My Life and Work Henry Ford, Samuel Crowther, 1923 *My Life and Work* is a classic autobiography of the great American business mogul, Henry Ford. Henry Ford (July 30, 1863 - April 7, 1947) was an American industrialist, the founder of the Ford Motor Company, and sponsor of the development of the assembly line technique of mass production. Although Ford did not invent the automobile or the assembly line, he developed and manufactured the first automobile that many middle class Americans could afford. This is his story in his own words. Although Ford did not invent the automobile or the assembly line, [1] he developed and manufactured the first automobile that many middle-class Americans could afford. In doing so, Ford converted the automobile from an expensive curiosity into a practical conveyance that would profoundly impact the landscape of the 20th century. His introduction of the Model T automobile revolutionized transportation and American industry. As the owner of the Ford Motor Company, he became one of the richest and best-known people in the world. He is credited with Fordism mass production of inexpensive goods coupled with high wages for workers. Ford had a global vision, with consumerism as the key to peace. His intense commitment to systematically lowering costs resulted in many technical and business innovations, including a franchise system that put dealerships throughout most of North America and in major cities on six continents. Ford left most of his vast wealth to the Ford Foundation and arranged for his family to

control the company permanently. Ford was also widely known for his pacifism during the first years of World War I, and for promoting antisemitic content, including The Protocols of the Elders of Zion through his newspaper The Dearborn Independent and the book The International Jew. Henry Ford was born July 30, 1863, on a farm in Greenfield Township, Michigan.[2] His father, William Ford (1826-1905), was born in County Cork, Ireland, to a family that was originally from Somerset, England.[3] His mother, Mary Ford (née Litogot; 1839-1876), was born in Michigan as the youngest child of Belgian immigrants; her parents died when she was a child and she was adopted by neighbors, the O'Herns. Henry Ford's siblings were Margaret Ford (1867-1938); Jane Ford (c. 1868-1945); William Ford (1871-1917) and Robert Ford (1873-1934). His father gave him a pocket watch in his early teens. At 15, Ford dismantled and reassembled the timepieces of friends and neighbors dozens of times, gaining the reputation of a watch repairman.[4] At twenty, Ford walked four miles to their Episcopal church every Sunday.[5] Ford was devastated when his mother died in 1876. His father expected him to eventually take over the family farm, but he despised farm work. He later wrote, I never had any particular love for the farm--it was the mother on the farm I loved.[6] In 1879, Ford left home to work as an apprentice machinist in Detroit, first with James F. Flower & Bros., and later with the Detroit Dry Dock Co. In 1882, he returned to Dearborn to work on the family farm, where he became adept at operating the Westinghouse portable steam engine. He was later hired by Westinghouse to

service their steam engines. During this period Ford also studied bookkeeping at Goldsmith, Bryant & Stratton Business College in Detroit.

Developing Agility and Quickness NSCA -National Strength & Conditioning Association,Jay Dawes,Mark Roozen,2011-10-10 The ball handler who fakes and then drives past a defender for an easy score. A pass rusher who leaves a would-be blocker in his wake on the way to sacking the quarterback. A setter who manages to maneuver both body and ball in the blink of an eye to make the perfect pass for the kill and match-winning point. These are all reasons agility and quickness are such prized physical attributes in modern sport. Efforts to become markedly quicker or more agile, however, aren't always successful. Genetic limitations, technical deficiencies, and inferior training activities are among the major obstacles. Developing Agility and Quickness helps athletes blow past those barriers thanks to the top sport conditioning authority in the world, the National Strength and Conditioning Association. NSCA hand-picked its top experts to present the best training advice, drills, and programs for optimizing athletes' linear and lateral movements. Make Developing Agility and Quickness a key part of your conditioning program, and get a step ahead of the competition.

Medications for Opioid Use Disorder Save Lives National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on

Health Sciences Policy, Committee on Medication-Assisted Treatment for Opioid Use Disorder, 2019-06-16 The opioid crisis in the United States has come about because of excessive use of these drugs for both legal and illicit purposes and unprecedented levels of consequent opioid use disorder (OUD). More than 2 million people in the United States are estimated to have OUD, which is caused by prolonged use of prescription opioids, heroin, or other illicit opioids. OUD is a life-threatening condition associated with a 20-fold greater risk of early death due to overdose, infectious diseases, trauma, and suicide. Mortality related to OUD continues to escalate as this public health crisis gathers momentum across the country, with opioid overdoses killing more than 47,000 people in 2017 in the United States. Efforts to date have made no real headway in stemming this crisis, in large part because tools that already exist—like evidence-based medications—are not being deployed to maximum impact. To support the dissemination of accurate patient-focused information about treatments for addiction, and to help provide scientific solutions to the current opioid crisis, this report studies the evidence base on medication assisted treatment (MAT) for OUD. It examines available evidence on the range of parameters and circumstances in which MAT can be effectively delivered and identifies additional research needed.

Pioneer Families of the Midwest Blanche Lea Walden, 2009-06 This important, albeit scarce, three-volume collection of family histories pertaining to persons who migrated to the Midwest during the last quarter of the eighteenth or first quarter of the nineteenth century is now available in a consolidated edition. Mrs. Walden, who privately published these genealogies between 1939 and 1941, has here bridged the earliest known records pertaining to each family so that future researchers might be able to trace their lines with less difficulty. Although the Clearfield edition lacks an index to the work as a whole, a complete name index to Volumes 1 and 2 can be found at the end of the second volume. In all, the reader will find about 150 allied families and some 7,500 Midwestern pioneers treated within these pages. Listed below are the main families covered by Mrs. Walden together with the states in which they settled: Harper of OH, PA, MO, and MI; Rainey of OH, IN, IL, MI, MO, KS; Boal of OH, IA, MI, MN, IN, IL, and WI; Hope of VA, OH, MO, WI, OR, WV, and IN; Dewees of DE, PA, OH, IN, IL, and IA; Francis of OH, NY, IA, and OK; Smith of NJ, OH, IN, IL, IA, and CA; Dorr of CT, OH, IN, IL, KS, NE, and CA; Coe of CT, OH, IN, and IA; Fuller of CT, OH, IN, and MO; Allen of CT, OH, KS, and IL; Pratt of CT and OH; Davis of NH, ME, OH, IN, and IA; True of NH, OH, IA, and MO; Argo of DE, OH, IL, and IA; and Plumly of PA, OH, and IA.
