New Leadership of Civil Society Organisations

Ibrahim Natil, 2022-04-28 This book investigates the political, social, and economic dynamics and structures that influence the leadership of Civil Society Organisations at the local, national, and global levels. Civil Society Organisations (CSOs) play an increasingly important role in the political, economic, and social dynamics that shape daily lives across the world. Encompassing a diverse range of organisations, objectives, and activities, the CSO sector is an expansive terrain characterised by dynamic relationships between leaders, agents of action, the communities, and the global challenges that drive their agenda, which span from poverty to climate emergency to injustice to inequalities. Drawing on case studies from Brazil, India, Yemen, Syria, Iran, and Turkey, this book explores the distinct challenges faced by CSO leaders, their current operational practices, and their strategies for future development. The book highlights the roles, contributions, and challenges of young CSO leaders in particular, at a time when they are taking an increasingly active role as agents for change and development. Overall, the book emphasises the ways in which CSO leaders are not only shaped by profound challenges such as Covid-19, but also proactively react and respond. It will be of interest to researchers across the fields of global development, business studies, peacebuilding, international relations, and civil society.

Clinical Innovation in Rheumatology Jason

Liebowitz, Philip Seo, 2022-10-04 Tremendous advances have been made in the field of rheumatology, profoundly changing our understanding of many rheumatologic conditions and creating a new frontier for effective treatments. This book explains the most significant advances in research and care and speculates as to what will be the future of rheumatology over the next several decades, including challenges and lessons learned from past experiences in the field. It highlights landmark research articles and scientific discoveries, discusses how big data, personalized medicine, new biomarkers for disease, and other technological revolutions will shape the future, making it a must-have resource for physicians from all regions of the world. Key Features • Includes concise yet thorough description of the landmark studies and scientific breakthroughs coupled with easy-to-follow organizational structure of chapters that are accessible to readers at different levels of training. • Brings together world-leading experts to provide a fresh perspective to trainees such as residents and fellows-in-training, as well as more senior clinicians and researchers across the field of rheumatology and in specialties such as cardiology, dermatology, pulmonology, nephrology, and neurology, all of whom care for patients with rheumatologic conditions. • Allows the authors to imagine and speculate about the evolution of the field of rheumatology in the coming decades. Examples of such speculative possibilities include use of synovial biopsy to predict response to treatment in rheumatoid arthritis, replacement of

renal biopsy with urinary proteomics in diagnosing and classifying lupus nephritis, use of new therapeutics to obviate the need for steroids in the treatment of ANCA-associated vasculitis, and the use of machine learning to evaluate subtle changes in imaging for management of inflammatory arthritis.

Para-trisika-Vivarana of Abhinavagupta Jaideva Singh, 2014-01-01 The Paratrisika (or Paratrimisika) is a short Tantra that has been held in the highest esteem by Kashmir Saivism or Trika. After Somananda, Abhinavagupta has written two commentaries on it, a short one (Laghuvrtti) and an extensive one the present Vivarana which is presented here for the first time in an English translation. The Paratrisika Vivarana is one of the most fascinating but also most difficult texts of the Kashmir Saiva School, and of the mystical philosophical literature of India as a whole. It deals with Ultimate Reality (anuttara or para) and with the methods of realization, centred above all in the theory and practice of the mantra. Abhinavagupta displays here his great exegetical genius and presents a penetrating metaphysics of language, of the Word (vak) and its various stages in relation to consciousness. His language reflects in a luminous fashion the mystical experience contained in this text. The present translation of Abhinavagupta's masterpiece will not only be a milestone in the study of Kashmir Saivism, but it also makes available one of the major mystical texts of the Indian tradition to readers interested in philosophy and spirituality

Louise Moillon Lesley Stevenson, 2024-04-02 The life and career of Louise Moillon (1609/10–1696) offers a fascinating case study of a supremely talented artist whose posthumous reputation has been mired in invisibility. Born and raised in Paris, Moillon was the sole woman in a circle of

Calvinist Protestant émigrés who brought their tradition of still-life painting with them from Flanders. During her lifetime, she was able to enjoy a degree of professional independence and attract enough recognition to be regarded as on a level with her male counterparts, yet her exquisite work and enigmatic story are little known today. This illustrated biography examines some of the ways in which Moillon's story has been represented since the revival of interest in her work and draws on recent scholarship to situate the painter in her rightful place. Offering a sweeping exploration of the genre of still life, this book also chronicles how a woman in early modern France was able to capture the attention of the artistic world while dissecting why her prominence waned in the centuries following her death.

Patient Reported Outcome Measures in Rheumatic Diseases Yasser El Miedany, 2016-09-14 This book discusses the role of patient reported outcome measures (PROMs) in the diagnosis and management of rheumatic diseases and their implementation in patient-centered care. It aims to improve the quality and efficiency of patient care in standard practice by outlining the appropriate information-gathering and decision-making processes. The book highlights the evidence and advanced knowledge base of PROMs in rheumatic diseases such as rheumatoid arthritis, systemic lupus erythematosus, juvenile idiopathic arthritis, osteoarthritis, and systemic sclerosis. Featuring reviews of Patient Reported Outcome tools and Physician RheuMetric Measures as well as examples

of patient reported outcome questionnaires, Patient Reported Outcome Measures in Rheumatic Diseases serves as an excellent introduction and resource for implementation of PROMs in clinical rheumatology practice.

Elder Law Ann Numhauser-Henning, 2017-02-24 The ageing population poses a huge challenge to law and society, carrying important structural and institutional implications. This book portrays elder law as an emerging research discipline in the European setting in terms of both conceptual and theoretical perspectives as well as elements of the law.
