Your Guide to Lowering Your Blood Pressure with Dash U. S. Department Human Services,National Health,Department Of Health And Human Services,Lung, and Blood, National Heart Institute,National Heart Lung Institute, And,2012-07-09 This book by the National Institutes of Health (Publication 06-4082) and the National Heart, Lung, and Blood Institute provides information and effective ways to work with your diet because what you choose to eat affects your chances of developing high blood pressure, or hypertension (the medical

term). Recent studies show that blood pressure can be lowered by following the Dietary Approaches to Stop Hypertension (DASH) eating plan-and by eating less salt, also called sodium. While each step alone lowers blood pressure, the combination of the eating plan and a reduced sodium intake gives the biggest benefit and may help prevent the development of high blood pressure. This book, based on the DASH research findings, tells how to follow the DASH eating plan and reduce the amount of sodium you consume. It offers tips on how to start and stay on the eating plan, as well as a week of menus and some recipes. The menus and recipes are given for two levels of daily sodium consumption-2,300 and 1,500 milligrams per day. Twenty-three hundred milligrams is the highest level considered acceptable by the National High Blood Pressure Education Program. It is also the highest amount recommended for healthy Americans by the 2005 U.S. Dietary Guidelines for Americans. The 1,500 milligram level can lower blood pressure further and more recently is the amount recommended by the Institute of Medicine as an adequate intake level and one that most people should try to achieve. The lower your salt intake is, the lower your blood pressure. Studies have found that the DASH menus containing 2,300 milligrams of sodium can lower blood pressure and that an even lower level of sodium, 1,500 milligrams, can further reduce blood pressure. All the menus are lower in sodium than what adults in the United States currently eat-about 4,200 milligrams per day in men and 3,300 milligrams per day in women. Those with high blood pressure and

prehypertension may benefit especially from following the DASH eating plan and reducing their sodium intake.

Dogora-Carcinoma vs. the Kid Wayne Kyle Spitzer,2024-03-28 Jonesing for a drive-in theater and a hotrod El Camino? It's the dawn of the 1970s and everything is changing. The war in Vietnam is winding down. So is the Apollo Space Program. The tiny northwestern city of Spokane is about to host a World's Fair. But the Watergate Hearings and the re-entry of Skylab and the eruption of Mount Saint Helens are coming...as are killer bees and Ronald Reagan. Enter 'The Kid,' a panic-prone, hyper-imaginative boy whose life changes drastically when his father brings home an astronaut-white El Camino. As the car's deep-seated rumbling becomes a catalyst for the Kid's curiosity, his ailing, over-protective mother finds herself fending off questions she doesn't want to answer. But her attempt to redirect him on his birthday only arms him with the tool he needs to penetrate deeper—a pair of novelty X-Ray Specs—and as the Camino muscles them through a decade of economic and

cultural turmoil, the Kid comes to believe he can see through metal, clothing, skin—to the center of the universe itself, where he imagines something monstrous growing, spreading, reaching across time and space to threaten his very world.
