Sister Style Nadia E. Brown, Danielle Casarez Lemi, 2021-01-19 They don't think I'm viable, because I'm a Black woman with natural hair and no husband. This comment was made by Stacey Abrams shortly before the 2018 Democratic primary after she became the first Black woman to win a majority party's nomination for governor. Abrams' sentiment reflects the wider environment for Black women in politics, in which racist and sexist cultural ideas have long led Black women to be demeaned and fetishized for their physical appearance. In *Sister Style*, Nadia E. Brown and Danielle Casarez Lemi argue that Black women's political experience and the way that voters evaluate them is shaped overtly by their skin tone and hair texture, with hair being a particular point of scrutiny. They ask what the politics of appearance for Black women mean for Black women politicians and Black voters, and how expectations about self-presentation differ for Black women versus Black men, White men, and White women. Black women running for office face pressure, often from campaign consultants and even close colleagues, to change their style in order to look more like White women. However, as this book shows, Black women candidates and elected officials react differently to these pressures depending on factors like age and incumbency. Moreover, Brown and Lemi delve into the ways in which Black voters react to Black female candidates based on appearance. They base their argument, in part, on focus groups with Black women candidates and elected officials, and show that there are generational differences that determine what sorts of styles Black women choose to adopt and to what extent they change their physical appearance based on external expectations.

Heart of Buddha, Heart of China James Carter, 2014 The Buddhist monk Tanxu surmounted extraordinary obstacles--poverty, wars, famine, and foreign occupation--to become one of the most

prominent monks in China, founding numerous temples and schools and attracting crowds of students and disciples wherever he went. *Heart of Buddha, Heart of China* traces Tanxu's journey from his birth in 1875 to his death in 1963. Through Tanxu's life we come to know one of the most turbulent periods in Chinese history as it moved from empire to republic. James Carter draws on archives and interviews to provide a book that is part travelogue, part history, and part biography.

Clothing and Fashion [4 volumes] José Blanco F., Patricia Kay Hunt-Hurst, Heather Vaughan Lee, Mary Doering, 2015-11-23 This unique four-volume encyclopedia examines the historical significance of fashion trends, revealing the social and cultural connections of clothing from the precolonial times to the present day. This sweeping overview of fashion and apparel covers several centuries of American history as seen through the lens of the clothes we wear—from the Native American moccasin to Manolo Blahnik's contribution to stiletto heels. Through four detailed volumes, this work delves into what people wore in various periods in our country's past and why—from hand-crafted family garments in the 1600s, to the rough clothing of slaves, to the sophisticated textile designs of the 21st century. More than 100 fashion experts and clothing historians pay tribute to the most notable garments, accessories, and people comprising design and fashion. The four volumes contain more than 800 alphabetical entries, with each volume representing a different era. Content includes fascinating information such as that beginning in 1619 through 1654, every man in Virginia was required to plant a number of mulberry trees to support the silk industry in England; what is known about the clothing of enslaved African Americans; and that there were regulations placed on clothing design during World War II. The set also includes color inserts that better communicate the visual impact of clothing and fashion across eras.

Everyday Things in Premodern Japan Susan B. Hanley, 2023-04-28 Japan was the only non-Western nation to industrialize before 1900 and its leap into the modern era has stimulated vigorous debates among historians and social scientists. In an innovative discussion that posits the importance of physical well-being as a key indicator of living standards, Susan B. Hanley considers daily life in the three centuries leading up to the modern era in Japan. She concludes that people lived much better than has been previously understood—at levels equal or superior to their Western contemporaries. She goes on to illustrate how this high level of physical well-being had important consequences for Japan's ability to industrialize rapidly and for the comparatively smooth transition to a modern, industrial society. While others have used income levels to conclude that the Japanese household was relatively poor in those centuries, Hanley examines the material culture—food, sanitation, housing, and transportation. How did ordinary people conserve the limited resources available in this small island country? What foods made up the daily diet and how were they prepared? How were human wastes disposed of? How long did people live? Hanley answers all these questions and more in an accessible style and with frequent comparisons with Western lifestyles. Her methods allow for cross-cultural comparisons between Japan and the West as well as Japan and the rest of Asia. They will be useful to anyone interested in the effects of modernization on daily life.

Egyptian Art (World of Art) Bill Manley, 2018-01-23 An insightful volume delving into the enduringly compelling art of ancient Egypt, from a new historical perspective The art and architecture of Egypt during the age of the pharaohs continue to capture the imagination of the modern world. Among the great creative achievements of ancient Egypt are a set of constant forms: archetypes in art and architecture in which the origins of concepts such as authority, divinity, beauty, and meaning are readily discernible. Whether adapted to fine, delicate jewelry or colossal

statues, these forms maintain a human face—with human ideas and emotions. These artistic templates, and the ideas they articulated, were refined and reinvented through dozens of centuries, until scenes first created for the earliest kings, around 3000 BCE, were eventually used to represent Roman emperors and the last officials of pre-Christian Egypt. Bill Manley's account of the art of ancient Egypt draws on the finest works through more than 3,000 years and places celebrated masterpieces, from the Narmer palette to Tutankhamun's gold mask, in their original contexts in the tombs, temples, and palaces of the pharaohs and their citizens.

Beauty Shop Politics Tiffany M. Gill, 2010-01-29 Looking through the lens of black business history, *Beauty Shop Politics* shows how black beauticians in the Jim Crow era parlayed their economic independence and access to a public community space into platforms for activism. Tiffany M. Gill argues that the beauty industry played a crucial role in the creation of the modern black female identity and that the seemingly frivolous space of a beauty salon actually has stimulated social, political, and economic change. From the founding of the National Negro Business League in 1900 and onward, African Americans have embraced the entrepreneurial spirit by starting their own businesses, but black women's forays into the business world were overshadowed by those of black men. With a broad scope that encompasses the role of gossip in salons, ethnic beauty products, and the social meanings of African American hair textures, Gill shows how African American beauty entrepreneurs built and sustained a vibrant culture of activism in beauty salons and schools. Enhanced by lucid portrayals of black beauticians and drawing on archival research and oral histories, *Beauty Shop Politics* conveys the everyday operations and rich culture of black beauty

salons as well as their role in building community.

My Individualism and the Philosophical Foundations of Literature Natsume Soseki,Inger Brodey,2011-12-20 Published here for the first time in English, *My Individualism and The Philosophical Foundations of Literature* are essays which explore issues close to famed Japanese novelist Soseki Natsume's heart: the philosophical and cultural significance of isolation, belonging and identity associated with rapid technological, industrial and cultural change. Set against the background of the Meiji era, in which Soseki believed modern man was dislocated from Japan's past as well as its future, he defines the role of art and the artist in light of the loneliness and individualism of the modern world. True to his self-conscious style, each essay includes individual biographical anecdotes, inviting their allegorical reading as stories about the fate of Japan. In *My Individualism*, Soseki gives a rare account of his stay in London from the perspective of twelve years after his return, allowing us to see the profound shift in his thinking about literature that occurred during this time. In *The Philosophical Foundations of Literature*, we find one of Soseki's principal attempts to provide a cross-cultural framework for the interpretation of literature. Together, the

essays reveal Soseki's attempts to create a theory of literature that is characteristically Japanese.

My Hair Hannah Lee, 2019-09-03 My birthday's coming up so soon, I'll need new clothes to wear. But most of all, I need to know, How shall I style my hair? Will it be dreads or a twist out?
