Taking Action Against Clinician Burnout National Academies of Sciences, Engineering, and Medicine,National Academy of Medicine,Committee on Systems Approaches to Improve Patient Care by Supporting Clinician Well-Being,2020-01-02 Patient-centered, high-quality health care relies on the well-being, health, and safety of health care clinicians. However, alarmingly high rates of clinician burnout in the United States are detrimental to the quality of care being provided, harmful to individuals in the workforce, and costly. It is important to take a systemic approach to address burnout that focuses on the structure, organization, and culture of health care. Taking Action Against Clinician Burnout: A Systems Approach to Professional Well-Being builds upon two groundbreaking reports from the past twenty years, To Err Is Human: Building a Safer Health System and Crossing the Quality Chasm: A New Health System for the 21st Century, which both called attention to the issues around patient safety and quality of care. This report explores the extent, consequences, and contributing factors of clinician burnout and provides a framework for a systems approach to clinician burnout and professional well-being, a research agenda to advance clinician well-being, and recommendations for the field.

Community Health Workers in Action Melvin Delgado,2019-07-26 Community Health Workers in Action proposes support and expansion of the role of community health workers in meeting the health needs of marginalized groups in United States cities (although their potential reach is not limited to any one group or geographical section). Given the health inequities that continue to touch the lives of millions of people of color across the country, these professionals' efforts--which translate to innovative, community-centered responses designed to reach particularly vulnerable populations--are quite timely. In order to truly understand the topic of health care, one must first explore its historical contexts, socio-cultural factors, and the ways in which values play a critical role in shaping a worldview of the right to quality care. This book offers readers a window into the dynamic field that continues to expand in highly creative and cost-effective ways, which ultimately shape one major piece of the complicated puzzle that is health care in America.

Blockchain Technology Solutions for the Security of IoT-Based Healthcare Systems Bharat Bhushan,Sudhir Kumar Sharma,Muzafer Saracevic,Azedine Boulmakoul,2023-01-10 Blockchain Technology Solutions for the Security of IoT-Based Healthcare Systems explores the various benefits and challenges associated with the integration of blockchain with IoT healthcare systems, focusing on designing cognitive-embedded data technologies to aid better decision-making, processing and analysis of large amounts of data collected through IoT. This book series targets the adaptation of decision-making approaches under cognitive computing paradigms to demonstrate how the proposed procedures, as well as big data and Internet of Things (IoT) problems can be handled in practice. Current Internet of Things (IoT) based healthcare systems are incapable of sharing data between platforms in an efficient manner and holding them securely at the logical and physical level. To this end, blockchain technology guarantees a fully autonomous and secure ecosystem by exploiting the combined advantages of smart contracts and global consensus. However, incorporating blockchain technology in IoT healthcare systems is not easy. Centralized networks in their current capacity will be incapable to meet the data storage demands of the incoming surge of IoT based healthcare wearables. Highlights the coming surge of IoT based healthcare wearables and predicts that centralized networks in their current capacity will be incapable to meet the data storage demands Outlines the major benefits and challenges associated with the integration of blockchain with IoT healthcare systems Investigates use-cases and the latest research on securing healthcare IoT systems using blockchain technology Discusses the evolution of blockchain technology, from fundamental theories to applications in healthcare systems Gathers and investigates the most recent research solutions that handle security and privacy threats while considering resource constrained IoT healthcare devices

Environmental Life Cycle Assessment of Goods and Services Chris T. Hendrickson,Lester B. Lave,H. Scott

Matthews,2010-09-30 Environmental life cycle assessment is often thought of as cradle to grave and therefore as the most complete accounting of the environmental costs and benefits of a product or service. However, as anyone who has done an environmental life cycle assessment knows, existing tools have many problems: data is difficult to assemble and life cycle studies take months of effort. A truly comprehensive analysis is prohibitive, so analysts are often forced to simply ignore many facets of life cycle impacts. But the focus on one aspect of a product or service can result in misleading indications if that aspect is benign while other aspects pollute or are otherwise unsustainable. This book summarizes the EIO-LCA method, explains its use in relation to other life cycle assessment models, and provides sample applications and extensions of the model into novel areas. A final chapter explains the free, easy-to-use software tool available on a companion website. (www.eiolca.net) The software tool provides a wealth of data, summarizing the current U.S. economy in 500 sectors with information on energy and materials use, pollution and greenhouse gas discharges, and other attributes like associated occupational deaths and injuries. The joint project of twelve faculty members and over 20 students working together over the past ten years at the Green Design Institute of Carnegie Mellon University, the EIO-LCA has been applied to a wide range of products and services. It will prove useful for research, industry, and in economics, engineering, or interdisciplinary classes in green design.
