**Compound Semiconductors 1996, Proceedings of the Twenty-Third INT Symposium on Compound Semiconductors held in St Petersburg, Russia, 23-27 September 1996** M.S. Shur,2020-10-28 Providing a comprehensive overview of developments to both the academic and industrial communities, Compound Semiconductors 1996 covers all types of compound semiconducting materials and devices. The book includes results on blue and green lasers, heterostructure devices, nanoelectronics, and novel wide band gap semiconductors. With invited review papers and research results in current topics of interest, this volume is part of a well-known series of conferences for the dissemination of research results in the field.

**Methods in Protein Sequence Analysis** Brigitte Wittmann-Liebold,2012-12-06 Methods in Protein Sequence Analysis - 1988 - contains selected contributions on modern protein- analytical techniques as presented by speakers at the Seventh International Conference on Methods in Protein Sequence Analysis, held from July 3rd to July 8th, 1988 in Berlin. The book contains information on new methodologies for sensitive amino acid analysis, N- and C-terminal sequence analysis, and protein and peptide purification. In addition recent mass spectrometric approaches are described, as an alternative technique to the common stepwise degradative sequence analysis of polypeptides by the Edman method. The book presents new possibilities in the design of sequencers and sophisticated equipment for the structural analysis of peptides and proteins. It describes practical approaches for the investigation of protein domains and protein complexes, and contains review chapters on the crystallization of cell organelles as well as on recent theoretical aspects of protein folding mechanisms. The nature of protein folding is not yet understood, but further advances in this area would greatly enhance our present knowledge of protein structure and function. Further, the book gives examples of the application of gene technology to protein characterization and to the design of new proteins. This enables new studies on the structure and function of proteins to be made, and opens up efficient approaches to the design of drugs.
