention in the text, with each bolded term included in the expanded glossary. Math formulas are highlighted in special shaded boxes for quick reference. Penguin icons in shaded boxes represent important facts or bits of information that must be learned to understand the subject. End-of-chapter questions help students review the material with definition exercises, short-answer questions, and calculations. Student workbook reinforces understanding with worksheets that complement the content covered in the text. Available separately. NEW! Updated content reflects the newest curriculum standards outlined by the ARRT® and ASRT. NEW! All images are digital, following current radiology practice. NEW! Updated radiation protection standards and units of measurement are incorporated throughout the text. NEW! Streamlined physics and math sections focus on the essential content to ensure student technologists are prepared to take the ARRT® exam and have the background needed to perform well in the clinical environment. NEW! Increased alignment of chapter objectives with the ASRT core curriculum helps students focus on need-to-know content in preparation for the Registry exam and for clinical success.

The Valley of Hope David N. Sanders, 2012-08-15 Set in the early 1970s, The Valley of Hope follows a group of expatriates, predominately Americans and Australians, who are engaged at the forefront of Indonesia's ambitious quest for petroleum riches. They work for the Indonesian company NUKI—Nusa Udara Kisaran Indonesia (Island Helicopters Indonesia)—the largest helicopter operator in Indonesia. It operates a fleet of venerable Huey helicopters of Vietnam War fame—the same helicopter that is being featured daily, along with body-counts from the war, on prime-time TV. For the multitude of oil field workers and support personnel manning the rigs in the interior of Borneo, the Huey is their only link to civilization and perhaps their only chance for survival if they became injured or afflicted with illness. The Huey is both life and death. Due to the rigorous demands on both the flight crews and the aircraft, accidents are a frequent occurrence. Most NUKI employees approach life with a lighthearted attitude and strive to do everything possible to make their existence in Indonesia more enjoyable. Even so, some of them are in the process of coming to terms with the traumas of their wartime experiences, while others are dealing with relationship problems. The Valley of Hope provides glimpses of Indonesian customs and culture that help to explain how decades of endemic corruption have resulted in the turmoil and political instability that is shattering Indonesia today.

**Flying the Archipelago** Ewart Hinkson, 2008-03 A career in aviation is intriguing to many, but what is it really like? In his fascinating memoir, Ewart Franklin Hinkson peels back the mysterious layers of air traffic control and aeroplane maintenance as he shares his often humorous experiences as a commercial pilot within the Caribbean Archipelago. Born and raised on the beautiful island of St. Lucia, Hinkson was introduced to aviation at a young

age which sparked a life-long interest in flying. After migrating to Canada to further his studies, Hinkson describes his efforts to acquire a commercial pilot's license and his subsequent entrepreneurial adventure as the owner and manager of a small air-taxi service. Intertwined with Hinkson's own tales about his travels above the magical Caribbean Sea is the true story of how political interference is stifling the growth of both the aviation and the tourist industry, causing the region to lose millions of dollars and repressing economic development. In this exciting mix of pilot anecdotes and stories of political deception, one man proves that his belief in himself and his values is what helped him achieve his dreams in the big, blue skies over the Caribbean.
