The Routledge International Handbook of Children, Adolescents and Media Dafna Lemish, 2013-07-18 The roles that media play in the lives of children and adolescents, as well as their potential implications for their cognitive, emotional, social and behavioral development, have attracted growing research attention in a variety of disciplines. The Routledge International Handbook of Children, Adolescents and Media analyses a broad range of complementary areas of study, including children as media consumers, children as active participants in media making, and representations of children in the media. The handbook presents a collection that spans a variety of disciplines including developmental psychology, media studies, public health, education, feminist studies and the sociology of childhood. Essays provide a unique intellectual mapping of current knowledge, exploring the relationship of children and media in local, national, and global contexts. Divided into five parts, each with an introduction explaining the themes and topics covered, the handbook features 57 new contributions from 71 leading academics from 38 countries. Chapters consider vital questions by analyzing texts, audience, and institutions, including: the role of policy and parenting in regulating media for children the relationships between children's' on-line and off-

line social networks children's strategies of resistance to persuasive messages in advertising media and the construction of gender and ethnic identities The Handbook's interdisciplinary approach and comprehensive, international scope make it an authoritative, state of the art guide to the nascent field of Children's Media Studies. It will be indispensable for media scholars and professionals, policy makers, educators, and parents.

African Data Privacy Laws Alex B. Makulilo, 2016-11-30 This volume presents analyses of data protection systems and of 26 jurisdictions with data protection legislation in Africa, as well as additional selected countries without comprehensive data protection laws. In addition, it covers all sub-regional and regional data privacy policies in Africa. Apart from analysing data protection law,

the book focuses on the socio-economic contexts, political settings and legal culture in which such laws developed and operate. It bases its analyses on the African legal culture and comparative international data privacy law. In Africa protection of personal data, the central preoccupation of data privacy laws, is on the policy agenda. The recently adopted African Union Cyber Security and Data Protection Convention 2014, which is the first and currently the only single treaty across the globe to address data protection outside Europe, serves as an illustration of such interest. In addition, there are data protection frameworks at sub-regional levels for West Africa, East Africa and Southern Africa. Similarly, laws on protection of personal data are increasingly being adopted at national plane. Yet despite these data privacy law reforms there is very little literature about data privacy law in Africa and its recent developments. This book fills that gap.

Physical Literacy across the World Margaret Whitehead, 2019-06-05 Physical Literacy across the World records the progress of the concept of physical literacy over the last decade. It examines developments, issues and controversies in physical literacy studies, and looks at how the concept has been implemented around the world. Contributions from practitioners and researchers across the world tell unique stories of the way physical literacy is changing perceptions of physical activity

through research and the generation of scholarly writing, the creation of new national and local policies, and the development of partnerships with a range of professions. The book argues that physical literacy has value beyond formal education, such as in occupational and recreational settings, as well as for early years children and older people, and shows how life story methods can explain our physical literacy journeys. At root, it sets out a case for the significance and value of physical literacy as making a notable contribution to human flourishing. This is important reading for anyone with an interest in physical activity, health and well-being, sport studies, physical education, or the philosophy related to physical activity.

Language Development in the Digital Age Mila Vulchanova,Giosuè Baggio,Angelo Cangelosi,Linda Smith,2017-10-18 The digital age is changing our children's lives and childhood dramatically. New technologies transform the way people interact with each other, the way stories

are shared and distributed, and the way reality is presented and perceived. Parents experience that toddlers can handle tablets and apps with a level of sophistication the children's grandparents can only envy. The question of how the ecology of the child affects the acquisition of competencies and skills has been approached from different angles in different disciplines. In linguistics, psychology and neuroscience, the central question addressed concerns the specific role of exposure to language. Two influential types of theory have been proposed. On one view the capacity to learn language is hard-wired in the human brain: linguistic input is merely a trigger for language to develop. On an alternative view, language acquisition depends on the linguistic environment of the child, and specifically on language input provided through child-adult communication and interaction. The latter view further specifies that factors in situated interaction are crucial for language learning to take place. In the fields of information technology, artificial intelligence and robotics a current theme is to create robots that develop, as children do, and to establish how embodiment and interaction support language learning in these machines. In the field of human-machine interaction, research is investigating whether using a physical robot, rather than a virtual agent or a computer-based video, has a positive effect on language development. The Research Topic will address the following issues: - What are the methodological challenges faced by research on language acquisition in the digital age? - How should traditional theories and models of language acquisition be revised to account for the multimodal and multichannel nature of language learning in the digital age? - How should existing and future technologies be developed and transformed so as to be most beneficial for child language learning and cognition? - Can new technologies be tailored to support child growth, and most importantly, can they be designed in order to enhance specifically vulnerable children's language learning environment and opportunities? - What kind of learning mechanisms

are involved? - How can artificial intelligence and robotics technologies, as robot tutors, support language development? These questions and issues can only be addressed by means of an interdisciplinary approach that aims at developing new methods of data collection and analysis in cross-sectional and longitudinal perspectives. We welcome contributions addressing these questions from an interdisciplinary perspective both theoretically and empirically.

Universal Access to E-mail Robert Helms Anderson, 1995 E-mail has swept the communications and information world, providing near-instantaneous global information and data exchange. However, this revolution primarily benefits an information elite: those with access to and knowledge about computers and e-mail. The diverging trends in access based on income and education are placing significant groups of current and next-generation U.S. citizens at a serious disadvantage in relevant job-related skills and in access to social programs and information. Information haves may leave the have-nots further behind, unless concerted efforts are made to provide all citizens with access to the technology. This report gives serious consideration to closing the access gap. The study details the benefits--on the personal as well as national and global level--of e-mail access. It recommends support of a U.S. policy of universal access and addresses the technical and economic aspects of putting such a policy into operation.
