All Fourths: A Method For EADGCF Tuning On Guitar Masaya Yamaguchi, 2018-03-12 New Guitar Method utilizing all fourths tuning (E, A, D, G, C, F - low to high). If I was starting to learn to play the guitar today, and somebody gave me a guitar today, I'd tune it in straight fourths without a doubt. Just like the six-string bass, 'cause to find that B string is a pain, and it's unnecessary, 'cause you play ... you know ... there's only a few of us that go around bashing out power chords anymore, so you don't need that anyway, so if I was to learn again, it's just that it's been so many years trying to beat the B string that I can't go and un-beat it. --Allan Holdsworth

*Tuning, Timbre, Spectrum, Scale* William A. Sethares, 2013-06-05 *Tuning, Timbre, Spectrum, Scale* focuses on perceptions of consonance and dissonance, and how these are dependent on timbre. This also relates to musical scale: certain timbres sound more consonant in some scales than others. Sensory consonance and the ability to measure it have important implications for the design of audio devices and for musical theory and analysis. Applications include methods of adapting sounds for arbitrary scales, ways to specify scales for nonharmonic sounds, and techniques of sound manipulation based on maximizing (or minimizing) consonance. Special consideration is given here to a new method of adaptive tuning that can automatically adjust the tuning of a piece based its timbral character so as to minimize dissonance. Audio examples illustrating the ideas presented are provided on an accompanying CD. This unique analysis of sound and scale will be of interest to physicists and engineers working in acoustics, as well as to musicians and psychologists.

*Classical Guitar Making* John S. Bogdanovich, 2007 Renowned luthier John S. Bogdanovich crafted the project shown inside for his own personal use. In close-up photographs Bogdanovich invites you to stand by his side and follow the entire process from start to finish. He offers guidance through every step, and explains every decision, from the arrangement of his workbench and the selection of the wood, to tuning and setting up the instrument. Bogdanovich also provides a choice of alternative methods and materials -- to help you find your own style of working, and to enable you to add your personal touches to

your project. By the time your instrument is finished, you'll have acquired a world of knowledge, from the difference between quartersawn and flat-sawn wood to the pros and cons of lacquer versus French polish.
