The New World of Transitioned Media Gali Einav,2014-10-01 The media industry is undergoing an accelerated pace of change, driven in large part by the proliferation of digital platforms. In many cases, the speed of adoption has exceeded our ability to process the impact of these changes on individuals and society at large. This book provides a “behind-the-scenes” look at the media industry’s transition into the digital era and examines its impact on marketing, advertising, innovation and other economic and social activities. The impact of digital technologies on traditional media sectors, such as advertising, video games, film and television is well-documented. Less understood is its effect on our perceptions, thought processes and inter-personal relationships. Social media, for example, represents a fundamental change in the ways we interact with media, communicate with each other and even present ourselves to the world. This has shaped the way we communicate with institutions and brands. Similar to the first “Transitioned Media” book, *Transitioned Media: A Turning Point into the Digital Realm*, this book combines media industry leaders and academics to explore various transformative trends and issues. Themes include measuring cross-platform behaviour, artificial intelligence in journalism, the evolution of video games, digital media and physical space, the mobile use trends, social media and the corporate world, the changes in the television and newspaper business and the evolving relationship between advertisers and target audiences. The varied backgrounds of contributors and array of topics make for a unique and insightful point of view.

Living Labs David V. Keyson,Olivia Guerra-Santin,Dan Lockton,2016-09-28 This book presents the results of a multi-annual project with sustainable Living Labs in the United Kingdom, Sweden, Germany and the Netherlands. Living Labs – as initiated by the authors – have proved to be very promising research, design, co-creation and communication facilities for the development and implementation of sustainable innovations in the home. The book provides an inspiring introduction to both the methodology and business modelling for the Living Lab facilities. Understanding daily living at home is key to designing products and services that support households in their transition to more sustainable lifestyles. This book not only explores new ways of gaining insights into daily practices, but also discusses developing and testing design methods to create sustainable solutions for households. These new methods and tools are needed because those available are either ineffective or cause rebound-effects. Intended for researchers and designers with an interest in the transition to sustainable lifestyles, it also appeals to company leaders interested in new ways of developing sustainable innovations and offers suggestions for effectively applying Living Labs for sustainable urban development.
