Numerical Methods for Engineers and Scientists Using MATLAB® Ramin S. Esfandiari,2017-04-25
This book provides a pragmatic, methodical and easy-to-follow presentation of numerical methods and their effective implementation using MATLAB, which is introduced at the outset. The author introduces techniques for solving equations of a single variable and systems of equations, followed by curve fitting and interpolation of data. The book also provides detailed coverage of numerical differentiation and integration, as well as numerical solutions of initial-value and boundary-value problems. The author then presents the numerical solution of the matrix eigenvalue problem, which entails approximation of a few or all eigenvalues of a matrix. The last chapter is devoted to numerical solutions of partial differential equations that arise in engineering and science. Each method is accompanied by at least one fully worked-out example showing essential details involved in preliminary hand calculations, as well as computations in MATLAB.

The Writing System of Scribe Zhou Haeree Park,2016-02-22 This book investigates the nature of

regional variation in the early Chinese writing system through bamboo manuscripts and inscriptions dating from the late pre-imperial China (5th-3rd centuries BCE). Diachronic and synchronic comparisons of graphic details show that none of the well-recognized regional varieties developed independently from one another. Furthermore, differences in graphic components can be accounted for as alternations of graphs that are compatible in their semantic or phonetic values. The phonological systems underlying various regional orthographies unanimously point to a single coherent sound system with some mixture of dialect pronunciations. This strongly suggests that all the late pre-imperial regional scripts derived from a kind of orthographic meta-system based on one spoken standard language. This orthography and its phonological systems should reasonably be dated to ca. 9th century BCE, just about the time when the earliest known Chinese lexicography Book of Scribe Zhou (ca. 830 BCE) was written. The conclusions of this book have further implications on reading and understanding manuscript texts in general as well as on using them as data for linguistic studies.

Life, Temperature, and the Earth David W. Schwartzman,1999 Life, Temperature, and the Earth analyzes and modifies important aspects of the Gaia hypothesis in light of geochemical, geophysical, mathematical, and paleontological data that were either ignored or unavailable when the hypothesis was developed. Schwartzman argues that the Earth's climatic temperature has been biologically regulated amid the backdrop of variable volcanic outgassing and an evolving sun.
Stop Guessing Nat Greene,2017-04-03 Illustrated with examples ranging from everyday issues to serious problems, this book will help you understand the behaviors that great problem-solvers use to tackle the hardest problems with skill and panache, regardless of the industry or nature of the problem. --
