Building Skins Christian Schittich, 2006-01-01 The external facades of a building are more than a protective mantle, or an intelligent skin regulating temperature and light, they also determine its very appearance. By unusual choices of materials and the use of complex technology, facades have become increasingly significant in recent years. External surfaces are being perceived as an integral part of the building and are therefore being designed as such. This volume focuses on the wide-ranging aspects of facade design, from the selection and use of materials to the advanced technical possibilities now open to the architect. A wide array of carefully selected international examples show the theory in the practice. All plans, details, and large scale sections of the facades have been researched with the high degree of competence typical of the editorial staff from the review Detail. Expert authors provide the essential information needed to plan and design facades and elucidate on the latest developments in technology and materials.

The Future of Architecture Since 1889 Jean-Louis Cohen, 2016-10-03 The highly acclaimed history of the architecture of the twentieth century and beyond - now in paperback Jean-Louis Cohen, one of the world's leading architectural historians, serves up a compelling account of the developments that have shaped the world in which we live today. This highly accessible book begins with the Paris Universal Exposition of 1889, tracing architecture's evolution to the early twenty-first century's globalized architectural culture. Illustrated with hundreds of drawings and photographs as well as portraits, publications, diagrams, film stills, and more, this survey places radical developments in architecture in a larger context, among those of art, technology, urbanism, and critical theory.

Computer Integrated Manufacturing Roger G. Hannam,1996 An introductory text to CIM in both its engineering and management context. It shows how modern concepts can be related within an integrated environment. Features include: CAD/CAM, data communications/networks; case studies; and a bibliography/glossary.

Architectural Publications Index ,1999

Annotated Bibliography on Child Labour ,2003 The aim of this bibliography on child labour was to assemble the best of the rapidly increasing literature and research material in recent years and make it accessible. The focus is from 1995 to 2002 although a few authoritative earlier sources have been included. Three basic selection criteria were applied: the material had to be considered representative; relevant and to present sources that had been previously overlooked.

Industrial Psychology Joseph Tiffin,Ernest James McCormick,1968

The Insect Viruses Lois K. Miller,L. Andrew Ball,2012-12-06 There are over a million different species of insects, and individually they 8 outnumber humans by more than 10 to 1. Moreover, some insects live in close association with both plants and higher animals and naturally exchange viruses with them. It has even been speculated that viruses in general may have radiated through the plant and animal kingdoms from common insect origins. Be that as it may, since insects play pivotal roles in the biosphere, both to the benefit and detriment of mankind, they and the viruses that infect them are important subjects for study. Insects are infected by a diverse medley of viruses, and this volume focuses on those insect virus families that are found primarily or exclusively in insects. All major families of insect-selective viruses are covered except for the baculo viruses, which were described in a separate volume of The Viruses series. Included in this volume are the established families of insect viruses, the newly recognized ascovirus family, and the nudiviruses, which probably represent

a separate family but currently remain unclassified. The coverage of arboviruses is limited to a single chapter that focuses on their potential utility as vectors and in insect control. Omitted for practical reasons are several individual insect viruses that have been described sporadically in the literature and probably represent novel virus families.

Race, Racism and Psychology Graham Richards,2003-09-02 Topics with racial implications have been hotly debated in the psychological literature for most of this century and are often in the news. Graham Richards takes a historical look at how the concepts of race and racism emerged within the discipline and charts the underlying premises of some famous studies in their social and political contexts. No-one is allowed to be objective in this arena, as opponents will always argue that they are not. This account is bound therefore to be controversial and excite interest whether or not readers agree with Richards' stance.

Adoptive Families in a Diverse Society Katarina Wegar,2006 Adoptive Families in a Diverse Society brings together twenty-one prominent scholars to explore the experience, practice, and policy of adoption in North America. While much existing literature tends to stress the potential problems inherent in non-biological kinship, the essays in this volume consider adoptive family life in a broad and balanced context. Bringing new perspectives to the topics of kinship, identity, and belonging, this path-breaking book expands more than our understandings of adoptive family life; it urges us to rethink the limits and possibilities of diversity and assimilation in American society.

'Honour' Lynn Welchman,Sara Hossain,2013-07-04 This volume brings together the practical

insights and experiences of individuals and organisations working in diverse regions and contexts to combat 'crimes of honour'. Authors examine strategies of response to such manifestations of violence against women, focusing largely on 'honour killings' and interference with the right to choice in marriage, and the related use and legal treatment of the defence of 'honour' and 'provocation' in different countries of Europe, the Middle East, Latin America and South Asia. This timely volume is distinctive in approach and content, highlighting activist and practice-orientated academic perspectives from both the South and the North. The authors give voice to the struggle to locate 'crimes of honour' firmly within the international framework of violence against women and human rights, rather than positioning these abuses as specific to particular cultures or communities. The first of its kind, this book serves as a resource in addressing 'honour crimes' and, more broadly, violence against women, and will be of interest to a multi-disciplinary academic audience as well as to lawyers, policy-makers and activists.

Bibliometrics in Social Work Gary Holden, Gary Rosenberg, Kathleen Barker, 2013-01-11

Bibliometrics in Social Work examines the cross-disciplinary field of bibliometrics, including the multiple techniques and applications that have been described in the scholarly literature. Moving beyond this general overview, the authors examine applications of bibliometrics in social work. Subsequent chapters detail how the technique can be used to demonstrate the eventual impact on the field of publications in selected journals. These analyses are conducted using the bibliometric technique referred to as citation analysis. The authors then move on to present what will be a controversial proposal to some in the field: using bibliometrics techniques in making academic personnel decisions. The authors propose that hiring, retention, tenure and promotion decisions

could be made more uniform and fair by using citation analysis. A series of experts in bibliometric analyses then critically respond to these initial chapters. The authors conclude by weaving their responses to these commentators with new scholarship on bibliometrics that has recently appeared. This unique book is a valuable aid for social work scholars. Drawing on broad interdisciplinary streams of scholarship from around the world, the collection illuminates a field that is not well known to social workers. While cautiously advocating for a number of applications of the technique, the authors balance this position by presenting a comprehensive summary of the criticisms of the technique and by the inclusion of a series of critical commentaries by the leading experts on these issues in the field of social work. *Bibliometrics in Social Work* both summarizes what we know and pushes the field to think about how social work professionals can use this approach to improve our scholarship and the evaluation of scholars. *Bibliometrics in Social Work* addresses: theoretical and methodological issues pros and cons from the view of numerous bibliometric scholars bibliometrics outside of social work applications within social work previously reported in the literature estimates that have been reported in the literature of how much social workers publish and how much impact those publications have had how citation analysis can be used to analyzed a selection of publications in a single journal and their subsequent impact how citation analysis might be used to improve academic employment decisions concerns regarding self-citation and multiple authorship measurement issues in bibliometrics (e.g., age adjustments; concentration citedness, and uncitedness; the Price Index; lag times; persistence; synchronous and diachronous self-citations; the Multiple Author Qualifier) *Bibliometrics in Social Work* critically examines these methods and their applications in social work. The book will be an enlightening read for social work scholars and those academic administrators involved in the evaluation of social work scholars, as well as academic

librarians that support social work programs.

Aids Peter Aggleton, Peter Davies, Graham Hart, 2003-09-02 Some 12 years into the epidemic, with an effective preventive vaccine or therapy against HIV disease still to be found, this book reflects on the contributions of social and behavioural research to the development of interventions for prevention. After over a decade's work documenting HIV and AIDS-related knowledge, attitudes and behaviour, social researchers have begun to focus more clearly on perceptions of sexual safety and risk, and the factors that contribute to these. The issues addressed by the book were examined during three major conferences in 1994: the annual conference of the British Sociological Association, the 2nd International Conference on the BioPsychoSocial Aspects of AIDS and the Xth International Conference on AIDS. The book brings together key papers presented at each of these conferences, documenting issues of focal concern to social researchers, policy makers and health educators in the mid-1990s.

Surgical Retina Francesco Bandello, Maurizio Battaglia Parodi, 2012 An update on the essentials of retina surgery In the new book series 'ESASO Course Series', the essentials of the courses of the European School for Advanced Studies in Ophthalmology (ESASO) are made available to interested ophthalmologists, optometrists, technicians and residents all over the world. In this volume, the seminars on surgical retina presented by renowned experts during ESASO's activities are collected. Many specialists have contributed their knowledge to make this volume a device to give practical support. The topics range from prevention to state-of-the-art diagnostic techniques and the latest surgical treatment options for many eye conditions such as diabetic retinopathy and rhegmatogenous retinal detachment. This publication provides the ophthalmologist with the main aspects of surgical retina in a simple and practical update.

Actions and Structure Nigel Fielding, 1988-10 Social scientists have always recognised a divergence between approaches which emphasise the constraining power of social structure and those which interpret society through the cumulative effects of actions of individuals. In recent years there has been renewed interest in the latter through the micro-sociology of everyday life. Social scientists are now taking stock of the implications of micro-sociological research for the analysis of structure and the macro-level theory of society. In *Actions and Structure* the value of micro-sociological research for the analysis of social order is assessed. Individual chapters evaluate new research approaches from discourse and conversational analysis, mathematical, interactionist and phenomenol
