Summary Measures of Population Health World Health Organization,2002 As life expectancy rates continue to increase in many countries around the world, comparative health assessments based on mortality rates alone give an increasingly inadequate picture of public health. This publication addresses a wide range of key issues regarding the measurement of population health using comprehensive indices which combine data on mortality and ill-health. It considers the various uses of such summary measures, as well as an appropriate measurement framework and specific ethical and social value choices involved. The contributors to this book include leading experts in epidemiological methods, ethics, health economics, health status measurement and the valuation of health states.

Multimedia Information Networking Nalin K. Sharda,1999 For one/two-semester, undergraduate/ graduate-level courses in Data Communications and Networks, Networked Multimedia, and Multimedia Information Networking. Ideal for those with little background in the subject, this text provides a cohesive and seamless presentation of both the fundamental and advanced concepts related to Multimedia Information Networking from basic technologies and communication systems, protocols, and networks, to a variety of multimedia applications. It offers balanced coverage of communication and multimedia issues focusing on multimedia information, as well as on techniques and technologies used in making this information available on computer networks.

The Right to Health Care: Ethical Considerations Eike-Henner W. Kluge,2022-01-13 This book provides an in-depth ethical analysis of the right to health care by contrasting privatized with socialized approaches. It pays special attention to how a socialized approach can be implemented in the context of limited resources and offers a way of integrating allocation decisions at the policy level with institutional and hands-on decision-making. It also discusses how the right to health care translates into duties on part of the members of society. In an Appendix, it suggests how, in time of need, the TRIPS Agreement allows countries to side-step patent regulations that would otherwise raise the cost of patented healthcare products beyond what a particular society is able to afford. The book is of interest not only to scholars but also to healthcare policy makers, administrators and healthcare professionals, as well as to patients themselves.

Enduring Seeds Gary Paul Nabhan,2016-10-01 As biological diversity continues to shrink at an alarming rate, the loss of plant species poses a threat seemingly less visible than the loss of animals but in many ways more critical. In this book, one of America's leading ethnobotanists warns about our loss of natural vegetation and plant diversity while providing insights into traditional Native agricultural practices in the Americas. Gary Paul Nabhan here reveals the rich diversity of plants found in tropical forests and their contribution to modern crops, then tells how this diversity is being lost to agriculture and lumbering. He then relates local parables of Native American agriculture—from wild rice in the Great Lakes region to wild gourds in Florida—that convey the urgency of this situation and demonstrate the need for saving the seeds of endangered plants. Nabhan stresses the need for maintaining a wide gene pool, not only for the survival of these species but also for the preservation of genetic strains that can help scientists breed more resilient varieties of other plants. *Enduring Seeds* is a book that no one concerned with our environment can afford to ignore. It clearly shows us that, as agribusiness increasingly limits the food on our table, a richer harvest can be had by preserving ancient ways. This edition features a new foreword by Miguel Altieri, one of today's leading spokesmen for sustainable agriculture and the preservation of indigenous farming methods.

Nature and Culture Sarah Pilgrim,Jules N. Pretty,2010-09-23 There is a growing recognition that the diversity of life comprises both biological and cultural diversity. But this division is not universal and, in many cases, has been deepened by the common disciplinary divide between the natural and social sciences and our apparent need to manage and control nature. This book goes beyond divisive definitions and investigates the bridges linking biological and cultural diversity. The international team of authors explore the common drivers of loss, and argue that policy responses should target both forms of diversity in a novel integrative approach to conservation, thus reducing the gap between science, policy and practice. While conserving nature alongside human cultures presents unique challenges, this book forcefully shows that any hope for saving biological diversity is predicated on a concomitant effort to appreciate and protect cultural diversity.

On the Currency of Egalitarian Justice, and Other Essays in Political Philosophy G. A. Cohen,2011-01-03 G. A. Cohen was one of the most gifted, influential, and progressive voices in contemporary political philosophy. At the time of his death in 2009, he had plans to bring together a number of his most significant papers. This is the first of three volumes to realize those plans. Drawing on three decades of work, it contains previously uncollected articles that have shaped many of the central debates in political philosophy, as well as papers published here for the first time. In these pieces, Cohen asks what egalitarians have most reason to equalize, he considers the relationship between freedom and property, and he reflects upon ideal theory and political practice. Included here are classic essays such as *Equality of What?* and *Capitalism, Freedom, and the Proletariat*, along with more recent contributions such as *Fairness and Legitimacy in Justice*, *Freedom and Money*, and the previously unpublished *How to Do Political Philosophy*. On ample display throughout are the clarity, rigor, conviction, and wit for which Cohen was renowned. Together, these essays demonstrate how his work provides a powerful account of liberty and equality to the left of Ronald Dworkin, John Rawls, Amartya Sen, and Isaiah Berlin.

Tales from Maliseet Country Philip S. LeSourd,2009-02-01 During the summer of 1963, Harvard linguist Karl V. Teeter traveled along the Saint John River, the great thoroughfare of Native New Brunswick, Canada, with his principal Maliseet consultant, Peter Lewis Paul. Together they recorded a series of tales from Maliseet elders whom Paul regarded as among the best Maliseet storytellers born before 1900, including Charles Laporte, Matilda Sappier, Solomon Polchies, William Saulis, and Alexander Sacobie. Paul also contributed eleven narratives of his own.øTales from Maliseet Country presents the transcripts and translations of the texts Teeter collected, together with one tale recorded by linguist Philip S. LeSourd in 1977. The stories range from chronicles of shamanistic activity and mysterious events of the distant past, through more conventionally historical narratives, to frankly fictional yarns, fairy tales with roots in European traditions, and personal accounts of subsistence activities and reservation life. This entertaining and revealing volume testifies to the rich heritage of the Maliseets and the enduring vibrancy of their culture today.øFeaturing a bilingual format, with Maliseet and English on facing pages, this is the first extensive collection to be published in the Maliseet language, a member of the far-flung Algonquian family spoken in New Brunswick. The volume is also the first to provide full phonemic transcriptions, including the notation of accentual contrasts, of the Maliseet tales. An authoritative introduction provides a guide to interpreting the texts.

Allocating Health Care Resources James M. Humber,Robert F. Almeder,1995 In ALLOCATING HEALTH CARE RESOURCES, leading authorities and researchers expose the basic philosophical, ethical, and economic issues underlying the current health care debate. The contributors wrestle with such complicated issues as whether it is ethical to ration health care, the morality of the worldwide bias against children in allocating health care resources, whether sin taxes can be defended morally, and how to achieve a just health care system. The book also includes an insightful analysis of the Clinton health care reform plan. ALLOCATING HEALTH CARE RESOURCES will be of interest to philosophers, health policy experts, medical ethicists, health professionals, and concerned citizens. It serves to clarify and illuminate the logic and rhetoric of health care reform, and so to help us all achieve a fair and equitable distribution of these precious resources.

Let Us Not Forget Vurlee A. Toomey,2002-07 Over 70 authors and veterans share the sacrifices so many of America's veterans have made, in peacetime and in war, throughout the 20th century. You'll read about Duty, Honor, Courage - from the testing of a submarine, to the loss of the Space Shuttle Challenger, to the everyday sacrifice of men and women in uniform, whether serving during peace or war. You'll walk bloodied beaches, soar over enemy turf, pray, crawl in and out of caves, tend the wounded, shoot and be shot at, feel your heart race with fright as flak comes at you from every direction...walk the deck...hit the deck...feel the heat as fire dances across the deck, into the cockpit and into the foxhole you occupy. Your heart will constrict as the man in front of you takes the bullet meant for you. You'll know the painful bite of shrapnel, the gnawing ache hunger brings and red-hot anger as a comrade falls. But most of all, you'll experience total, unabridged fear as you watch the enemy advance through the eyes of the author, and a swelling of pride as you meet America's veterans.

Dot Grid Graph Paper Notebook Creative Publishing,2019-05-27 This minimalist dot grid notebook is the perfect tool for bullet journaling, illustration, prototyping, calligraphy, sketching, and note-taking. Dimensions - 8.5" x 11" 120 pages
