The Neo-Aramaic Dialect of the Assyrian Christians of Urmi (4 vols) Geoffrey

Khan, 2016-06-10 This work is a documentation of the Neo-Aramaic dialect spoken by Assyrian Christians in the region of Urmi (northwestern-Iran). It consists of four volumes: Volume 1 and 2—grammar, Volume 3—study of the lexicon and full dictionary, Volume 4—transcriptions of oral texts.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Warhol-isms Andy Warhol, 2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is

nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well. I went to [a psychiatrist] once, and he never called me back. They always say that time changes things, but you actually have to change them yourself. I've never met a person I couldn't call a beauty. New things are always better than old things. I'm still a commercial artist. I was always a commercial artist.

The Speed Traders: An Insider's Look at the New High-Frequency Trading Phenomenon That is Transforming the Investing World Edgar

Perez, 2011-05-06 The secrets of high-frequency trading revealed! "Edgar's book is fantastic . . .

I recommend it highly.” –Bart Chilton, Commissioner, United States Commodity Futures Trading Commission (CFTC) “I have interviewed the most successful high-frequency traders in New York and Chicago, but I have learned so much more by reading Perez’s book. He covers the most relevant topics we need to know today and tomorrow.” –Mark Abeshouse, Chairman, Augustus Capital “Alternating between an annotated timeline of the development of high-frequency trading and interviews with top high-frequency traders, Perez illuminates the world of speed. All in all, an enlightening book.” –Brenda Jubin, contributor to Seeking Alpha “This is a comprehensive and compelling summary of the trading industry in general, as well as high-frequency trading. If you are interested in this field or of knowing a critical component of all future markets—read this book.” –Paul Dowding, Managing Director, Meridian Equity Partners “Very timely, covers the 2010 Flash Crash and the current high-frequency trading environment.” –Patrick Sweeney, Vice President, JP Morgan Chase “There is a new day in trading and speed is the key. Edgar Perez is the poster child.” –Eugene Steele, Managing Partner, Trading Rooms World Wide

About the Book: High-frequency traders have been called many things—from masters of the universe and market pioneers to exploiters, computer geeks, and even predators. Everyone in the business of investing has an opinion of speed traders, but how many really understand how they operate? The shadow people of the investing world, today’s high-frequency traders have decidedly kept a low profile—until now. In *The Speed Traders*, Edgar

Perez, founder of the prestigious business networking community Golden Networking, opens the door to the secretive world of high-frequency trading (HFT). Inside, prominent figures of HFT drop their guard and speak with unprecedented candor about their trade. Perez begins with an overview of computerized trading, which formally began on February 8, 1971, when NASDAQ launched the world's first electronic market with 2,500 over-the-counter stocks and which has evolved into the present-day practice of making multiple trades in a matter of microseconds. He then picks the brains of today's top players. Manoj Narang (Tradeworx), Peter van Kleef (Lakeview Arbitrage), and Aaron Lebovitz (Infinium Capital Management) are just a few of the luminaries who decided to break their silence and speak openly to Perez. Virtually all of the expertise available from the world of speed trading is packed into these pages. You'll get insight from HFT's most influential trailblazers on the important issues, including:

- The basics of launching an HFT platform
- The important role speed traders play in providing market liquidity
- The real story behind the "flash crash" of May 2010
- Emerging global HFT markets
- M&A and consolidation among the world's biggest exchanges

The Speed Traders is the most comprehensive, revealing work available on the most important development in trading in generations. High-frequency trading will no doubt play an ever larger role as computer technology advances and the global exchanges embrace fast electronic access. Essential reading for regulators and investors alike, The Speed Traders

explains everything there is to know about how today's high-frequency traders make millions—one cent at a time.

The Path of the Pole Charles H. Hapgood, 1999
Hapgood's tour de force is back in print! This riveting account of how earth's poles have flipped positions many times is the culmination of Hapgood's extensive research of Antarctica, ancient maps and the geological record. This amazing book discusses the various pole shifts in earth's history -- occurring when earth's crust slips in the inner core -- and gives evidence for each one. It also predicts future pole shifts: a planetary alignment will cause the next one on 5 May 2000! Packed with illustrations, this book is the reference other books on the subject cite over and over again. With millennium madness in full swing, this is just the book to generate even more excitement at the unknown possibilities.

Guilt Jonathan Kellerman, 2013 When he is consulted on a cold case involving the discovery of infant remains at a neglected Tudor mansion, psychologist Alex Delaware, tracing the long history of past residents, is led down a bloody path littered with unspeakable cruelty.
