Male Pattern Baldness Brian Jeff, 2016-03-16 The hair can generally be seen as a covering which grows on the scalp of the head; the skin and virtually any part of the body with the exception of, the palm of the hands and underneath the feet for obvious reasons so to say. However, the hair comes in different colors and length depending on your race. Meanwhile, let me say that the focus of this book will be on hair growth, hair loss, which is often referred to as alopecia and its various treatments. Factors Affecting Hair Growth: Well, we all know one way or the other, we all have to lose some hairs, but besides that currently, hair loss is a common problem since hair is considered as a plus that boosts a person's physical looks; therefore, this is one thing that many people will like to correct in a flash. Conversely, your overall health and general well-being including your gene will no doubt play a great role in how fast your hair grows. Therefore, it is only logical that a healthy hair growth can simply be achieved by eating the right things including taking good care of your hair as a matter of priority. To achieve that you can even decide to go natural by applying some types of herbs to your hair, but the bottom line is to pinpoint every fundamental issues that may be adding to hair problems and combat them as a matter of urgency to prevent such problems from impeding the growth of your hair. Meanwhile, other medical factors that might impede hair growth include severe infection, hormonal imbalance, thyroid disorder, allergies, chronic illness, nutritional deficiencies, pollution etc. Well, to frank with you, if you are on some form of drugs like anticonvulsants, beta-blockers, birth control pills, antidepressants, anabolic steroids to mention but a few, you may be experiencing hair thinning which will eventually lead to hair loss if nothing is done urgently. Now Let Us Look At Other Factors That Can Hinder Hair Growth. To do this, I will like to call your attention to the fact that

several collective factors that can cause the problem of hair thinning or hair loss are extreme emotional or physical strains, using wrong hair care products for your hair type, heredity and having a very poor hair care habit. Okay, you must also understand that everybody loses hair at one point or the other in their life time and that it is only usual to lose about 60-120 strands of hair on a daily basis, however, if by any chance you observe bald spots or you notice that your hair is no longer as full as it used to be then, you are definitely undergoing hair loss. All chapters are written by world-leading researchers who draw on the findings of human clinical trials to provide uncompromising assessments of individual treatments, including herbal anxiolytics with sedative actions, adaptogens, cognitive anxiolytics, and nutraceuticals. Traditional treatments requiring further study - including the plant-based psychotropic Ayahuasca and other phytotherapies of potential value in the treatment of anxiety - are also reviewed. Mental health professionals, researchers, and general readers will find that the book provides an excellent review of current scientific knowledge gained from the study of herbal and nutritional treatments, together with important clinical recommendations for their use in patients experiencing clinically significant levels of anxiety.

Pharmacological Properties of Plant-Derived Natural Products and Implications for Human Health George E. Barreto, Amirhossein Sahebkar, 2021-04-16 Medicinal plants and their derived products remain as an indispensable source of bioactive molecules that serve as either drug candidates or lead compounds for drug design and discovery. There are several advantages for plant-derived therapeutics including wide availability, diverse pharmacological actions and a generally good profile of safety and tolerability. Over the recent years, there have been numerous reports from clinical studies testifying to the efficacy and safety of medicinal plants and phytochemicals in ameliorating several human diseases. A plethora of basic studies has also unravelled molecular mechanisms underlying the health benefits of herbal medicines. Nevertheless, issues such as identification of bioactive ingredients, standardization of the products and drug interactions remain to be further studied. In this book, we aim to put together several chapters on the medicinal properties and pharmacological action of medicinal plants, plant species and phytochemicals. The goal is to present a comprehensive collection on most of the therapeutic aspects of plant-derived natural products and molecular mechanisms thereof.
