HBCU Graduates Kenneth E. Redd,2000

The Professor Is In Karen Kelsky,2015-08-04 The definitive career guide for grad students, adjuncts, post-docs and anyone else eager to get tenure or turn their Ph.D. into their ideal job Each year tens of thousands of students will, after years of hard work and enormous amounts of money, earn their Ph.D. And each year only a small percentage of them will land a job that justifies and rewards their investment. For every comfortably tenured professor or well-paid former academic, there are countless underpaid and overworked adjuncts, and many more who simply give up in frustration. Those who do make it share an important asset that separates them from the pack: they have a plan. They understand exactly what they need to do to set themselves up for success. They know what really moves the needle in academic job searches, how to avoid the all-too-common mistakes that sink so many of their peers, and how to decide when to point their Ph.D. toward other, non-academic options. Karen Kelsky has made it her mission to help readers join the select few who get the most out of their Ph.D. As a former tenured professor and department head who oversaw numerous academic job searches, she knows from experience exactly what gets an academic applicant a job. And as the creator of the popular and widely respected advice site *The Professor is In*, she has helped countless Ph.D.'s turn themselves into stronger applicants and land their dream careers. Now, for the first time ever, Karen has poured all her best advice into a single handy guide that addresses the most important issues facing any Ph.D., including: -When, where, and what to publish -Writing a foolproof grant application -Cultivating references and crafting the perfect CV -Acing the job talk and campus interview -Avoiding the adjunct trap -Making the leap to nonacademic work, when the time is right *The Professor Is In* addresses all of these issues, and many more.

Planting the Seeds Phyllis M. Wilson Ph.D,Arnater M. Dowers,Carol Hedgepeth,2021-08-27 *Planting The Seeds* was a program specifically designed to expose more minority students to the existence and opportunities provided by attending one of the more than 140 Historically Black colleges and Universities. A partnership that was developed between two organizations, allowed the individuals involved in the creation and implementation of the program to expose a group of middle school students to the program. While the original audience were in grades 6-8, students in grades 9 and 10 can also be provided the program content. The enthusiasm and knowledge that were displayed by the participants throughout the delivery of the program content reinforced the importance of exposing more minority students to this valuable program content. The more the information was shared, the more those of us who had not attended an HBCU, wish that we had done so.

Historically Black Colleges and Universities F. Erik Brooks,Glenn L. Starks,2011-09-13 This exhaustive analysis of Historically Black Colleges and Universities (HBCUs) throughout history discusses the institutions and the major events, individuals, and organizations that have contributed to their existence. The oldest HBCU, Cheyney University of Pennsylvania, was founded in 1837 by Quaker philanthropist Richard Humphreys as the Institute for Colored Youth. By 1902, at least 85 such schools had been established and, in subsequent years, the total grew to 105. Today approximately 16 percent of America's black college students are enrolled in HBCUs. *Historically Black Colleges and Universities: An Encyclopedia* brings the stories of these schools together in a comprehensive volume that explores the origin and history of each Historically Black College and University in the United States. Major founders and contributors to HBCUs, including whites, free blacks, churches, and states, are discussed and distinguished alumni are profiled. Specific examples of the impact of HBCUs and their alumni on American culture and the social and political history of the United States are also examined. In addition to looking at the HBCUs themselves, the book analyzes historical events and legislation of the past 174 years that impacted the founding, funding, and growth of these history-making schools.

Recruiting Black Biology Majors into STEM Education Careers Salika A. Lawrence,Tabora A. Johnson,Chiyedza Small,2023-12-06 This book addresses issues related to the recruitment, preparation, and retention of STEM teachers. Focusing on recruitment specifically, it explores the

strategies used to introduce biology majors to the teaching profession, increase their interest in teaching, and support their transition into teaching. Taking the Transformative and Innovative Practices in STEM Education (TIPS) program as a case study, it draws upon a wide range of data sources to contextualize the experiences of program participants, including reflections from participants and program staff, pre- and post- surveys, focus groups, and annual interviews. The authors present insights about their decision-making and use the data to help create illustrative examples of the STEM majors of color who choose to pursue teaching and to explore why others decide not to pursue teaching. It foregrounds the importance of recruiting STEM teachers of color for urban districts, the role of culture and identity in the decision-making process, and the role played by professional development and mentoring. With emphasis on recruiting STEM majors at a Predominantly Black Institution (PBI), the book ultimately provides strategies for increasing collaboration across departments, supporting and mentoring students, and addressing cultural and institutional barriers that STEM majors face when transitioning into teacher education. As such, it will appeal to STEM education and teacher education scholars, as well as program directors, deans of Schools of Education, and deans of Schools of Science.

Creating New Possibilities for the Future of HBCUs Terrell L. Strayhorn, Michael Steven Williams, Royel M. Johnson, 2024-03-01 Creating New Possibilities for the Future of HBCUs brings together over 20 higher education scholars with more than 150 years of combined professional experience to critically examine the current contributions of and future directions for our nation's 101 historically Black colleges and universities (HBCUs). The book breaks new ground on Black colleges and offers hope and optimism for charting their future despite shrinking investments in higher education, declining enrollments, and eroding public confidence in the value of a college degree. The book was written to tell the truth, to right (or "[re]write") past wrongs about HBCUs, and to shift our collective gaze from the uncertain, shaky past of a select few to a far more promising future for all based on insights from contemporary empirical research. Each chapter addresses a particular aspect of higher education as it relates to HBCUs, documenting the undeniable legacy of Black colleges, their current challenges and untold successes, blended with findings from recent empirical studies—both quantitative and qualitative—that clearly create new possibilities for the future of HBCUs. This volume was developed to break new ground on often overlooked and understudied terrain in higher education scholarship. Organized into three major sections, the book includes chapters focusing on HBCUs as institutions and a small, but consequential, segment of the higher education enterprise. Section Two consists of 6 chapters addressing the experiences of HBCU students, paying close attention to issues of intersectionality, heterogeneity, and race/ethnicity, to name a few. A third, and final, section turns much-needed attention to HBCU personnel, including campus administrators, college presidents, and faculty. Rich in its coverage of culture, facts, and past history, this new book offers much to those interested in charting new possibilities for the future of HBCUs.

The African American Student's Guide to STEM Careers Robert T. Palmer, Andrew T. Arroyo, Alonzo Flowers, 2016-12-05 This book comprehensively reviews the factors that facilitate access and success of Black students in STEM majors in higher education, and it shares compelling testimonies from Black STEM professionals that will help inspire the next generation of Black scientists and engineers. Most experts agree that America's success depends on having a workforce that is highly prepared in STEM areas. Unfortunately, students of color continue to be underrepresented in higher education, and specifically, in completing degrees and entering careers within the STEM fields. This book supports African American students (as well as all students) who are interested in STEM careers, providing information on the top colleges with STEM-related programs, particularly those that best support racially diverse students; practical advice for preparing for entrance into STEM programs; and inspirational stories of successful African Americans in STEM-related careers. Authored by three educators expert in the areas of academic development of African Americans and minorities, STEM, and higher education, The African American Student's Guide to STEM Careers focuses on preparing Black students for STEM from

K-12 through graduate school. Readers will more fully appreciate the importance of STEM, recognize why more Black students need to be more actively engaged in these disciplines, and understand how to prepare Black students for success in STEM throughout the educational pipeline.

Higher Education of People of Color Dana G. Perry, 2015 The Black College and University Act defined a historically black college and university (HBCU) as one that existed before 1964 with a historic and contemporary mission of educating blacks while being open to all. An HBCU must either have earned accreditation from a nationally recognised accrediting agency or association or be making reasonable progress toward accreditation. The U.S. Commission on Civil Rights conducted a briefing on May 5, 2006, to assess the educational effectiveness of HBCUs. This book discusses HBCUs and examines why minority college students who begin their college studies intending to major in science, technology, engineering or math (STEM) leave these disciplines in disproportionate numbers before graduation.

Effective Leadership at Minority-Serving Institutions Robert T. Palmer, Dina C. Maramba, Andrew T. Arroyo, Taryn Ozuna Allen, Tiffany Fountaine Boykin, John Michael Lee Jr., 2017-07-28 Strong, effective, and innovative leadership is critical for institutions of higher education, especially for Minority-Serving Institutions (MSIs). Indeed, research and examples have shown leadership instability among some types of MSIs, while discussions and research on effective leadership for other MSIs is noticeably absent from the extant literature. In this volume, noted experts, researchers, and leaders discuss opportunities and challenges for leadership across the full range of MSIs, while creating a dialogue on leadership models and best practices. Chapters explore issues at Historically Black Colleges and Universities (HBCUs), Hispanic Serving Institutions (HSIs), Tribal Colleges and Universities (TCUs), and Asian American and Native American Pacific Islander Serving Institutions (AANAPISIs). This book helps higher education and student affairs scholars and administrators unpack contemporary leadership issues and strategies, and synthesizes best practices to help MSI leaders increase the effectiveness and sustainability of their institutions.

Historical Black Colleges and Universities in a Globalizing World Alem Hailu, Mohamed Saliou Camara, Sabella Ogbobode Abidde, 2022 This book examines the unique contribution of HBCUs, arguing that through their distinct public education, engagement, and activism, they have been at the forefront of leading global transformations. The book also argues that HBCUs can do more by paying more attention to the issue of enrollment, leadership, finances, and graduation standards--

Setting a New Agenda for Student Engagement and Retention in Historically Black Colleges and Universities Prince, Charles B. W., Ford, Rochelle L., 2016-06-27 As more Americans are attending college, historically black colleges and universities (HBCUs) are now in a position where they must directly compete with other institutions. While other colleges and universities might have more resources and stronger infrastructures, HBCUs provide better opportunities to meet the needs of students of color. *Setting a New Agenda for Student Engagement and Retention in Historically Black Colleges and Universities* explores the innovations that HBCUs can enact to better serve and prepare the next generation of African American leaders, and to be more competitive in the higher education landscape. As students need different forms of support throughout their academic career, it becomes necessary to engage them through mentorship, programming, and classroom management. This book is a valuable resource for educators and administration at HBCUs, sociologists, policy makers, and students studying education science and administration.

Advancing Educational Outcomes in Science, Technology, Engineering, and Mathematics at Historically Black Colleges and Universities Lamont A. Flowers, Lawrence O. Flowers, James L. Higher Education Careers Beyond the Professoriate Karen Cardozo,Katherine

Kearns,Shannan Palma,2024-03-15 Higher Education Careers Beyond the Professoriate is one of the first collections to explore PhD career versatility within higher education. The twenty-three contributors represent diverse disciplines, institution types, professional roles, and intersectional identities. Each thoughtful and personal essay explores firsthand what it means to remain in higher education, yet not in the traditional role of a professor. Topics include establishing new career paradigms, well-being and work-life balance, blended roles and identities, and professional work around advocacy and inclusion. Unifying the essays is the idea that career diversity is intertwined with other diversity discourse, yielding a broad-based but critical examination of careers in higher education administration. Though the doctoral landscape continues to change, a self-determined, values-driven attitude remains essential. This book offers powerful insight into cultural and structural barriers that inhibit institutional transformation and obscure the real range of PhD futures. Frank about both challenges and opportunities, these essays reveal how letting go of “track” thinking opens a constellation of possibilities and many paths to meaningful work and a fulfilling life.
