Personal Data in Competition, Consumer Protection and Intellectual Property Law Mor Bakhoun, Beatriz Conde Gallego, Mark-Oliver

Mackenrodt, Gintarė Surblytė-Namavičienė, 2018-11-02 This book analyses the legal approach to personal data taken by different fields of law. An increasing number of business models in the digital economy rely on personal data as a key input. In exchange for sharing their data, online users benefit from personalized and innovative services. But companies' collection and use of personal data raise questions about privacy and fundamental rights. Moreover, given the substantial commercial and strategic value of personal data, their accumulation, control and use may raise competition concerns and negatively affect consumers. To establish a legal framework that ensures an adequate level of protection of personal data while at the same time providing an open and level playing field for businesses to develop innovative data-based services is a challenging task. With this objective in mind and against the background of the uniform rules set by the EU General Data Protection Regulation, the contributions to this book examine the significance and legal treatment of personal data in competition law, consumer protection law, general civil law and intellectual property law. Instead of providing an isolated analysis of the different areas of law, the book focuses on both synergies and tensions between the different legal fields, exploring potential ways to develop an integrated legal approach to personal data.

Who Owns Whom, 2008

Notes from the Hyena's Belly Nega Mezlekia, 2015-04-07 In this acclaimed memoir, Mezlekia recalls his boyhood in the arid city of Jijiga, Ethiopia, and his journey to manhood during the 1970s and 1980s. He traces his personal evolution from child to soldier--forced at the age of eighteen to join a guerrilla army. And he describes the hardships that consumed Ethiopia after the fall of Emperor Haile Selassie and the rise to power of the communist junta, in whose terror thousands of Ethiopians died. Part autobiography and part social history, *Notes from the Hyena's Belly* offers an unforgettable portrait of Ethiopia, and of Africa, during the defining and turbulent years of the last century.

The Poetry of Religious Sorrow in Early Modern England Gary Kuchar, 2011-03-03 In early modern England, religious sorrow was seen as a form of spiritual dialogue between the soul and God, expressing how divine grace operates at the level of human emotion. Through close readings of both Protestant and Catholic poetry, Kuchar explains how the discourses of 'devout melancholy' helped generate some of the most engaging religious verse of the period. From Robert Southwell to John Milton, from Aemilia Lanyer to John Donne, the language of 'holy mourning' informed how poets represented the most intimate and enigmatic aspects of faith as lived experience. In turn, 'holy mourning' served as a way of registering some of the most pressing theological issues of the day. By tracing poetic representations of religious sorrow from Crashaw's devotional verse to Shakespeare's weeping kings, Kuchar expands our understanding of the interconnections between poetry, theology and emotion in post-Reformation England.

Reinventing Data Protection? Serge Gutwirth, Yves Poullet, Paul de Hert, Cécile de Terwangne, Sjaak Nouwt, 2009-05-24 data. Furthermore, the European Union established clear basic principles for the collection, storage and use of personal data by governments, businesses and other organizations or individuals in Directive 95/46/EC and Directive 2002/58/EC on Privacy and Electronic communications. Nonetheless, the twenty-first century citizen – utilizing the full potential of what ICT-technology has to offer – seems to develop a digital persona that becomes increasingly part of his individual social identity. From this perspective, control over personal information is control over an aspect of the identity one projects in the world. The right to privacy is the freedom from unreasonable constraints on one's own identity.

Transaction data – both traffic and location data – deserve our particular attention. As we make phone calls, send e-mails or SMS messages, data trails are generated within public networks that we use for these communications. While traffic data are necessary for the provision of communication services, they are also very sensitive data. They can give a complete picture of a person's contacts, habits, interests, activities and whereabouts. Location data, especially if very precise, can be used for the provision of services such as route guidance, location of stolen or missing property, tourist information, etc. In case of emergency, they can be helpful in dispatching assistance and rescue teams to the location of a person in distress. However, processing location data in mobile communication networks also creates the possibility of permanent surveillance.

The Value of Privacy Beate Rössler, 2015-10-08 This new book by Beate Rössler is a work of real quality and originality on an extremely topical issue: the issue of privacy and the relations between the private and the public. Rössler investigates the reasons why we value privacy and why we ought to value it. In the context of modern, liberal societies, Rössler develops a theory of the private which links privacy and autonomy in a constitutive way: privacy is a necessary condition to lead an autonomous life. The book develops a theory of freedom and autonomy which sees the ability to pose the "practical question" of how one wants to live, of what a person strives to be, at the centre of the modern idea of autonomy. The question of privacy is emerging as an increasingly important topic in social and political theory and is central to many current debates in law, the media and politics. The

Value of Privacy will be widely recognised to be a classic contribution to the subject.

Internet Privacy Rights Paul Bernal, 2014-03-27

Internet Privacy Rights analyses the current threats to our online autonomy and privacy and proposes a new model for the gathering, retention and use of personal data. Key to the model is the development of specific privacy rights: a right to roam the internet with privacy, a right to monitor the monitors, a right to delete personal data and a right to create, assert and protect an online identity. These rights could help in the formulation of more effective and appropriate legislation, and shape more privacy-friendly business models. The conclusion examines how the internet might look with these rights in place and whether such an internet could be sustainable from both a governmental and a business perspective.
