Hitler, the Germans, and the Final Solution Ian Kershaw,2008-05-28 This volume presents a comprehensive, multifaceted picture both of the destructive dynamic of the Nazi leadership and of the attitudes and behavior of ordinary Germans as the persecution of the Jews spiraled into total genocide.

Popular Opinion and Political Dissent in the Third Reich, Bavaria 1933-1945 Ian Kershaw,2002 Now updated with a new introduction and bibliography Ian Kershaw's classic study of popular responses to Nazi policy and ideology explores the political mentality of 'ordinary Germans' in one part of Hitler's Reich. Basing his account on many unpublished sources, the author analysessocio-economic discontent and the popular reaction to the anti-Church and anti-Jewish policies of the Nazis, and reveals the bitter divisions and dissent of everyday reality in the Third Reich, in stark contrast to the propaganda image of a 'National Community' united behind its leaders. The focuson one particular region makes possible a depth of analysis that takes full account of local and social variations, and avoids easy generalization; but the findings of this study of ordinary behaviour in a police state have implications extending far beyond the confines of Bavaria or indeed Germanyin this period.

Simon Marius and His Research Hans Gaab,Pierre Leich,2019-06-19 The margravian court astronomer Simon Marius, was involved in all of the new observations made with the recently invented telescope in the early part of the seventeenth century. He also discovered the Moons of Jupiter in January 1610, but lost the priority dispute with Galileo Galilei, because he missed to publish his findings in a timely manner. The history of astronomy neglected Marius for a long time, finding only the apologists for the Copernican system worthy of attention. In contrast the papers presented on the occasion of the Simon Marius Anniversary Conference 2014, and collected in this volume, demonstrate that it is just this struggle to find the correct astronomical system that makes him particularly interesting. His research into comets, sunspots, the Moons of Jupiter and the phases of Venus led him to abandon the Ptolemaic system and adopt the Tychonic one. He could not take the final step to heliocentricity but his rejection was based on empirical arguments of his time. This volume presents a translation of the main work of Marius and shows the current state of historical research on Marius.

Jewish Cattle Traders in the German Countryside, 1919-1939 Stefanie Fischer,2024-03-05 Jewish Cattle Traders in the German Countryside, 1919-1939, explores the social and economic networks in which this group operated and the informal but durable bonds between Jewish cattle traders and farmers that not even incessant Nazi attacks could break. Stefanie Fischer combines approaches from social history, economic history, and sociology to challenge the longstanding cliché of the shady Jewish cattle dealer. By focusing on trust and social connections rather than analyzing economic trends, Fischer exposes the myriad inconsistencies that riddled the process of expelling the Jews from Germany. Jewish Cattle Traders in the German Countryside, 1919-1939, examines the complexities of relations between Jews and non-Jews who were engaged in economic and social exchange. In the process, Fischer challenges previous understandings of everyday life under Nazi rule and discovers new ways in which Jewish agency acted as a critical force throughout the exclusionary processes that took place in Hitler's Germany.

The Combat History of German Heavy Anti-Tank Unit 653 in World War II Karlheinz Münch,2022-03-15 German Heavy Anti-Tank Unit 653 was equipped with the heaviest tank destroying vehicles of the German armed forces. Initially activated as an assault gun battalion and redesignated in April 1943, the 653 received its first Ferdinand heavy tank destroyers (later modified and renamed Elephants) in May 1943 and went into action on the Eastern Front a month later. In 1944, the unit converted to the even more massive Jagdtiger. The seventy-five-ton, heavily armored Jagdtiger was the behemoth of the battlefield and boasted a 128mm gun-as opposed to the Ferdinand's 88-with a range of more than thirteen miles, making it deadly despite its limited mobility. Outfitted with these lethal giants, the 653 saw service in Russia, Italy, Austria, and Germany. The Combat History of German Heavy Anti-Tank Unit 653 in World War II includes hundreds of photos, many never published before, of Germany's rarely seen tank destroyers, including the Ferdinand, Elephant, and Jagdtiger. Color illustrations focus on unit markings, numbering, and camouflage, and the accompanying text chronicles the unit's combat operations as well as personal accounts from the men who rode in these mechanical monsters.
