G. Weldon Tucker

**Gyro 1333b** G. Weldon Tucker, 2017-12-25 He was put out here because he qualified: Braniac, Electrical Engineer, and definitely a nerdy loner. Psyche report so stamped in red. A twenty year contract. A chance to get rich, waiting to be paid. Then, the aliens got creative. Alone no more. Another engineer, as smart as himself, and a hell of a lot better looking! The aliens want what he is developing. He has to bring her around to his side, and the two have to get the hell off this damned needle, somehow. They cannot lose themselves doing it. They cannot let the aliens kill them because his work is too important. Will love help them through or hold them back? No one is going to leave them alone! Loners, my... foot! A frenetic ride from #TheStoryteller G. Weldon Tucker

**The Readout-axis Stability of Elastic Nearly Spherical Gyro Rotors** William Norman Blanchard, Stanford University. Department of Aeronautics and Astronautics, Benjamin Lange, 1971 Precision autocollimator readout of nearly spherical free-rotor gyroscopes, using a reflecting optical flat, requires that the normal to the flat be aligned with the rotor axis of maximum inertia and that the alignment remains stable during gyro operation. The normal to the flat is defined as the readout axis of the instrument; angular misalignments between the normal and the axis of maximum inertia are called 'flat position errors.' In previous research, initial alignment to within 2 arcseconds has been achieved; however, rotor flat-position errors were found

to vary significantly when the gyro spin speed or temperature was changed. This investigation studies the variations as elastic phenomena so that the accuracy and stability of readout-axis orientation in arbitrary free-rotor gyroscopes can be understood. (Author).

**Modern Control Techniques in Active Flutter Suppression Using a Control Moment Gyro** Philip Martin Buchek, Stanford University. Department of Aeronautics and Astronautics, 1974

Gyro-interaction Rocket Experiments in the Lower Ionosphere Ralph Richard Hodges (Jr), ILLINOIS UNIV URBANA ENGINEERING EXPERIMENT STATION., 1964 Two gyro-interaction rocket experiments were performed in the lower ionosphere. The basic experimental procedure consists in the radiation of periodic pulses of gyrofrequency energy from a transmitter within the rocket payload. With the use of this technique, rate coefficients for two processes were evaluated. With a strong gyrofrequency pulse the local electron density is increased. The rate of removal of these excess electrons, which is believed to be due to attachment, was determined in the range of 45 to 65 km. When the gyrofrequency pulse is weak, the disturbance is only a slight increase of electron energy. This increases the collision frequency and hence affects the absorption of the sensing wave. The rate of loss of excess electron energy was determined by this method. At altitudes above the sensing wave reflection level cross-modulation of plasma noise was detected. An RF probe, with which the frequency dependence of the real part of the input impedance of an

antenna was detected, was included in one experiment to measure electron density and collision frequency. In addition the data confirms some of the theoretical implications of Balmain's work. The device was designated a real impedance probe. (Author).

**Isee Blasters' Handbook** Jon F. Stiehr, Jeffrey L. Dean, 2011-01

**HACCP** Sara Mortimore, 2012-12-06 Since the 1994 publication of HACCP: A practical approach, many changes have occurred in the world of food safety. A number of driving forces have converged, focusing more attention on the proper management of food safety. These forces have prompted a revision and expansion of HACCP: A practical approach. Fortunately, the authors have been able to come forth with this timely revision of their most useful and excellent work. Unquestionably, the most significant driving force for increased attention to food safety has been the continued surge in new food borne pathogens and the related illness outbreaks. Micro-organisms such as *Salmonella typhimurium* OT104, antibiotic-resistant *Campylobacter jejuni*, *Cryptosporidium parvum* and *Cyclospora cayentensis* were practically unknown in foods before 1994. However, most important in this regard has been the surge in major outbreaks of illness caused by *Escherichia coli* O157:H7 around the world. While it was originally found to be associated with dairy cattle, the ecological range of this pathogen is expanding. It is now a more frequent contaminant of raw animal foods and raw produce. The surge in new foodborne pathogens and illnesses has led to unprecedented media attention to the safety of the global food supply. As a result, consumers are more aware of

the potential problems and are demanding safer foods. Government regulatory agencies in many countries have responded by developing regulations for food safety. Many of these regulations require that the HACCP system of food safety be used in the production of food.

In this easy-to-follow guide, avian experts Diane Grindol and Tom Roudybush reveal how you can communicate with your parrot far beyond hello and, in turn, understand what your bird is trying to communicate to you. Teaching Your Bird to Talk compiles an impressive amount of background, training, and research regarding bird vocalizations, walking you step by step through the behavioral mechanics of training parrots to talk (as well as starlings, mynahs, and other birds). Whether you want your bird to mimic words, talk on cue, or have some understanding of what you are saying, this guide shows you the type of training you need to do with your bird. The book also takes a close look at the work of Dr. Irene Pepperberg-the world's foremost authority in the field of parrot intelligence and trainer of Alex the African Grey Parrot. \*

*Assurance of Seafood Quality* Hans Henrik Huss, Food and Agriculture Organization of the United Nations, 1994 This document is primarily focused on the application of the Hazard Analysis Critical Control Point (HACCP) system to the fish industry. The document reviews in detail the potential hazards related to public health and spoilage related to fish and fish products, and discuss the utilization of HACCP in different type of fish industries. It contains a chapter making clear the limitations of classical fish inspection and quality control methods based solely on the analysis of final samples. A brief introduction about the relationship between the HACCP system and the

ISO 9000 series is also included. The document is completed with chapters related to cleaning and sanitation and establishments for seafood processing, primarily seen from the HACCP point of view.

Quality Assurance in Seafood Processing: A Practical Guide A. David Bonnell, 2012-12-06 While there are many quality assurance books on the market, very few address the application of the concept to the seafood industry. In addition, many of the books that are available take a theoretical approach and there fore do not provide actual examples of the fins and bones of quality programs. The author, in teaching quality assurance over nine years, has not been able to find a textbook that is suitable as a reference text in quality assurance courses for the seafood industry. It is this situation that has prompted the preparation of this book, which takes a

practical approach to the subject of quality assurance in seafood processing operations. This book can serve as either a textbook or as a reference text. As a textbook it is written for students of quality assurance at the technician, technologist, and university levels. In this role it is intended that the student will start at the beginning of the book and proceed through in sequence, so as to gain a complete understanding of the design, implementation, and operation of a quality program in seafood processing operations. It is the hope of the author that the book also functions quite well as a desk reference for the managers of seafood processing operations who need to refer occasionally to particular items or chapters. In this sense, each chapter is designed to stand alone as a discussion of a particular concept within the quality assurance discipline.
