Health Politics in Europe Ellen M. Immergut, Karen M. Anderson, Camilla Devitt, Tamara Popic, 2021-06-02 Health Politics in Europe: A Handbook is a major new reference work, which provides historical background and up-to-date information and analysis on health politics and health systems throughout Europe. In particular, it captures developments that have taken place since the end of the Cold War, a turning point for many European health systems, with most post-communist transition countries privatizing their state-run health systems, and many Western European health systems experimenting with new public management and other market-oriented health reforms. Following three introductory, stage-setting chapters, the handbook offers country cases divided into seven regional sections, each of which begins with a short regional outlook chapter that highlights the region's common characteristics and divergent paths taken by the separate countries, including comparative data on health system financing, healthcare access, and the political salience of health. Each regional section contains at least one detailed main case, followed by shorter treatments of the other countries in the region. Country chapters feature a historical overview focusing on the country's progression through a series of political regimes and the consequences of this history for the health system; an overview of the institutions and functioning of the contemporary health system; and a political narrative tracing the politics of health policy since 1989. This political narrative, the core of each country case, examines key health reforms in order to understand the political motivations and dynamics behind them and their impact on public opinion and political legitimacy. The handbook's systematic structure makes it useful for country-specific, cross-national, and topical research and analysis.

Towards Service Robots for Everyday Environments Erwin Prassler, Rainer Bischoff, Wolfram Burgard, Robert Haschke, Martin Hägele, Gisbert Lawitzky, Bernhard Nebel, Paul Plöger, Ulrich Reiser, Marius Zöllner, 2012-03-14 People have dreamed of machines, which would free them from unpleasant, dull, dirty and dangerous tasks and work for them as servants, for centuries if not millennia. Service robots seem to finally let these dreams come true. But where are all these robots that eventually serve us all day long, day for day? A few service robots have entered the market: domestic and professional cleaning robots, lawnmowers, milking robots, or entertainment robots. Some of these robots look more like toys or gadgets rather than real robots. But where is the rest? This is a question, which is asked not only by customers, but also by service providers, care organizations, politicians, and funding agencies. The answer is not very satisfying. Today's service robots have their problems operating in everyday environments. This is by far more challenging than operating an industrial robot behind a fence. There is a comprehensive list of technical and scientific problems, which still need to be solved. To advance the state of the art in service robotics towards robots, which are capable of operating in an everyday environment, was the major objective of the DESIRE project (Deutsche Service Robotik Initiative – Germany Service Robotics Initiative) funded by the German Ministry of Education and Research (BMBF) under grant no. 01IME01A. This book offers a sample of the results achieved in DESIRE.

Biodiversity Conservation and Environmental Change Lindsey Gillson, 2015-04-09 Ecosystems today are dynamic and complex, leaving conservationists faced with the paradox of conserving moving targets. New approaches to conservation are now required that aim to conserve ecological function and process, rather than attempt to protect static snapshots of biodiversity. To do this effectively, long-term information on ecosystem variability and resilience is needed. While there is a wealth of such information in palaeoecology, archaeology, and historical ecology, it remains an underused resource by conservation ecologists. In bringing together the disciplines of neo- and palaeoecology and integrating them with conservation biology, this novel text illustrates how an understanding of long-term change in ecosystems can in turn inform and influence their conservation and management in the Anthropocene. By looking at the history of traditional management, climate change, disturbance, and land-use, the book describes how a long-term perspective on landscape change can inform current and pressing conservation questions such as whether elephants should be culled, how best to manage fire, and whether ecosystems can or should be re-wilded. *Biodiversity Conservation and Environmental Change* is suitable for senior undergraduate and post-graduate students in conservation ecology, palaeoecology, biodiversity conservation, landscape ecology, environmental change and natural resource management. It will also be of relevance and use to a global market of conservation practitioners, researchers, educators and policy-makers.

2050 - Tomorrow's Tourism Ian Yeoman, 2012-06-13 In 2050, it is predicted that 4.7bn or nearly 50% of the world's population will take an international holiday. But can humankind meet that forecast given the issues of ageing populations, peak oil, the global financial crisis and climate change? This book constructs scenarios from Shanghai to Edinburgh, Seoul to California encompassing complex topics such as human trafficking, conferences, transport, food tourism or technological innovation. This is a blue skies thinking book about the future of tourism and a thought-provoking analytical commentary.

Virus-Like Particles Paul Pumpens, Peter Pushko, 2022-05-22 This book represents the first complete and systematic guide to the virus-like particles (VLPs) and their applications as vaccines, therapeutic tools, nanomaterials, and nanodevices. The grouping of the VLPs follows the most recent virus taxonomy and the traditional Baltimore classification of viruses, which are based on the genome structure and mechanism of mRNA synthesis. Within each of the seven Baltimore classes, the order taxon serves as a framework of the chapter's arrangement. The term VLP is used as a universal designation for the virus-, core-, or capsid-like structures, which became an important part of the modern molecular virology. The 3D structures, expression systems, and nanotechnological applications are described for VLPs in the context of the original viruses and uncover their evolving potential as novel vaccines and medical interventions. *Key Features* Presents the first full guide to the VLP nanotechnology, classified by current viral taxonomy Outlines specific structural properties and interconnection of the virions and VLPs Explains generation and characteristics of VLPs produced by various expression systems Offers up-to-date summary of VLPs designed as vaccines and delivery tools Unveils interconnection of VLPs with novel organic and inorganic nanomaterials

Italian Wines 2001 Gambero Rosso, 2001 Since its first edition in 1988, *Italian Wines* has played a major role in Italy's wine market as both professionals and wine enthusiasts have learned to trust its evaluations. Arbitration Law and Practice in China Jingzhou Tao,2012-07-01 The new rules of the China International Economic and Trade Arbitration Commission (CIETAC) that came into effect on 1 May 2012 are widely recognized as the full commitment of the Chinese government to the international arbitration system. Clarifications of the scope of the Arbitration Law to include contractual disputes, disputes over rights and interests in property, and disputes between legal persons and other organizations, as well as the firm establishment of the arbitration agreement as the sole and exclusive basis for founding the jurisdiction of an arbitral tribunal, greatly allay any residual apprehension on the part of foreign investors. This third edition of a book that has been widely relied upon since 2003 by business people and their counsel with interests in China is the first publication to offer comprehensive and authoritative coverage of the CIETAC Rules 2012. In addition to the matchless features for which earlier editions are so greatly valued – such as in-depth coverage of enforcement of foreign judgements in China and of Chinese judgements elsewhere, measures to overcome local protectionism, effects of China’s most important bilateral investment treaties (BITs), and arbitration-related interpretations of the Supreme People’s Court – the new edition highlights such aspects of the CIETAC Rules 2012 as the following: the new mechanism of consolidation of arbitrations; power to grant interim measures via the forms of procedural orders or interim awards; procedure of suspension of arbitration; conservator measures; interlocutory award and partial award; combining conciliation with arbitration; and expedited process under a new summary procedure. With first-hand expert guidance on the actual handling of arbitration cases, recommended arbitration agreement clauses for numerous contingencies, case studies and comparative cases to elucidate the handling of specific issues, abundant legal instruments for quick, direct reference to the relevant law, and an annex with English texts of the most important laws and regulations, this book offers all the details and insights a practitioner needs. While Arbitration Law and Practice in China is primarily a detailed, practical examination of Chinese arbitration practice and related laws, the Third Edition’s special significance lies in its thorough and timely coverage of the CIETAC Rules 2012. For this reason especially it will be of great practical value to business people everywhere operating or seeking opportunities to partner with Chinese enterprises. It will also be useful to corporate counsel, arbitration institutions, and students of dispute resolution.
