Poverty, Inequality and Growth in Developing Countries Atsushi Maki,2015-06-05 There are many problems regarding poverty, inequality and growth in developing countries in Asia and Africa. Policy makers at the national level and at international institutions such as the United Nations, World Bank, International Monetary Fund and others have implemented various policies in order to decrease poverty and inequality. This book provides empirical observations on Asian countries and Africa. Each chapter provides theoretical and empirical analysis on regional case studies with an emphasis on policy implications. The book will be of use to many who wish to assess and improve policies in developing countries and mitigate poverty and inequality, and stimulate growth, by drawing on relevant empirical research and economic theories. Clearly, there have been numerous policy failures and the book aims to provide a basis for improving policies and outcomes based on relevant empirical observations.

Investing Strategies for Alternative Global Markets (Collection) Vishaal B. Bhuyan,Scott Phillips,Jeffrey Towson,2011-08-18 3 breakthrough books deliver innovative global investing strategies for today's radically new market environment Yesterday's investment strategies won't cut it any more! This Collection brings together innovative new approaches from three of this generation's most successful investors: strategies you simply won't find elsewhere! In *Buying at the Point of Maximum Pessimism: Six Value Investing Trends from China to Oil to Agriculture*, Lauren Templeton Capital Management's D. Scott Phillips reveals today's secret for earning consistently outsized profits: In times of maximum pessimism, recognize your long-term opportunities, and pounce! Phillips identifies six powerful value investing themes for the 2010s: emerging areas of long-term growth that become even more compelling in volatile or bear markets. In *What Would Ben Graham Do Now?: A New Value Investing Playbook for a Global Age*, Jeffrey Towson modernizes value investing for high-growth emerging markets, introducing techniques he mastered working for Prince Alwaleed, the "Arabian Warren Buffet." Building on Ben Graham's classic focus on price and quality, he integrates crucial values of political access, reputation, and capabilities that are indispensable for modern global investing. Next, he presents practical investment "playbooks" designed to help you profitably navigate tomorrow's titanic market collisions. Finally, in *The Esoteric Investor: Alternative Investments for Global Macro Investors*, Vishaal B. Bhuyan reveals immense new investment opportunities hidden in the coming age wave, pension crisis, and today's massive demographic, economic, and regulatory shifts. Discover how to profit from reverse equity transactions, surprising commodities, and longevity risk markets—the \$24 trillion market you've never heard of! From world-renowned leaders in alternative global investment, including D. Scott Phillips, Vishaal B. Bhuyan, and Jeffrey Towson

Japan And The New Ocean Regime Robert L. Friedheim,2019-02-22 The regime under which humankind has governed its uses of the ocean is in the process of change—shifting away from the traditional freedom of the seas toward a “mixed” system in which most of the valuable near-shore resources come under coastal jurisdiction. The transition to a new regime has been difficult for many states, most notably Japan, whose rights to use the entire ocean were well protected by the traditional regime. Japan's response to the need to develop a modern ocean policy— to adapt to the emerging ocean management regime—is the subject of this multiauthor volume. U.S. and Japanese scholars look at what Japan is doing, how, and with what results. They first assess general trends in ocean management, then examine the role of Japan in the international political economy of the oceans, and finally look at Japan's ocean policy in various sectors: shipbuilding, fisheries, mineral resources, offshore petroleum, and nuclear power generation. Given Japan's importance in ocean affairs, the authors point out that the lessons that can be learned from its experience are of prime international importance.

Artificial Reef Evaluation William Seaman,2000-03-23 Beneath the coastal waters of the world lie thousands of artificial reefs. Some are old and retired freighters and ships that once plied the oceans of the world but now serve as habitats for marine life. Others are newer reefs that have been designed and built for specific applications. With the field of aquatic habitat technology continually growing, this book responds to the global need for a compendium of consistent and reliable practices with which to evaluate how well artificial reefs meet their objectives. *Artificial Reef Evaluation With Application to Natural Marine Habitats* is a comprehensive guide to the methods used to document the performance of artificial reefs in coastal and oceanic waters. It is the first volume to combine the essential disciplines required for proper evaluation, including engineering, economics, biology, and statistics. This work covers the design of reef studies, multi-disciplinary methods of investigation, data analysis, and examples of applying the methods to reefs built for different purposes. Further, the methods examined in this book apply to other benthic marine habitats, such as coral reefs or “live bottoms”, thus expanding the book's relevance to a wider audience and enhancing research efforts in the field of artificial habitat technology.

Progress in Image Processing, Pattern Recognition and Communication Systems Michal Choraś,Ryszard S. Choraś,Marek Kurzyński,Paweł Trajdos,Jerzy Pejaś,Tomasz Hyla,2021-08-17 This book presents a collection of high-quality research papers accepted to multi-conference consisting of International Conference on Image Processing and Communications (IP&C 2021), International Conference on Computer Recognition Systems (CORES 2021), International Conference on Advanced Computer Systems (ACS 2021) held jointly in Bydgoszcz, Poland (virtually), in June 2021. The accepted papers address current computer science and computer systems-related technological challenges and solutions, as well as many practical applications and results. The first part of the book deals with advances in pattern recognition and classifiers, the second part is devoted to image processing and computer vision, while the third part addresses practical applications of computer recognition systems. Machine learning solutions for security and networks are tackled in part four of the book, while the last part collects papers on progress in advanced computer systems. We believe this book will be interesting for researchers and practitioners in many fields of computer science and IT applications.

Ethnographic Study of Marine Conservation Izumi Tsurita,2022-05-03 This book explores the nature of marine conservation based on the case study of Hinase, a fishing village in Okayama, Japan. It focuses on the fishers' self-motivated eelgrass restoration activity which has been continued for more than 30 years. This activity in Hinase recently attracted international attention as a case under the name “Satoumi” and “Marine Protected Areas” in several governmental reports, but detailed information, such as the historical background and social structure of Hinase, has not yet been analyzed. This book, therefore, fulfills this gap by providing its ethnographic information. In addition, this book offers some points for critical thinking by concluding that marine conservation activities cannot always be evaluated or arranged under the standardized approach with limited time and space. This viewpoint reaffirms the importance of local initiative and highlights the value of qualitative

research to seek the way forward for promising marine conservation. This book is suitable for an academic audience in the field of social sciences, such as applied anthropology, as well as ecologists, government officials, environmentalists, and citizens who are interested or engaged in environmental issues or natural resource management.

Geo-Politics in Northeast Asia Akihiro Iwashita,Yong-Chool Ha,Edward Boyle,2022-08-03 Geo-Politics in Northeast Asia focuses on the dynamics of Northeast Asia as a region. The chapters in this book offer a nuanced approach for understanding the geo-politics of this strategically critical area of the world. Focusing on China, Japan, Russia, and the Koreas, as well as the involvement of the United States, the contributors to the volume offer a timely and critical analysis of Northeast Asia. They collectively emphasize the different scales at which the region holds significance, and particularly note how the region is often granted significance by local political forces as well as national interests. Borderlands and sub-regions are especially important in this perspective, and the contributors show both how regionalism influences the people living in these areas and how they in turn shape the political priorities of states. At the same time, the worsening of relations between Japan and the Koreas and the increasing assertiveness of both China and Russia make it essential to understand the dynamics of the region, as well as how they have changed during and following the Trump era. Geo-Politics in Northeast Asia is essential reading for students and scholars of Political Geography, International Relations and Strategic Studies, as well as for those with a research focus on Northeast Asia, or the wider Asia-Pacific and Indo-Pacific regions.
