Shared Entrepreneurship F. Shipper,2014-08-13 Today's views of leadership and management have significantly expanded to incorporate a variety of elements such as rewards, visions, and worker participation. However, most perspectives still view leadership as something that is assigned to a designated person who then exercises influence downward toward subordinate followers. In many ways the persistent top-down command and control theme that supports established leadership thought and practice prevents organizations from fully tapping into their human resources, in turn limiting their flexibility to meet the challenges of increasingly dynamic, complex, and competitive environments. Shared Entrepreneurship replaces the top-down approaches of the past with a new framework that draws strengths and innovation from collaboration and sharing. This book is divided into two main sections. The first section consists of six chapters which provide an in-depth overview and discussion of shared entrepreneurship. The second section consists of eight original case studies commissioned by the authors, featuring such companies as Herman Miller, Inc., SRC Holdings, and W.L. Gore & Associates.

Perspectives on Digital Humanism Hannes Werthner,Erich Prem,Edward A. Lee,Carlo Ghezzi,2021-11-23 This open access book aims to set an agenda for research and action in the field of Digital Humanism through short essays written by selected thinkers from a variety of disciplines, including computer science, philosophy, education, law, economics, history, anthropology, political science, and sociology. This initiative emerged from the Vienna Manifesto on Digital Humanism and the associated lecture series. Digital Humanism deals with the complex relationships between people and machines in digital times. It acknowledges the potential of information technology. At the same time, it points to societal threats such as privacy violations and ethical concerns around artificial intelligence, automation and loss of jobs, ongoing monopolization on the Web, and sovereignty. Digital Humanism aims to address these topics with a sense of urgency but with a constructive mindset. The book argues for a Digital Humanism that analyses and, most importantly, influences the complex interplay of technology and humankind toward a better society and life while fully respecting universal human rights. It is a call to shaping technologies in accordance with human values and needs.

Beyond the Cold War of Words Sijbren de Jong,Willem Oosterveld,Artur Usanov,Katarina Kertysova,Ihor Ilko,Juncal Fernández-Garayzábal González,2015-04-20 This report is commissioned by RNW, an international media organization based in The Netherlands that aims to promote free speech and fundamental freedoms in countries where these are severely restricted. RNW (co)creates content and online platforms where young people can form and express their opinions about sensitive issues. This study zooms in on a select number of countries belonging to the post-Soviet space that lie on the fault lines of overlapping spheres of influence between Europe and Russia. Specifically, the report assesses the risks of the current one-sided media services to Russian speaking minorities in Latvia, Belarus, Ukraine and Moldova. In doing so, the study examines the extent to which RNW could make a meaningful contribution to a more balanced information service, focusing on online and social media. Furthermore, the report analyzes the opportunities for RNW to operate in these countries, and provides an inventory of the kinds of (legal) barriers that exist that could hinder this aim.

Army Food Program Department of the Army,2012-07-24 This regulation encompasses garrison, field, and subsistence supply operations. Specifically, this regulation comprises Army Staff and major Army command responsibilities and includes responsibilities for the Installation Management Command and subordinate regions. It also establishes policy for the adoption of an à la carte dining facility and for watercraft to provide subsistence when underway or in dock. Additionally, the regulation identifies DOD 7000.14-R as the source of meal rates for reimbursement purposes; delegates the approval authority for catered meals and host nation meals from Headquarters, Department of the Army to the Army commands; and authorizes the use of the Government purchase card for subsistence purchases when in the best interest of the Government. This regulation allows prime vendors as the source of garrison supply

and pricing and provides garrison menu standards in accordance with The Surgeon General's nutrition standards for feeding military personnel. Also, included is guidance for the implementation of the U.S. Department of Agriculture Food Recovery Program.

Health Literacy Institute of Medicine,Board on Neuroscience and Behavioral Health,Committee on Health Literacy,2004-06-29 To maintain their own health and the health of their families and communities, consumers rely heavily on the health information that is available to them. This information is at the core of the partnerships that patients and their families forge with today's complex modern health systems. This information may be provided in a variety of forms — ranging from a discussion between a patient and a health care provider to a health promotion advertisement, a consent form, or one of many other forms of health communication common in our society. Yet millions of Americans cannot understand or act upon this information. To address this problem, the field of health literacy brings together research and practice from diverse fields including education, health services, and social and cultural sciences, and the many organizations whose actions can improve or impede health literacy. Health Literacy: Prescription to End Confusion examines the body of knowledge that applies to the field of health literacy, and recommends actions to promote a health literate society. By examining the extent of limited health literacy and the ways to improve it, we can improve the health of individuals and populations.
