Chalk Talks in Internal Medicine Somnath Mookherjee, Lauren A. Beste, Jared W. Klein, Jennifer Wright, 2020-09-30 This book provides teaching scripts for medical educators in internal medicine and coaches them in creating their own teaching scripts. Every year, thousands of attending internists are asked to train the next generation of physicians to master a growing body of knowledge. Formal teaching time has become increasingly limited due to rising clinical workload, medical documentation requirements, duty hour restrictions, and other time pressures. In addition, today's physicians-in-training expect teaching sessions that deliver focused, evidence-based content that is integrated into clinical workflow. In keeping with both time pressures and trainee expectations, academic internists must be prepared to effectively and efficiently teach important diagnostic and management concepts. A teaching script is a methodical and structured plan that aids in effective teaching. The teaching scripts in this book anticipate learners' misconceptions, highlight a limited number of teaching points, provide evidence to support the teaching points, use strategies to engage the learners, and provide a cognitive scaffold for teaching the topic that the teacher can refine over time. All divisions of internal medicine (e.g. cardiology, rheumatology, and gastroenterology) are covered and a section on undifferentiated symptom-based presentations (e.g. fatigue, fever, and unintentional weight loss) is included. This book provides well-constructed teaching scripts for commonly encountered clinical scenarios, is authored by experienced academic internists and allows the reader to either implement them directly or modify them for their own use. Each teaching script is designed to be taught in 10-15 minutes, but can be easily adjusted by the reader for longer or shorter talks. Teaching Scripts in Internal Medicine is an ideal tool for internal medicine attending physicians and trainees, as well as physician's assistants, nurse practitioners, and all others who teach and learn internal medicine.

Beyond Evidence-Based Medicine Ralph Junckerstorff, Sharmayne Brady, Ar Kar Aung, 2024-01-11 This textbook assembles the wealth of clinical experiences across multiple medical specialties and offers clinical pearls that will result in better patient care and are highly relevant to daily practice. This book has been compiled by many renowned clinicians, medical educators, and researchers who are experts in their respective disciplines across Australia, New Zealand and the United States. The chapters provide multiple cases in vignette format, illustrating the clinical pearls, and finish with a discussion and practical tips. This format will allow the reader to easily understand how the clinical pearls can be applied in clinical practice. Evidence-based medicine and clinical guidelines help us choose the best management and treatment options for our patients. However, many questions in medicine have not been researched or are not readily amenable to research. In fact, there is more to the art and mastery of practicing clinical medicine than the evidence-based approach. Information gained over years of reflective clinical practice and cumulative wisdom adds value to evidence-based clinical medicine. With experience and clinical gestalt playing an equal, if not a more prominent role than what evidence can offer in a physician's approach to solving clinical problems, this book offers unique perspectives on the practice of medicine. *Beyond Evidence-Based Medicine: Clinical Pearls from Experienced Physicians* will be valuable for later-year medical students, medical educators, doctors in training, and consultant physicians alike. Aiming to improve the day-to-day medical practices of professionals, the Editors have invited experienced physicians to share their expertise culminating in a unique book with broad applicability and appeal.
